American Railroad Journal.

Saturday, July 27, 1872.

Stock Exchange and Money Market.

Money has been in unusually liberal supply in the open market, and rates have ruled exceptionally low, ranging from 2½@5, generally 3@4 per cent. on call, and 5@7 per cent. per annum in the discount form, thus giving the advantage decidedly to responsible borrowers who have shown less urgency in their demands for aid, whether for speculative or mercantile purposes. The stock and gold movements have been on a restricted scale, requiring a very moderate supply of funds to make settlements and adjust balances. The inquiry from commercial sources has been comparatively light, and quite promptly met, in nearly all instances, at the prevailing rates. The outflow of currency to the interior has been of less magnitude, and the city banks closed the week with some increase of strength in their reserves. The U. S. Sub-Treasury office again last week reduced its coin balance about ½ a million and enlarged its currency slightly. The city banks increased their loan and discount average about ⅝ths of a million during the week, and contracted their outstanding circulation nearly ⅛th of a million. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $8,160,527, and a coin reserve of $89,246,503.

The city banks, in their latest return, show a falling off of $545,100 of legal tender notes, with an increase of $1,348,400 of specie, and of $2,042,300 of deposits, also of $616,700 in their loan and discount averages, and a reduction of $90,400 in their item of circulation. The city bank exchanges, last week, averaged 73½, and thus far, this week, about 76 millions daily. The banks now hold $12,735,575 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $29,571,800, against $18,141,987 same time last year. The city bank deposits are now $247,551,300 against $255,735,063, week ending July 22, 1871. The legal tender reserve amounts to $52,895,600, against $72,419,670 same time last year. The circulation now stands at $27,376,000 against $30,371,186 same time last year. The loans are now $297,214,500 against $300,068,724 at this date last year.

The coin reserve of the city banks is now about 29½ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 52⅞ millions against $46,616,000 on the statement of February 10th.

Government revenues have been quite moderate since our last. The excises yielded within the week about two millions, and thus far in the current fiscal year beginning with July 1, 1872, $9,947,371. The customs at the port of New York last week were $1,855,143; at the outports, equal to about $625,000 all in coin, or coin certificates.

Under the Treasury programme for July, Government proposes to buy in Five-Twenties, as follows: Wednesday July 31, $1,000,000.

The Treasury Department on Wednesday controlled a coin reserve of $79,860,000 of which $32,330,000 were represented by outstanding coin certificates and a currency balance of $10,190,000.

Gold has shown more firmness, on lighter offerings, particularly for prompt delivery, but the demand has been moderate, and the dealings have been devoid of spirit, as a rule, though toward the close the speculative temper was more confident, and the market rather more buoyant. The export drain was less extensive. The customs inquiry, light.

On Wednesday, the specie exports were $525,000.

The range of the price during the week has been from 114⅛@114¾ and the closing quotation on Wednesday was 114⅝ against 114⅝@114¾ the preceding Wednesday. The specie outflow last week, was $4,641,026. The Gold Exchange Bank clearances have averaged about 32 millions per day during the week.

The customs demand for Gold last week, averaged $324,000 a day; thus far, this week, it has averaged $299,800 a day, or equal to a weekly aggregate of $1,798,800. The arrivals of specie from Europe, Havana and other foreign ports last week were $3,597 and since Jan. 1, 1872, $2,736,436 against $3,848,156 same time in 1871. The total customs revenue of the Government, in coin, at this port, since January 1, has been $81,-

311,255 against $85,015,650 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $51,829,645, against $57,919,367 during the same time in 1871.

The export drain of specie was $4,641,026 last week, against $6,094,371 same week preceding year. The shipments since January 1, 1872, have been $48,786,037 against $49,883,757 during the same portion of 1871.

Foreign Exchange has been in rather less request at somewhat easier rates. Bankers' sixty day bills on London closed on Wednesday at 109½@109¾; sight bills on London, 110¼@110½.

The produce exports from this port, week ending with July 23, were to the currency value of $4,274,943.

Government securities have been in light supply and held with confidence, on a fair demand for the leading issues, mostly on investment account.

U. S. sixes of 1881 at the close on Wednesday of the current week were quoted at 117¾@118; U. S. Five-Twenties of 1862, (other than the bonds called in) 115⅝@115⅞; U. S. Five-Twenties of 1864 at 115⅝@115⅞; U. S. Five-Twenties of 1865, 116⅛@116¼; U. S. Five-Twenties of 1865 consolidated, 114⅝@114¾; U. S. Five Twenties of 1867, 115¼@115⅜; U. S. Five-Twenties of 1868, 115@115¼; U. S. Ten-forties at 112¾@113; U. S. Fives of 1881 (Funding Loan) 113¾@113⅞; Six per cent. currency bonds, 114⅜@114⅝.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 10.	July 17	July 24.
Consols	92⅝	92½	92½
U. S. 5-20's of 1862..	91⅛	91⅛	91
U. S. 5-20s, 1865....	92½	92½	92⅝
" 1867	92	91⅝	91¾
" 10-40s	90	90¼	89¾
New Fives of 1881...	90¼	89¼@⅜	89¼
Erie.	43½	42	41¼

State bonds have been in moderate request and irregular in prices. The Southern State obligations have fluctuated widely.

Railway Mortgage Loans have been moderately active with the main demand from investment buyers and prices have been generally quoted stronger. Central Pacific Sixes have been in good demand at 101¾@102⅞ Chesapeake and Ohio have been in good request at 94 per cent. and accrue interest.

Railway and Miscellaneous share property has been comparatively tame, throughout the week, many of the leading operators having been absent from the city. Values have been variable, but closed with some indications of buoyancy.

In the line of Metals, Ingot Copper has been very quiet, but rather steadier in price; 100,000 lbs. sold at 33c.@33¼c. per lb. Under the very favorable advices from England, reporting an advance in Coltness Pig-iron to £7 15s. Scotch Pig-iron has been held much higher here, on restricted offerings, with sales reported of 500 tons Eglinton at $48 50, now held at $50@$52; 400 tons Glengarnock, part at $53 50 now held at $54, with Coltness quoted up to $57 50 and Gartsherrie to $55. American Pig-iron has also been held with increased confidence, particularly No. 1, which has been scarce and wanted, but the high views of sellers have been against free dealings. Iron rails have been in good request and strong in price; sales 2,000 tons English on private terms. Lead has been quoted steady, but has been inactive. Spelter has been rather more sought after, and 25 tons have been purchased at 7c., gold per lb. Pigtin has been quiet, on the basis of 36¼c.@36½c., gold for Straits. Tin Plates have been in less demand, owing partly, to the firm views of holders; 500 boxes charcoal Terne, for August delivery, changed hands, $11 62½, gold. Zinc dull at old rates.

General business has been somewhat brisker. Breadstuffs have been quoted cheaper, on free offerings of stock. Provisions, Petroleum, and Naval Stores closed more firmly. Cotton opened heavily at declining prices, but closed in favor of sellers. Middling upland cotton again declined and closed on Wednesday at 22 cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,669,100 bales, against 3,919,922 bales same time in the preceding year; exports 1,915,936 bales against 3,101,577 bales in the previous year; stock at the ports at latest dates, 126,624 bales against 170,489 bales same date 1871.

At the Live Stock Markets, Beeves have been in fair request at 8@13 cts.; Veals at 5@9 cts.; Sheep at 5@7; Lambs, 8½@12½ cts.; Swine, 4½@4⅞ cts. per lb., all live weight. The week's receipts were 7,913 Beeves, 2,821 Veal Calves, 23,415 Sheep and Lambs; and 24,050 Swine..

Foreign goods have been in rather better request and steadier as to price, in most instances. The week's imports of foreign goods reached the amount of $7,221,202 including $2,605,539 of dry goods.

Ocean freights have been fairly active and firmer. Tonnage continues scarce.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Defense Loan, 1883, 104@104¼; City Passenger R. R., 23⅝@24; George's Creek Coal, 92@94½; Atlantic Coal, 1.50@1.75.

☞ The Bachman's Valley road is to be graded from its junction with the Hanover branch to Chesnut Hill Ore Banks in August. Five miles are completed, from Leib's Mill southeast up Codorus stream to Kleinefeltersville, Pa., within two or three miles of the Maryland line. From this line the course of the road is southwest instead of southeast, the proposed terminus being on the Maryland Western at Westminster, 29 miles from Baltimore.

☞ The Northern Pacific Company are making arrangements to let another division (the Montana) of their road. The work on the Dakota division is progressing so finely, and the bonds of the road are selling so rapidly, that they feel no hesitancy in letting out an additional division. The contractors on the Dakota division are pushing not only the grading but also the track-laying, and trains can now go thirteen miles beyond Fargo.

☞ The estimated earnings of the Erie Railway for the week ending July 15, 1872, were $396,611; against $463,097 for the corresponding period of 1871—a decrease of $66,486. Total earnings since April 1, 1872, $5,539,834—an increase over the same time in 1871 of $483,976.

☞ The President and Directors of the Baltimore and Drum Point Railroad held a meeting in Baltimore on the 17th inst., at which the road from Camp Parole, on the Annapolis and Elkridge Railroad to Butler's Tavern in Anne Arundel county, a point ten miles distant, was located. Work will be commenced immediately on that portion of the road. The Board also determined to put the Annapolis Road in order throughout its entire length. The prospects of the road are flattering, and hopes are entertained that portions of Anne Arundel and Calvert counties, which have heretofore been a sealed volume, will soon be placed in easy communication with Baltimore.

☞ The Frederick and Pennsylvania track is now laid over the bridge and trestle works over Big Pipe Creek, at Bruceville, and the connection with the Western Maryland Railroad and the Pennsylvania roads is complete. The Pennsylvania Company now run their own engines over the road and bring all the iron via Northern Central and Hanover Junction. The tracklayers are rapidly approaching Renner's warehouse, a mile and a half north of Woodsboro', Frederick Co.

☞ A despatch from St. Louis says the terms of the lease recently made of the Missouri Pacific Railroad to the Atlantic and Pacific Railroad are ten per cent. dividend on the present stock of $3,600,000 for three years; twelve per cent. for two years, and fourteen per cent. for 999 years. Joseph Brown will continue President and become a managing director of the Atlantic and Pacific road.

☞ The Rolling Mill at Pencoyd, on the west side of the Schuylkill, near Manayunk, is being greatly enlarged. The new portion will be used as a forge and finishing mill, and the old structure will be occupied as a mill for preparing rough stock. The new mill will be supplied with a train of three high rolls, and four double-acting steam-hammers, weighing 3000 pounds each, for making car axles.

☞ The Cattaraugus *Union* says that the contracts for building the Cattaraugus Railway from Salamanca to Machias have been let to responsible parties. Harris Brothers, of Buffalo, have the contract for clearing, grubbing and masonry. Work is to be commenced at once. Mr. W. W. Coe is managing assistant engineer in charge of the construction of the road.

☞ The Milwaukee, Lake Shore and Western (hitherto known as the Milwaukee, Manitowoc and Green Bay) Railroad, has been located along the Lake Shore through Port Washington, Sheboygan, Manitowoc and Two Rivers, and thence to Green Bay, with a line also from Manitowoc Westward to Appleton. Most of the line and a little of the Lake Shore line is consolidated.

☞ The Baltimore and Ohio Railroad Company have just negotiated in England, a loan of $10,000,000, with which they propose at once to build their extensions from Pittsburgh to Chicago. The entire line will be put under contract as soon as the towns along the line take definite action in regard to granting the right of way.

☞ Some 40 men are tunneling West Point for the West Shore railroad with steam drill and nitro-glycerine.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Besides being the obligation of a wealthy corporation, composed of men of experience and high-toned commercial integrity, they are secured by a first mortgage on the road, revennes, land grant, franchise and equipments, combined in one mortgage, and are readily negotiable both in the markets of this country and Europe.

A liberal sinking fund provided in the mortgage deed must advance the price upon the closing of the loan. Principal and interest payable in GOLD. Interest at eight (8 p. c.) per cent. per annum, payable, semi-annually, free of tax. Principal in thirty years. Denominations, $1,000, $500 and $100, Coupons or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

The diminished quantity of these Bonds for sale, and the increased demand absorbing them, warrant the belief they will soon be sought for at an advance considerably above the present subscription price at which they can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.

BANKERS,

NO. 11 WALL STREET.

☞ The Philadelphia *Ledger* of 22d inst., reports the net anthracite coal tonnage for the week ending on the 13th inst., from all sources, at 427,771 tons, and for the year 9,884,045 tons, against 5,829,500 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,554,545 tons. The production of bituminous coal for the week was 53,537 tons, and for the year 1,279,268 tons, against 1,166,382 tons to the corresponding time last year—an increase of 112,886 tons. The total production of all kinds of coal for the week was 481,308 tons, and for the year 11,158,313 tons, against 6,495,882 tons to corresponding time last year, showing an increase of 4,652,431 tons.

☞ The Norwich and Worcester Railroad Company now includes in its list of officers a regularly appointed and salaried surgeon.

Journal of Railroad Law.

RAILROAD COMPANIES—BILL OF LADING—MEANING OF EXPRESSION "DAMAGE OR LOSS BY FIRE"—RULE AS TO NEGLIGENCE.

The facts in the late case of Lamb *vs.* Camden and Amboy R. R. & T. Co., (46 N. Y., 272,) are fully and clearly stated in the following opinion by—

GROVER, J.—It was proved by the defendant, that the cotton in question was destroyed by fire, while in a shed upon the dock of the defendant, where it had been placed by the defendant. The question was made upon the trial, whether this proof, of itself, constituted a defence to the action, or whether the defendant was bound to go further, and show that it and its employes were free from all negligence in the origin and process of the fire, or whether it was incumbent upon the plaintiffs, to maintain the action, to prove that the fire, causing the loss, resulted from such negligence; in other words, whether the plaintiff was bound to prove that the fire causing the loss, resulted from the negligence of the defendant, or the latter was, in the first instance, bound to prove itself free from all negligence in that respect. In considering this question, it must be borne in mind that it has already been determined, that the defendant was exonerated from all liability as carrier, for a loss caused by the destruction of the cotton by fire, by an express provision of the contract in pursuance of which it transported the cotton. Relieved of this responsibility it was liable only, in case it was so destroyed, as bailee for hire; and it is undisputed that such a bailee is liable for the loss of the property only in cases where the loss is the result of his negligence. The question is whether in case of loss by a bailee for hire, the bailor can recover upon simple proof of loss, unless the bailee shall prove that he was free from all negligence contributing to such loss, or whether the bailor must go further and prove that the loss was caused by the negligence of the bailee. I believe this to be a fair statement of the question between the parties to the present action, and yet so stated, no one will hardly insist that the bailor can recover without affirmatively proving that the loss was caused by the negligence of the bailee. The decisions are numerous to this effect, based upon the familiar principle that negligence, being a wrong, will not be presumed, but must be proved by the party charging it and seeking a recover founded thereon. Cases may occur, where the proof of the loss and circumstances connected therewith may show a case of presumptive negligence in the defendant, such as will entitle the plaintiff to recover upon that ground, in the absence of further proof. To illustrate. A passenger upon a railroad, receiving an injury caused by the cars running off the track, may rely upon the fact that they did run off as evidence of negligence; nevertheless, the *onus* is upon him of establishing to the satisfaction of the jury, that his injury was caused by the negligence of the defendant; and, unless he satisfies the jury affirmatively of this fact from all the evidence he is not entitled to recover. It sometimes occurs, in the progress of a trial, that a party holding the affirmative of the issue, and consequently bound to prove it, introduces evidence, which uncontradicted, proves the fact alleged by him. It has, in such cases, frequently been said, that the burden of proof was changed to the other side: but it was never intended thereby that the party bound to prove the fact was relieved from this; and that the other party to entitle him to a verdict, was required to satisfy the jury that the fact was not as alleged by his adversary. In such cases, the party holding the affirmative is still bound to satisfy the jury affirmatively, of the truth of the fact alleged by him, or he is not entitled to a verdict. In the present case, to entitle the plaintiff to recover, he was bound to prove that the fire which consumed the cotton resulted from the negligence of the defendant. The remaining inquiry is, whether the rule requiring this was violated upon the trial, from which the defendant might have been prejudiced, after proof had been given by the defendant showing the destruction of the cotton by fire. Its counsel proposed to rest his case, reserving the right to rebut any testimony that might be adduced by the plaintiffs, tending to show that the destruction of the cotton by fire was occasioned through the defendant's negligence or default. The plaintiff's counsel insisted that the defendant was bound to prove that it had not been guilty of negligence, and that the defendant's case must then be exhausted. The court thereupon decided that the burden of proof was on the defendant, to show that the destruction of the cotton by fire was not caused by negligence on its part. This was error. Although in proving the destruction of the cotton by fire it appeared that the fire originated on a boat of the defendant laying at its dock. This was only evidence tending to show negligence of the defendant. Whether sufficient *prima facie* to entitle the plaintiff to a verdict is a question not necessary to decide, as no ruling thereon was made by the court. Be that as it may, the burden was still upon the plaintiffs to establish, to the satisfaction of the jury from all the evidence, that the fire was the result of the negligence of the defendant. Other evidence was given making the question of the defendant's negligence, in respect to the fire, proper to be decided by the jury. The court, among other things, charged the jury that, although the defendant had been freed from their ordinary measure of responsibility as insurers, they are not relieved from the burden of satisfying you that this loss, which it is beyond doubt happened by fire, was not occasioned by negligence on its part. To this the defendant's counsel excepted. In another part of the charge the judge stated, that the real importance of the question as to reasonable time (for the removal of the cotton by plaintiffs' meaning) consists in this case of the fact, that down to this point of time, the burden of establishing that there was not any such negligence as I have stated rests upon the defendant. This part of the charge was excepted to. Both exceptions were well taken. The idea plainly conveyed to the jury was, that they should find for the plaintiff, unless satisfied from the evidence, that the fire was not the result of the defendant's negligence, thus leaving them to find for the plaintiff, if unable to determine whether the fire so resulted or not, while the instruction should have been to find for the defendant, unless they found, from all the evidence, that the fire was the result of the negligence of the defendant. The jury, after retiring to deliberate on their verdict, returned into court and made the following inquiry. Whether, if satisfied that proper precaution was not taken to prevent fire on board (the boat meaning), through the neglect to place a watchman there, they were to find for the plaintiff for the whole amount. To which the court responded, that the omission to place actually on the boat, specially charged with the duty of guarding her, might be considered by the jury on the question of negligence in the case, and if the jury found the defendants guilty of negligence, which contributed to the loss of all or any part of the cotton, etc., to find for the plaintiff for such cotton. This did not cure the error committed in the charge previously given and excepted to. In that, the judge had instructed the jury to find for the plaintiffs, unless the defendant had satisfied them, that the fire was not the result of its negligence. This was not withdrawn by the answer given to the question of the jury. Taken both together, the jury must have understood that they were to find for the plaintiffs, if satisfied that the fire resulted from the defendant's negligence, and that they were also to find for them, unless they found it did not so result. This gave the plaintiffs the verdict, if the jury were unable to find negligence in the defendant, on the ground that they were unable to say that the proof showed that it was not negligent. Thus in effect, finding for the plaintiffs, without determining the question at all, much less without finding that the fire was the result of defendant's negligence. For the error of the charge upon this point, and in the ruling upon the trial, that the burden was upon the defendant, to show that the fire did not result from its negligence, the judgment must be reversed and a new trial ordered.

Judgment reversed.

Debt of Georgia.

The following is an extract from the Message of the Governor, dated 17th inst:

The following is a consolidated statement of the existing debt of the State, created before the 4th day of July, 1868, showing the amounts and dates of the issue and maturity of the bonds:

When issued.	When Due.	Amount.
1842 and 1852	1872	$650,000
1842 and 1843	1873	137,000
1844 and 1848	1874	251,500
1858	1878	100,000
1859	1879	200,000
1860	1880	200,000
1861	1881	100,000
1866	1886	3,600,000
Grand total		$5,238,500

From the foregoing tabular statement, it will appear that the total amount of our bonded debt, contracted prior to July 4, 1868, is $5,238,500.

To meet the bonds falling due the present summer, the Governor was authorized to issue bonds to the amount of $700,000, due in twenty years, and bearing interest at a rate not exceeding seven per cent. per annum, payable semi-annually. As required by the provisions of this act, I have caused bonds to be prepared, and the same are now being used in exchange and redemption of the old bonds falling due the present year. By the third section of the act, a temporary loan was authorized in a sum not exceeding $300,000, for the purpose of paying the semi-annual interest, due the present summer, upon the bonds of the State issued before the 1st day of June, 1868, which loan, it is provided, shall be paid back out of the moneys received from the taxes paid into the Treasury during the year 1872.

Acting under the authority thus conferred, I

borrowed from the National Bank of Commerce in New York the sum of $200,000, at seven per cent. per annum, to be repaid on the 1st day of December next. This sum was placed to the credit of the State on the 29th day of June last, and is sufficient to pay the interest falling due upon our old debt in the months of June, July and August.

An arrangement has also been effected with the National Bank of Commerce to act as the agent of the State in exchanging the old for the new bonds falling due this year. This arrangement is as follows: An offer is made to the holders of the old bonds to exchange therefor the new seven per cent. bonds authorized to be issued by said act. In the event this offer shall not be accepted, it is proposed that the semi-annual interest shall continue to be paid upon the old bonds until the State shall be able to redeem the same. This arrangement is the best that could be effected in the present condition of the public credit, and it is believed that it will give satisfaction to our creditors. There exists no law authorizing the payment of interest upon the old bonds after their maturity, but being satisfied that the proposition to that effect, embraced in the arrangement above referred to, if carried out, will be promotive of the public welfare, I respectfully recommend that the same be approved by the Legislature.

Hamilton (Ca.) as a Railway Centre.

We are reminded by reading the annual report of the Hamilton Board of Trade that that city is fast becoming well supplied with railway facilities. Besides the Great Western proper, the Wellington, Grey and Bruce is open to Paisley, "and will be completed to Southampton by the 15th of September next, with every probability of an extension of the same line to Georgian Bay." Twenty miles of the Southern Extension, a branch of the same line, are ready for the rails, and it is hoped that Kincardine will be reached within a twelve-month. The Hamilton and Lake Erie will be graded to Caledonia by the 15th of August; an expensive bridge is to be built over the Grand River at that point, and the line extended to Hagersville and Jarvis, the expectation being that the latter place will be reached in one year. The line will cross the Buffalo and Lake Huron section of the Grand Trunk, and also the Canada Southern, giving connections with these lines. Respecting the proposed Hamilton and Northwestern line to Collingwood, or somewhere else, the gentlemen of the Board of Trade seem quite sanguine, notwithstanding the project seems to be surrounded with a good many difficulties. Altogether it is plain that the most praiseworthy efforts of the business men of Hamilton—powerfully aided as they have been by the Great Western—are meeting with deserved success.—*Monetary Times.*

☞ The San Francisco *Alta* says that a preliminary survey is now being made for a railroad forty miles long from Merced up the valley of Bear Creek to the middle of the Mariposa estate. This road will save forty miles of staging to Yosemite tourists, and take them beyond the range of the valley dust. A connecting road, twenty miles long and of narrow gauge, is projected to connect the Princeton mine with the Ophir mills on the Merced River. These are only the pioneer lines, and in a dozen years California will be as badly cut up by railroad lines as Massachusetts or Ohio.

☞ The Illinois Western Extension Railroad Company has filed articles of incorporation with the Secretary of the State of Illinois. The line begins at the town of Kankakee, extending Westerly through the counties of Kankakee, Grundy and La Salle to Mendota. Its capital stock is $500,000, and its main office will be at Kankakee.

The National Railroad.

A new railroad project, in which a number of Lancasterians are interested, is about to be consummated. It is chartered under the name of the National Railroad Company, and is an air-line between Philadelphia and New York. Col. Wm. G. Case, of Columbia, is president, and among the directors are C. S. Kauffman, of Columbia, and Dr. H. Carpenter and Geo. K. Reed, of this city. The road will cross the Delaware river between Trenton and Yardleyville, and strike Attleboro, Bucks county, connecting either with the Germantown or North Pennsylvania road. It is proposed to eventually extend the road through Bucks, Montgomery, Chester, and Lancaster counties, and thence on to Hancock, Maryland, where is will strike the Baltimore and Ohio road. It will be ten miles shorter from Philadelphia to New York than any other road.

The contract for grading this part of the road—that is, from Philadelphia to New York—has already been given out, McCrann & Co. having been awarded the section from Yardleyville to Philadelphia. The company composing the firm, we understand, are Messrs. B. J. McCrann and R. H. Brubaker, of this city, and Robert Crane, of Columbia. Shanties will be put up next week, and within a fortnight a thousand men will be at work. The road, when extended to Maryland, cannot but prove of immense advantage to Lancaster city and county.—*Lancaster (Pa.) Express.*

Peachbottom Railway.

The Peachbottom Railway seems to be steadily progressing. The Directors have contracted for the grading and masonry of that portion of the line west of the Susquehanna River. The western division, extending from North Central to Guinstone bridge, a distance of twenty miles, was let to James Freeland & Co., of Millersburg. John T. Wallace took two sections—a mile each, extending from Guinstone bridge to Wallace's cut. D. W. Grove comes in next to Wallace, taking eleven sections, extending from Wallace's cut to the mouth of Scott's run. The remaining portion, consisting of seven miles, was let to Samuel Smith, of Taneytown, Carroll county, Md. Some of the work is required to be completed in fourteen months, and other portions in eighteen. The canvass of York for subscriptions for a line to that borough continue, with fair prospects of success. Mr. Hood, with his assistant engineer, commenced the location of the eastern division of the Peachbottom Railway on the 16th, beginning at Oxford. The contract for the masonry of the division east of the Susquehanna was awarded to Messrs. Clark & Smith, of Philadelphia. The contractors, it is said, expect to begin in a few weeks.—*Oxford Press.*

☞ The Baltimore *American* says that the contest which has been raging for some months past between these two giant railroad gladiators, the Pennsylvania and the Baltimore and Ohio, for the possession of the Philadelphia, Wilmington and Baltimore Road, seems to have been finally settled in favor of the latter. An agreement has been entered into between the Philadelphia, Wilmington and Baltimore and the Baltimore and Ohio Roads by which the former agrees to permit the latter to use its road for a period of years, and by which its passenger cars from Washington and the West will pass over the road and thus avoid transhipment. Whether or not this agreement excludes the Pennsylvania road from equal privileges is not known, but the presumption is that it does.

☞ Another section of the Wellington, Grey and Bruce Railway to Paisley, 85 miles from Guelph, was formally opened on the 8th inst. The contractor is making creditable progress with this line.

NOTICE.

All the Machinery of the New York Railroad Chair Works at private sale. Two Chair Machines; Three Burden Spike Machines; Bolt Heading Machine; Patent Bolt Cutters; Cold Pressed Nut Machine; Heavy Presses, Shears; One 60-horse Engine; One 20-horse do., Boilers, Lathes, &c., &c., at low prices. All in the best order. Apply at factory cor. Morgan and Washington streets, Jersey City, or J. B DAVENPORT, 85 John street, N. Y. (Box 3,041, P. O.) Lists at both places. This is a rare opportunity to buy *good* machinery.

CIRCULAR SLIDE VALVE—TO RAILROAD Managers and other Users of Steam Power.—I will guarantee an addition to the working-power of any locomotive or slide-valve engine of one-third to one-half, at very small cost and no increase of running expenses. Tests desired everywhere. Circulars free.
4t27 J. F. TALLANT, Burlington, Iowa.

OFFICE OF ILLINOIS CENTRAL RAILROAD CO., NEW YORK, July 2, 1872.

A DIVIDEND OF FIVE PER CENT., free of Government tax, has been declared by this Company, payable on the first day of August next, to the holders of full-paid shares registered at the close of the thirteenth day of July instant, after which, and until the fifth day of August next, the transfer books will be closed.
L. V. F. RANDOLPH, Assistant Treasurer.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

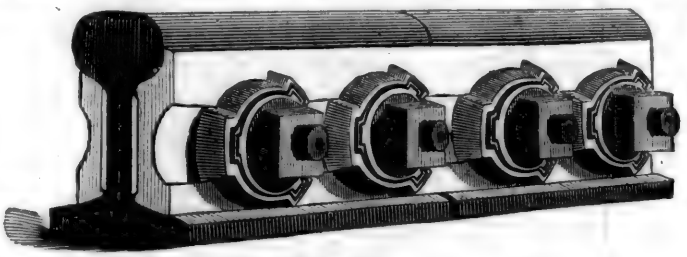
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

THE RONDOUT AND OSWEGO RAILROAD COMPANY.

NEW YORK, KINGSTON & SYRACUSE R. R. Co., No. 18 WILLIAM-ST., N. Y., JULY, 27, 1872.

To the Editor of the Railroad Journal:

SIR: A telegram this morning apparently to the Associated Press, calls in question the value of the First Mortgage Bonds of the Rondout and Oswego Railroad, and states that the company has failed to meet its interest.

I have given public notice as widely as possible of the payment of the July Coupons at the office of the New York, Kingston and Syracuse Railroad Company, No 18 William-st., New York, where the same have been promptly paid in gold, and I invite all persons having any doubt on the subject to apply at that address with any Coupons or Vouchers for interest they may hold.

The suit on which this telegram and false statement are founded rests on the disputed ownership of some bonds. The Coupons of last January of those bonds were refused payment, on the ground that the company had not parted with their possession, and this was under a different Board and Management.

Under the present Board and Management, the Company has met all its liabilities, and largely reduced them, and has increased its receipts and property, and will, about the first of September, throw open to the public 14 additional miles of road fully equipped, thereby reaching the important town of Stamford, in the county of Delaware, 75 miles from the Hudson River.

Your obedient servant,
GEORGE H. SHARPE, President.

Wisconsin Central Railroad.

The Wisconsin Central Railroad Company has leased on satisfactory terms, for 99 years, the road of the Milwaukee, Lake Shore and Western Railroad Company, which company is a consolidation of the Milwaukee, Manitowoc and Green Bay, and the Appleton and New London Railroad companies. This leased road extends from Appleton to Manitowoc, thence to Milwaukee, and passes through a finely settled country, which boasts a population of over 150,000. It is to be completed and passed into the hands of the Wisconsin Central by November 1st, and it is believed it will be a paying road from its commencement. This completes the line of the Wisconsin Central from Lake Superior to Manitowoc on Lake Michigan, where it connects by boat across the lake with railroads running directly to Detroit and New York, making the shortest line from Lake Superior and the terminus of the Northern Pacific Railroad to New York by about 250 miles. It also has the shore line from Manitowoc through Sheboygan to Milwaukee, there making direct connection by another road to Chicago. This line, from the termination of the Northern Pacific to Chicago, is about 100 miles shorter than any other route. The whole country from Milwaukee to Lake Superior through which this road passes, comprises some of the very best farming lands in the United States. The pine and hardwood timber, and the iron property are not to be surpassed in value by any other section in the country.

This whole enterprise is being pushed forward with great vigor, and the parties interested are confident of its ultimate success, which opinion is sustained by those best acquainted with this portion of the country. The income from that part of the road which is now running is sufficient to pay all expenses and the interest on the bonds now issued. The Wisconsin Central will have 300 miles of road running this fall.

☞ I. V. Baker, President of the New York and Canada Railroad, projected from Whitehall north, has let the contract for the construction of the road from Whitehall to Port Henry to Geo. T. Harris & Co., of New York, for the sum of $1,400,000. Mr. Harris contracts to have the work completed August 1873.

Railroad in Japan.

The progressive ideas infused into Japan by American and European influence have long furnished a theme for comment and admiration, but the following extract from a Yokohama letter to the New York *Herald* would indicate that they are rather slow in their Yeddo railroad enterprise, though it must be admitted that whoever has the contract has made, so far, a decidedly good thing of it. The writer says:

"That immense elephant—the railroad—which the Japanese have had on their hands for the last three years, has at length shown some signs of life. After a period of nearly three years since ground was first broken the line has been opened for a distance of thirteen miles. Why it was not opened before for this distance it is difficult to say unless a reason can be found in the fact that those who had charge of its construction were heartily ashamed of the results of their labors. As before stated, this paltry line—the whole length from Yokohama to Jeddo is only seventeen and one-half miles—has been nearly three years in construction. It runs through a country entirely devoid of physical difficulties; labor is plentiful and cheap; money and men have always been on hand. It is a single track road—3 feet 6 inches gauge—and the only perceptible result of all this is a line in working order of thirteen miles in length, and it has cost very nearly one hundred and twenty thousand dollars per mile. Where the money has gone to it is hard to say, but there are the figures. The road was opened to the public on the 13th inst. There are first, second and third class cars. The two first mentioned cars are something like our street cars, only they are narrower and in every way smaller. The first-class cars are divided into three compartments by sliding doors, and carry twelve persons comfortably. The second-class cars differ from the first only inasmuch as they are not subdivided, and are furnished with cane seats instead of leather ones. The third-class cars look like diminutive cattle cars, with wooden benches in them. A train in motion looks very much like a huge and clumsy toy. Still it is not nearly as bad a road as it was expected it would be. Although one gets a considerable shaking in the thirty-eight minutes' ride, the cars run much smoother than I ever dared to hope they would. There is an immense number of officials attached to each train—each car will average two—for what purpose I cannot say, unless it be to display the brass buttons worn by each of them. They run at a speed of about twenty-two miles an hour. Since the road has been opened it has done quite an amount of business, its receipts averaging about five hundred

dollars per day. The tariff is ridiculously high, viz: First-class, $1 50; second-class, $1; third-class, 50 cents. I have been told that these rates will be reduced very considerably on the first of next month. As to the time when the line will be opened all the way to Jeddo I am loth to venture a prophecy; but, judging from the past, I should be inclined to suggest about the early part of 1874. If Japan has to pay for all her contemplated railroads in the same ratio as she has paid for this, I am very much afraid that some time will elapse before any distant points are connected in this manner."

☞ Superintendent Slack of the Cumberland and Pennsylvania Railroad Company has received from Harrisburg Pa., via, the Bedford and Bridgeport Railroad, two hundred and fifty tons of steel rails for his road. They were manufactured at the Harrisburg Steel Works, and are of the best quality. When they are laid the Cumberland and Pennsylvania road will be supplied with steel rails for about two thirds of its entire length, and we understand the company design laying the remaining distance with the same material as speedily as possible.

Cincinnati, Hamilton and Dayton Railroad.

The income of this company for the fiscal year ending March 31, 1872, was as follows:

From passengers		$420,151 27
" freight		592,214 85
" mails and express		25,070 93
" rents of tracks		211,767 24
" mileage of cars		22 089 78
" interest		28,434 52
" miscellaneous sources		8,867 03
		$1,307,595 57
Expenses, viz:		
Repairs of road and track	$187,816 35	
" bridges	20,961 44	
Shops and engine houses	11,555 74	
Station expenses	99,331 73	
Wood, coal and oil	82,191 58	
Locomotive power	82,322 87	
Passenger train expenses	65,700 19	
Freight train expenses	69,437 16	
Office expenses	47,350 24	
Miscellaneous expenses	33,294 88	
		699,962 18
Net earnings		$607,633 19
From which deduct—		
Dividends, October, 1871, and April, 1872, four per cent each	$280,000 00	
Interest on bonds	144,990 00	
Taxes	58,707 55	
Sundries profit and loss	8,648 48	
		492,346 03
Leaving a surplus for the year of		$115,287 36
Add surplus from previous years		539,874 51
Balance of net earnings D. & M. R. R.		50,038 70
Total, as in Balance Sheet		$705,200 57

The operating expenses have been 53.53 per cent. of gross earnings. Number of passengers carried, 700,110. Number of tons of freight moved, 551,936. Number of miles run by trains earning revenue, 588,266. Earnings per mile of do., $2 22.27; expenses, $1 18.98. Income per mile of road, $21,793 26; expenses, $11,666 03. The President in his report says:

During the past year, two dividends of four per cent. each have been paid to the stockholders. The net earnings of this company shows a fraction over 11¼ per cent. on the capital stock, which with the balance of net earnings of the Dayton and Michigan Railroad of $50,038 70 shows a net surplus of $165,326 06, or nearly 12¼ per cent.; this amount, with other assets of the company, has been expended in permanent improvements, principally on the Dayton and Michigan and Cincinnati, Richmond and Chicago Railroads, to meet the increasing demands of business, including new grain warehouse and elevator at Toledo, new equipment, &c., which will be found fully set forth in the detailed report of the treasurer.

During the year 602 tons of steel, 265 tons new iron, and 509tons re-rolled iron rails have been laid in the track. We have now over 16 miles of steel rail in use, which has thus far proved satisfactory.

We contracted last fall for the delivery of 750 tons steel rails for The Cincinnati, Hamilton and Dayton Railroad, and 1,000 tons iron rails for The Dayton and Michigan Railroad, to be delivered between this and the first of November.

New side tracks have been laid during the year at the following places, viz: Glendale, 1,700 feet long, with rails for both gauges; new track at Hamilton for use of Niles' Tool Works, 1,168 feet long, with trestle over the Hydraulic; changed the location of track to Campbell's ice-house north of Hamilton, at considerable expense, lengthening it 612 feet, and laying broad gauge track on same 560 feet; side tracks have also been constructed at Carlisle and Lockland, to hold some twelve cars each.

Bridge No. 4, Trotting Park, two spans of 119 feet each double track, was taken down and a new one substituted; over-head bridge at Carthage rebuilt; No. 6, Pike bridge, north of Carthage, 60 feet span, single track, rebuilt.

A new freight house at Lockland, 60 by 20 feet; new transfer house at Hamilton 350 by 18 feet; new grain house at Poast Town, 60 by 25 feet, have been erected.

Six coal-burning locomotives have been added to our equipment the past year, four of which were altered in our shops from wood-burning, and two new engines from the Baldwin Locomotive Works, Philadelphia; making fifteen coal-burners, twelve of which are used on freight, and three on passenger trains. Owing to the heavy freight business done during the fall and winter, the engines have been worked to their utmost capacity.

One new passenger car has been built at our shops to replace one broken up. Our equipment has been kept in good repair, and all cars broken up have been replaced with new ones.

The lease of the land obtained from Messrs. Fosdick and L'Hommedieu, situate in Millcreek Township, and originally intended to have been used by our company for stock-yard purposes, was duly assigned, with all the privileges appertaining thereto, to The United Railroad Stock-yard Company, the latter company assuming, on and after July 1st, 1872, the rents, payments, conditions, covenants and agreements, in said original indenture to this company.

Contracts have been entered into with the Cincinnati and Baltimore Railroad Company, providing for crossings of the track of this company near Millcreek, and with the Cincinnati and Springfield Railway Company, for crossing our track in Dayton, and the use of the joint tracks through that city which will be laid before the stockholders.

The board of directors thought it advisable to reduce the local passenger fares between Cincinnati and Dayton and intermediate points, which was done to the extent of about 19 per cent., on the 1st of April last. The immediate effect of this reduction will reduce the revenue, but it is presumed will soon induce such additional travel as to materially increase the future receipts of the road.

The board of directors of the Dayton and Michigan Railroad Company on the 21st of December, 1870, in pursuance of a provision in the modified lease of June 23d, 1870, providing for the redemption of the outstanding mortgage bonds of that company, resolved to issue an eight per cent. preferred stock to the amount of $3,700,000, with dividends on same payable quarterly, to be guaranteed by the Cincinnati, Hamilton and Dayton Railroad Company; and at a meeting of the stockholders of the latter company, held on the 15th of February, 1871, resolutions were adopted duly ratifying the same.

There has been laid in the track of the Dayton and Michigan Railroad during the year, 1,290 tons of new iron, and 126¼ tons re-rolled iron. The track and bridges have been kept in good repair.

During the year, a new passenger station house, 80 by 22 feet, has been erected at Wapakoneta, with the necessary platforms and outbuildings, at a cost of $4,087 65.

At Toledo, an elevator and grain house, with brick engine house adjoining, are in course of construction, and will be completed and ready for business by the 20th inst. The dimensions of the grain house are 65 by 100 feet, and 99½ feet in height above the floor, and is estimated to hold 250,000 bushels of grain. The engine house will be 32 by 30 feet, and one story high. The estimated cost of the whole, including all machinery, ready for use, is $55,000, on which there has been already paid the sum of $46,258 17.

Considerable additional expense has been incurred at Toledo by new plank walks on Ottawa street, moving shop and engine house, and building new turn table.

There has been constructed at the company's shops at Lima the past year, 193 cars, as follows: for Dayton and Michigan Railroad, 50 new box freight cars, at a cost of $35,000, which has been charged to the equipment account of that company; also, 2 new caboose cars, 2 new sleeping cars for use of wood train employes, 23 new box cars, to replace those worn out in the service, all of which have been charged to running expenses. For the Cincinnati, Richmond and Chicago Railroad Company, 50 new box and 50 new platform cars, at a cost of $94,000, which have been charged to the equipment account of that Company; also, 15 new box and one platform car for the latter company, to replace those destroyed, which have been charged to running expenses.

On the 18th of January, 1872, a contract and lease was entered into between the Cincinnati, Hamilton and Dayton Railroad Company and the Lake Shore and Michigan Southern Railroad Company, whereby the Dayton and Michigan Railroad Company secures forever the right to the use of the bridge and the approaches thereto, and such other rights as they have heretofore enjoyed, under certain agreements, deeds and contracts, on the middle grounds, passenger house and other property of the Lake Shore and Michigan Southern Railway Company.

To meet the increasing demand at Toledo for more room in the handling of lumber and other heavy freights, and also to provide for right of way for new bridge, &c, arrangements have been partially consummated for the purchase of additional grounds on the east side of the Maumee river, on which we find considerable dockage front now ready for use.

The receipts of the Cincinnati, Richmond and Chicago Railroad for the past year, show a handsome increase over those of former years.

The Cincinnati, Richmond and Fort Wayne Railroad, running from Richmond to Fort Wayne, Ind., a distance of some 92 miles, was about the 1st of January, this year, although not then completed, delivered by the contractors to the Grand Rapids and Indiana Railroad Company, Lessee of the same under the terms and conditions of a certain contract and lease dated June 1st, 1871, and to which our company is a party.

This line of road, when in full working condition with that of the Grand Rapids and Indiana Road, must necessarily prove a valuable feeder to our line between Cincinnati and Richmond.

There have been laid in the track of the Cincinnati, Richmond and Chicago Railroad the past year, 612¼ tons re rolled iron.

Three new bridges have been built, as follows: Bridge No 5, 98 feet span, between Collinsville and Somerville; Bridge No. 12, 102 feet span, between Somerville and Camden; Bridge No. 20, 110 feet span, between Eaton and New Hope; besides repairing bridges Nos. 7, 8, 17 and 18. New platforms at Seven Mile, Collinsville and Somerville. New water station at New Hope.

Our companies, during the extended drought of last fall and winter, sustained several severe losses by fire on the line of the Dayton and Michigan Road, having had some 6,857½ cords of wood consumed, at a cost to the company of 14,508, besides a large amount of fencing, all of which has been charged to operating expenses; aside from these unavoidable casualties, your roads have been operated with their usual regularity and freedom from accident.

In conclusion, the board desire to express their satisfaction with the manner in which the business entrusted to the officers and employes of the several companies has been performed, as much of the present prosperity, and hopeful prospects for the future of these companies, depends on the judicious management, integrity, and capacity of their employes.

The income from operations of the Dayton and Michigan Railroad during the year was $1,101,612 16; and the expenses, $1,034,724 91—leaving a balance of $66,887 25; out of which a dividend on the common stock, amounting to $16,848 55, was paid—leaving a balance of $50,038 70; which, with the additional amount of $120,70 902, was expended by the lessors for permanent improvements, sinking fund, etc., making the total amount due C., H. and D. R. R. Co., $265,172 71, against $94,424 99, at the close of the previous year—an increase of $170,747 72.

The income from operations of the Cincinnati, Richmond and Chicago Railroad during the year was $211,454 52; and the expenses, $212,719 02—making the amount to debit C., R. and C. R. R. Co., $1 264 50; to which add amount due lessors at the close of the previous year, $17,369 10; and amount paid for new cars, $64,100—making the total amount due C., H. and D. R. R. Co., March 31, 1872, $82,733 60, an increased compared with the previous year, of $65,364 50.

Assistant Sup't.—LEWIS WILLIAMS.

Secretary and Treasurer.—FREDERICK H. SHORT.

The Virginia Debt.

A correspondent of the Baltimore *Sun* writing from Richmond under date July 26, 1872, says:

The Supreme Court of Appeals, after a long session at Abingdon, has adjourned without giving any decision in the public debt case, which last winter agitated the public mind to such a great extent, and created such consternation and dismay among our bondholders. It is now believed that no conclusion will be arrived at for years to come, and so, for the present, one-third of the debt is repudiated, and four per cent. interest only is paid on the remaining two-thirds. By reference to the quotations of the Baltimore stock market, it will be seen that for four months past there has been a steady decline in "West Virginia certificates," which are the bonds issued by this State to represent West Virginia's portion of the public debt. Bondholders are now collecting the pittance of interest doled out to them, thinking, no doubt, that it is better to have "a bird in hand, than two in the bush."

☞ The work of grading the Providence and Springfield Railroad is being pushed with much vigor along the line. About one-third of the grading is already completed. The entire line will doubtless be ready for the iron early in the spring.

Extension of the Nrroaw-Gauge in Norway.

While the question of narrow-gauge is being argued so hotly in the States—we find that in Norway—the birthplace of narrow-gauge—a considerable extension of lines has been authorized, and will be at once commenced. At present there is a total mileage in that country of 305 miles, of which 113 miles are 4 ft. 8½ in., and 192 miles are 3 ft. 6 in. gauge.

One of these lines, the Hamar-Elverum, which last year was extended as far north as Aamodt, is about to be continued 195 miles, as far north as Storen, where it will meet the Storen-Throndhjeim R., already constructed. This new line will pass through the valley of Osterdalen, and will cross the Doorefieid, at the copper mines of Roros, where the level will be 2,100 ft. above the sea. The ascent from this place from Aamodt is gradnal, and with good gradients, none being over 1 in 90, but after crossing the summit of the Doorfield, the descent towards Storen is very rapid and precipitous, involving great difficulties in construction, partly on account of the serious impediments which the snow offers, and partly from the natural contour of the country. To give an idea of the nature of the works, we may state that the valley of Guldalen, 1,200 ft. below the summit, has to be reached by a continual descent along the side of the mountain for a distance of 14 to 15 miles, involving gradients of 1 in 54 or 1 in 60, with many bridges across the streams, and several short tunnels. At the Hesja gorge, a bridge 200 ft. span and 180 ft. high, will be required. The cost of these 195 miles will be £570,000, or $2,920 per mile! The works for 130 miles beyond the point of junction at Aamodt, are comparatively very easy—easy, that is to say, for Norway, and for this length the cost is £2,319 per mile. Beyond, for the remaining 65 miles, on the Throndhjeim side of the summ't, the nature of the country and the difficulties just mentioned, will raise the outlay to £4,019 a mile. This amount includes, in both cases, all expenses for rolling stock, stations, telegraphs, engineering, etc., and the price of rails is taken at £10 10s per ton.

Besides this Aamodt-Storen line, about to be undertaken, there remains a short length to complete the through railway communication between Christiania and Throndhjeim. From the former place, two 4 ft. 8½ in. lines branch off to the northeast, one running to Kongsvinger, and the other to Ejdsoold. Between both of these places and the Hamer-Amodt line there is a break of about 50 miles, and the sanction of Parliament has yet to be obtained for constructing a railway over this distance. According to the route selected, either by way of Ejdsoold in extension of the Mjosen line, or from Kongsvinger line, the length of the railway between Christiana and Throndhjeim will be 331 or 363 miles, of which 289 or 301 miles, respectively will be of 3 ft. 6 in. gauge, and the remainder, already existing, are of the oid 4 ft. 8½ in. gauge, commenced under English auspices, and extended afterwards by Mr. Pihl.

The Norwegian Parliament has also sanctioned so much of a Main West and East Transverse Line, of 3 ft. 6 in. gauge, from the North Sea to the Baltic, as lies within its jurisdiction. This line will form an extension of the Throndhjeim-Storen R., and will terminate at Sundswall on the Baltic. The total length will be 295 miles, of which 63 miles will be in Norway, the remainder being in Sweden, where 3 ft. 6 in. has been fixed as the gauge of the country, by the Swedish Government, for all lines north of the Gefli Falun R. When this work is completed, there will be a continuous length of 577 or 596 miles of 3 ft. 6 in. gauge railway from Sundswall and Throndhjeim, and to the junction either with the Mjosen or the Kongsvinger 4 ft. 8½ in. railway. The Norwegian portion of this transverse line will cost £4,063 a mile.

This statement shows with what success Mr. Carl Pihl has prosecuted the reform which he was the first to introduce upon main lines of railway, and the success which has attended his efforts has encouraged, as we have seen, the neighboring country of Sweden to follow in his steps.

By the adoption of narrow-gauge alone, he has been able to give to Norway a railway system; for had he not departed from the beaten track, the cost of construction would have entirely prevented the formation of any but a few short lines, between the most important centers, and the rest of the country must have remained without means of communication, except the rude ones afforded by horse transit over the common roads. It is quite needless to point out that there are scores of countries in precisely the same condition as Norway, lacking the means to build broad-gauge lines, yet able to adopt the cheaper and thoroughly efficient system Mr. Pihl has perfected. It is idle on the part of narrow-gauge opponents to argue against this fact—what is suitable for one country is equally suitable where the same conditions rule—poverty, scanty traffic, and scattered centers.

The prices per mile of the new line snow being commenced in Norway bear out conclusively what we have ourselves from time to time advanced as to the saving to be obtained upon a narrow-gauge railroad properly constructed, and form an additional proof that Mr. Pihl spoke within limits with reference to the comparative cost of making and working narrow-gauge lines, when on a public occasion in Toronto, he said :—"I am often asked the exact difference between the cost of a railway on a gauge of 3 ft. 6 in. and one of 4 ft. 8½ in. It is difficult to make definite comparison, as every railway is different. I believe, however, that it may be stated generally that the narrower gauge can be built for one third less. In working I can give a better test, by supposing a mixed train with three passenger coaches with places for 96 passengers, but containing only sixty passengers, and fourteen goods wagons on a line with a ruling gradient of 1 in 100. In Norway the narrow-gauge passenger coaches weigh 4.1 tons; good wagons 3.3 tons; locomotives 16 tons. Estimating each passenger at 140 lbs., and the load of freight at 70 tons, there is in all 148½ tons. On the 4 ft. 8½ in. gauge the three passenger coaches weigh 6.4 tons each, and freight cars 4.3 tons, and engine 20 tons; adding the same amount of freight and passengers, the sum is 173½ tons, or 18 per cent. saved in locomotive power on the narrow-gauge."—*London Engineering.*

Mobile and Alabama Grand Trunk Railroad.

The Second Annual Meeting of the Stockholders of this Company was held in Mobile on the 16th of May, at which the Reports of the President and Chief Engineer were presented and adopted. An election was also held for Directors of the company, which resulted in the choice of the following gentlemen: Francis B. Clark, M. Temple Taylor, Rob't W. Smith, James Crawford, John Reid, Jr., Cary W. Butt, Thomas St. John, Samuel G. Battle, M. Waring. Directors appointed by the Governor of Alabama under the State aid law: Bush Jones, of Uniontown; John Howze, of Marion. President, Francis B. Clark; Vice-President, M. Temple Taylor; Secretary and Treasurer, E. M. Underhill.

PRESIDENT'S REPORT.

OFFICE M. AND A. G. T. R. R. Co.,
MOBILE, ALABAMA, May 13, 1872.

To the Stockholders:

The last Report submitted to the Stockholders brought the history of the company's operations to July 1, 1871, consequently this Report will only embrace the transactions of ten months to the first day of May, 1872.

At the date of last Report twenty miles of your road had been completed, received by the Commissioners, and the State endorsement made upon its first mortgage bonds to the amount of $320,000. A regular accommodation train for freight and passengers was placed on the completed road, and has been running on a regular schedule daily, Sundays excepted, since June 19, 1871.

Work was begun the same month on thirty-six and one-fifth miles additional, extending to the Bigbee River crossing; but owing to the failure of the parties engaged in this construction, much delay has been experienced, involving new arrangements and expenditures. The second inspection of ten completed miles did not take place until February 7, 1872, and a third inspection on May 6, 1872, of ten additional miles, upon which State endorsements was received May 10 1872, making forty miles of road, and an aggregate endorsement of $640,000. Of this 320,000 have been endorsed since last Annual Report.

No additional bonds have been received from the city, but upon the completion of the next section of ten miles, now in rapid progress, the company will become entitled to a further instalment of $250,000.

Contracts for rails and fastenings were made during the summer of 1871, upon favorable terms. These rails are now in Mobile, in quantity sufficient for layin gtrack to the river. The work is being pushed with energy, and it is expected that the road will be in operation to the river bank, opposite Jackson, by the first of August next.

Work was commenced on the bridge foundations of the Bigbee River crossing in August, 1871, and a large amount of material accumulated at Jackson for piers and abutments. Abont $20,000 had been expended when the annual rise in the river suspended further operations.

The depression of Alabama securities, in consequence of the A. and C. R. R. default, has continued to a greater or less degree through the year, and we have been unable to place these securities at the minimum of ninety per cent., established by law. Hence the work of construction has proceeded slowly and cautiously, and we can only show an extension of twenty miles completed since last Report.

The passage of a Sinking Fund bill by the *late* Legislature, and the probability that another bill which failed at the close of the last session will be enacted into a law by the next Legislature—by which the contingent State liabilities will be reduced nearly sixteen million dollars—has checked the downward tendency of State credit, and evidences of a marked improvement are manifest.

* * * * * *

Arrangements have been recently effected for the construction of that portion of your line extending from the river at Jackson, to an intersection with the Selma and New Orleans Railroad, a distance of about forty-seven miles, to be completed, in running order, by May 1, 1873. The Selma and New Orleans Railroad Company are now preparing to complete the unfinished sections of their road, required to reach the point of connection, and we have ample assurances that they will have their portion of the work ready by that time.

You will readily perceive how greatly these arrangements have changed the complexion of your affairs. Instead of the merely local road, which it now is, penetrating into the piney woods, and dependent wholly upon neighborhood traffic, the Grand Trunk Road will become, within the next twelve months, an important part of a great thoroughfare between New York and New Orleans, and thirty-six miles shorter than any existing route between the two cities. This will ensure the transportation of the great Mails over this line, and make it the most inviting route for the long travel. You will also be placed in near communication with the enterprising and flourishing city of Selma, and the local business of three hundred miles of well developed country will find its outlet to the seaboard over your road. From the date of this connection, the resources and capabilities of the Grand Trunk Road will be demonstrated to the conviction of the most sceptical. That it will earn the interest upon its bonds, and be a self sustaining road at that point, is beyond reasonable question. That it will do more than this we hope and believe. The Stockholders

have now every incentive to sustain and strengthen the hands of their Directors by their hearty co-operation in renewed efforts for further progress.

The Receipts and Expenditures of the Company to May 1, 1872, have been as follows:

Receipts:

From capital stock	$300,000 00
" proceeds bonds sold	396,778 96
" bills payable	353,968 51
" loans	162,925 00
" transportation department	1,933 78
" other sources	3,479 09
	$1,219,080 34

Expenditures:

For real estate	$3,421 50	
" engineering, surveys, etc	74,722 58	
" interest	38,707 65	
" expenses, general	101,526 89	
" exchange	206 40	
" construction	995,864 80	
		1,214,503 90
Cash on hand, May 1, 1872		$4,576 44

The earnings of the Transportation Department have been as follows, from June 19, 1871, to May 1, 1872:

From passengers	$7,855 42
" freights	5,157 09
" mail	75 00
Total	$13,087 51

In addition to which, company freight has been transported for construction to the amount of $3,914 95; the expenses for transportation have been for same period—

For maintenance of way	$4,799 74
" machinery department	3,403 88
" conducting transportation	2,044 22
Total	$10,247 84

Leaving a balance of earnings from public traffic, over expenses of operating the road, to May 1, 1872, of $2,839 67; the whole number of passengers transported over the road to May 1, 1872, was—

By up-trains	4,058½
By down-trains	5,039½
Total, both directions	9,098

Equal to 160,020 passengers carried one mile.

The average distance travelled by each passenger equals—

By up-trains..16½ m. By down-trains..18 2-5 m.

The business has been done upon twenty miles, operated from June 19, 1871, to February 20, 1872; and thirty miles from that date to May 1, 1872, and is more favorable than was anticipated when the road was opened.

A brief communication from Col. Rivers, Chief Engineer, accompanies this Report, and the attention of the stockholders is earnestly directed to the statement of Col. Rivers, in reference to resuming work at the Tombigbee River. It is important that the foundations shall be commenced for the bridge as early in the season as the stage of water will permit, and be completed so far that no delay may be experienced at that point in perfecting the through connection with Selma.

It will also become necessary, in view of that connection, to make preparations for extending the track into our Depot Grounds during the coming fall and winter, and to provide accommodations for despatching satisfactorily the business that will certainly flow over the road, from the moment the Selma connection is made complete.

In conclusion, the Directors congratulate you upon the fact that the circumstances now surrounding your great enterprise are more encouraging than ever heretofore. It is awakening a more general interest in the public mind, and a growing appreciation of its great importance, both to the city of Mobile, and to the State of Alabama, is everywhere apparent. The time is not distant when your securities will be estimated at their true value, and can be readily converted. If the plans of progress now being carried out are not checked by any untoward event, not now foreseen, the next Annual Meeting of Stockholders will assemble to represent a line of railway ranking second to none in the South, whether in the extent of its business, its profitable results, or its value to the country at large.

Respectfully submitted.

FRANCIS B. CLARK, *President.*

REPORT OF THE CHIEF ENGINEER.

OFFICE CHIEF ENGINEER,
MOBILE, ALABAMA, May, 14, 1872.

F. B. Clark, Esq., Pres't:

Sir—I have the honor to submit a brief summary of the operations of the Engineering Department during the past year:

A carefully revised and very satisfactory location has been carried through to Birmingham, which has been adopted, with slight modifications, indicated in dotted lines on the accompanying map—changes which can be readily introduced in the line on the eve of construction. This work was completed by the close of December, 1871, and soon thereafter a full set of notes, maps, profiles and estimates were prepared. These last are herewith respectfully submitted.

You will observe, on a careful inspection of them, that I have deemed it probable that, beyond and north of Marion, there would be an increase of ten feet to the mile of the southward maximum grade, making it thus equal to the northward maximum grade already adopted for the whole line. Two considerations have produced this impression. First, economy in construction; secondly the fact that south of Marion the business of the road will receive large additions from the fertile character of the country traversed, and also from the several railroads it intersects. Should, however, the financial resources of the Company, on reaching Marion, admit of retaining the diminished southward grade beyond that point, a sound policy may indicate the adoption of such a course.

The Engineering Corps, in consequence of the completion of the surveys, has been reduced to the smallest dimensions consistent with a satisfactory supervision of the work now under construction.

* * * * * *

There is daily accumulating evidence of the probability that the season of low water in the Tombigbee River will be reached at an unusually early period this year, and, in consequence, it is most urgently recommended that immediate steps be taken to resume operations at the bridge.

Attention is also respectfully called to the importance of constructing a separate line into Mobile, as indispensably necessary at a comparatively early period, not only for the satisfactory transaction of business, but also for the prompt movement of trains.

In conclusion, it gives me sincere pleasure to state that disinterested and competent experts have cordially expressed themselves in most flattering terms in regard to the favorable characteristics and thorough construction of the forty miles of completed road.

Very respectfully, your obedient servant,

A. L. RIVES, *Chief Engineer.*

☞ Work on the Virginia Valley Railroad between Harrisonburg and Staunton is progressing very slowly. Several sections are under contract, but work has been commenced on only two, at North river and Middle river. The annual meeting of the stockholders will be held in Staunton on the 6th of August.

☞ The Kilbourn City *Mirror* reports that far more than half the grading of the Madison and Portage extension to Grand Rapids, between Portage and Friendship, is done.

THE INDIANA AND ILLINOIS CENTRAL RAILWAY COMPANY'S

First Mortgage 7 Per Cent. SINKING FUND GOLD BONDS,

FREE OF GOVERNMENT TAX.

An East and West Air Line of 152 *Miles, Indianapolis, Ind., to Decatur, Ill.*

This road passes through a belt of the best settled and richest agricultural and mineral country of Indiana and Illinois, averaging thirty miles in width, with no other East and West Railway built or projected through it. It crosses, in Parke and Vermillion counties, the rich

BLOCK COAL FIELD

of Indiana, which alone will supply an ample business.

Thirty miles through Douglas County, Ill., just completed, opened and paid for.

Whole Western Division, Montezuma to Decatur, 85 miles; to be finished in 1872. Grading nearly done and materials (except iron) already procured; Bridge over Wabash ready for superstructure.

Eastern Division, 67 miles, partly graded and to be finished in 1873.

$1,300,000 in cash already expended on the road, and $1,500,000 remaining to be called from 20 subscribers, among whom are W. H. Guion, Sidney Dillon, Jay Cooke & Co., Clark Dodge & Co., J. Seligman, Vibbard, Foote & Co., and Paul S. Forbes, of New York; Benj. E. Bates of Boston, Henry Lewis of Philadelphia, and G. M. Pullman of Chicago.

Besides its right of way, the Company owns 32,000 acres of land, chiefly in Indiana, of which 2,000 acres are the best BLOCK COAL LANDS. It has also SUBSCRIPTIONS IN BONDS AND CASH from counties, towns, and individuals of $700,000.

The road connects at both termini with the most important THROUGH RAILWAY LINES of the West, and being by many miles shorter than any other line, will be indispensable to them, while its local business alone will insure good dividends on its stock.

Bonds, $1,000 each, payable to Union Trust Co., Trustee or bearer, July 1, 1901, in gold coin. Coupons, also in gold, payable Jan. 1 and July 1, in New York, or at Union Bank of London, at fixed exchange of £7 sterling.

SINKING FUND of 2½ per cent. a year on gross earnings to be invested by Trustee in bonds at not exceeding par.

For sale at 90 and accrued interest by the Financial Agents of the Company.

Walker, Andrews & CO.,

14 Wall-st.

☞ The track of the Intercolonial Railway is now completed to River Philip, 26 miles beyond Amherst. Upwards of one thousand men are now at work on the line between Amherst and Truro, and it is confidently expected that the track will all have been laid by September, and the road opened for traffic in October.

☞ Twenty-five miles of the North Wisconsin road has been located beyond New Richmond, Wis.

The Orchards of the Nation.

The census gives an interesting statement of such fruits as grow in orchards under the head of "Orchard Products." The great increase in production is remarkable, as will be seen by the following comparison of the aggregate of the years 1850, 1860 and 1870:

In 1850 the total valuation was $7,723,186
In 1860 the total valuation was 19,991,885
In 1870 the total valuation was 48,335,189

The crops included in this estimate are apples, peaches, pears and a few minor fruits, excluding grapes, berries, currants, oranges, melons, etc. The enormous increase above set forth is chiefly in apples and peaches, while in the crops not enumerated in the list the increase has likewise been great. In 1850 the State of New York was the only one that made a specialty of orchard products, her crop then being valued at $1,761,950. The wonderful increase in twenty years, as likewise the advance made in this culture by other States, is shown by the following table.

	1850.	1860.	1870.
New York.....	$1,761,950	$3,726,380	$8,347,414
Pennsylvania...	723,379	1,479,937	4,208,094
Ohio.....	695,921	1,929,309	5,843,979
New Jersey.....	607,268	429,402	1,295,282
Massachusetts..	463,995	925,310	939,854
Illinois	446,049	1,126,323	3,561,789
Missouri.....	514,711	810,975	2,858,086
Indiana.....	324,240	1,258,942	2,858,086
Vermont.....	415,155	211,693	682,241
New Hampshire.	248,563	557,934	743,552
Maryland.....	164,051	252,196	1,318,405
Kentucky.....	106,250	604,849	1,231,385
Delaware	46,574	114,225	1,226,898
California.....	17,700	754,236	1,384,480

New York, Pennsylvania and Ohio head the list of the States in the production of fruit, the actual increase being greatest in New York, whose product in 1870 was nearly double that of Pennsylvania; but the ratio of increase was greatest in Ohio and Pennsylvania. New Jersey, whose products in 1850 were valued at $88,663 less than Ohio, decreased nearly one-third of that amount in 1860, while Ohio more than doubled the estimate of 1850, showing Ohio progressed far more rapidly. The ratio of increase in California in the last decade was not equal to that of Pennsylvania, though it shows a remarkable advance during the past twenty years.

☞ The Northern Pacific Railroad Company has just closed a contract with the Baldwin Locomotive Works, Philadelphia, for fifty first-class locomotives, which will be added to forty eight already purchased, principally from the same works. This road has also purchased fifty thousand tons of railroad iron from Pennsylvania manufacturers, besides an immense quantity of spikes, frogs, switches, cars, chairs, &c., the outlay of which, in Pennsylvania alone, during the last eighteen months, has been upward of $5,000,000.

☞ At the annual meeting of the European and North American Railway Company in Bango, Me., on the 28d ult., the following were elected: Geo. K. Jewett, President; Noah Woods, Secretary-Treasurer; Geo. K. Jewett, Gideon Mayo, Samuel F. Hersey, Arad Thompson, William Flowers, Chas. P. Stetson, Noah Woods, M. S. Drummond and James Emery, Directors.

☞ The Delaware and Hudson Canal Company have closed a contract with George T. Harris & Co., for the grading, masonry, bridging, and fencing of thirty-eight miles of the New York and Canada Railroad, extending from Whitehall to Port Henry along the west shore of Lake Champlain, the work to be completed by the first of November, 1873.

Baltimore and Ohio Railroad Extension.

The new survey of the Baltimore and Ohio Railroad extension, from Pittsburg to Chicago, has now been brought up to within twelve miles of Chicago, to a point just south of South Chicago, From this point it has been determined to survey at least three routes into the city, viz: One running west of Calumet lake, and thence north on a line through or near Cornell Station; another diverging more to the west, and running through or near Englewood, and a third through South Chicago, and along the lake shore, to a connection with the Illinois Central somewhere just north of Cornell. It is, of course, not known yet which of the routes can be most advantageously secured; but when one of them is secured, which will be in a month or two at furthest, work on the line from Chicago eastward will begin at once. The intention is to have the whole line completed through from Chicago to Pittsburg in about eighteen months from the present time. This new trunk line to the East will be about thirty miles shorter than the Michigan Southern from Chicago to Monroeville, Ohio, to which point both roads run and will be about twelve miles shorter than the Pittsburg and Fort Wayne to Mansfield, which is also a point of junction with that road. The grades on the new road will be very light, the highest between Chicago and Pittsburg being but twelve feet to the mile.

☞ We learn from the Owensboro *Monitor* that track laying on the Owensboro and Russellville railroad is progressing very well. The train will reach South Carrolton by the 15th, or sooner. Then they will soon reach the crossing of the Elizabethtown and Paducah road three miles distant. At South Carrolton the company have up the frame work of a splendid depot, which can soon be completed after construction train arrives. The grading on this road, south of the crossing of the Elizabethtown and Paducah road, is moving steadily on, not only through Muhlenburg, but across Logan county to the State line. It is expected that track laying on this part of the road will begin by early spring, if not sooner.

☞ The London *Times* says that the Fell centre-rail engine, intended for Brazil, to work inclines of 1 in 12 on the Cantogallo railway, after being tested for several weeks on the old Whitby incline in Goathland, has been reloaded on the Northeastern 30-ton truck, and removed in charge of Mr. Laws, Northeastern superintendent at Whitby, and of the makers, Messrs. Manning, Wardell & Co., Leeds. The experiments have been a wonderful success, the engine, with load attached, having worked curves of 1 in 10½ gradient.

☞ The Milwaukee *Wisconsin* says that iron has been purchased for thirty miles more of the Green Bay and Lake Pepin Railway. It will be remembered that the intention of the company, heretofore announced, was to build 75 or 80 miles of the road westward from New London this year. They will now, instead, build 110 miles, connecting with the West Wisconsin Railroad, and consequently with La Crosse and St. Paul. The western terminus of the road next winter will be within 50 miles of the Mississippi river.

☞ The Paducah *Kentuckian* says that the Elizabethtown and Paducah railroad bridge across Tennessee river will be finished certainly by the 15th of August, and possibly trains may cross it by the 10th inst. All the material is now on the spot, a large force is at work at each end of the bridge, and there is nothing apparent to hinder its early completion. The approaches to the bridge on both sides of the river are in place, with the track laid down; three out of the seven main spans are completed, and the iron structure of two more is being put up very fast, while the false timbers for the draw, which embraces two spans, are partially erected.

☞ At a recent meeting of the directors of the Philipsburg, Farnham and Yamaska Railway Company, in Montreal, at which Mr. J. Bourgeois presided, important financial arrangements were concluded, and a most favorable report of the progress of the survey of the line was received from the company's engineer. As this is the first railway in the Province of Quebec that has adopted the narrow gauge, three feet, we watch the progress with interest. The engineer gave it as his opinion that the survey of the line would be completed in the month of September.

☞ The first car load of ore from Colorado to the Royal German Works, Freiberg, was shipped last week from Georgetown, Colorado, by Mr. W. W. Glenn, of this city, through Messrs. Jay Cooke & Co., New York. It assayed 400 ounces silver to the ton of 2,000 pounds, and the total value was $5,600 coin. Two more shipments are nearly ready. It is confidently anticipated that Freiberg will prove a more profitable market to high grade ores than Swansea, Wales.

☞ George H. Sharpe, President of the New York, Kingston and Syracuse Railroad Company, publishes a card in another column in reference to the alleged failure to meet the interest on the first mortgage bonds of the Rondout and Oswego Railroad Company. All interest or coupons due on the debt of that Company will be paid on presentation at the office of Mr. Sharpe, No. 18 William-st.

☞ The Delaware and Hudson Canal Company have leased the new Schenectady and Susquehanna Railroad for a long term of years. By the terms of the lease the former Company are to furnish the rolling stock and locomotive power and control and operate the road, paying the latter company forty per cent. of the gross earnings of the road.

☞ The grading upon the Chicago, Milwaukee and St. Paul Railroad is nearly completed, and the Company fully expect to have the road in running order by the 1st of November next. The line will be laid with steel rails the entire distance of eighty-three miles, and is to enter Chicago about half a mile nearer the business center of the city than the present road.

☞ The town and village of Jefferson, Wis., has voted fifty thousand dollars in aid of the Chicago and Northern Pacific Air Line Railroad. This company promises to have their road in operation from the Illinois state line to Jefferson, Wis., within ninety days.

American Railroad Journal.

Saturday, August 3, 1872.

Stock Exchange and Money Market.

Money has been in rather more urgent request, chiefly for speculative use, and toward the close, rates were quoted rather firmer, though yet low, ranging from 2½@4½, generally 3@4 per cent. on call, and 5½@7 per cent. per annum in the discount form. At the ruling figures the wants of responsible borrowers have been quite promptly met. Private lenders have been liberal of aid. The city banks have been more conservative in their movements. The Government office has augmented both its coin and currency balances, the latter having been enlarged by the addition of more than a million of dollars. The office received during the week $3,520,824 of currency, and $4,186,311 of gold, the latter including $1,929,000 from customs; and disbursed $2,392,401 of currency, and $3,881,903 of gold, the latter embracing $1,152,245 of coin interest.

The U. S. Sub-Treasury office last week added to its coin balance about ⅜ths of a million and enlarged its currency 1⅛ millions. The city banks reduced their loan and discount average about 2⅛ millions during the week, and contracted their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $9,547,024, and a coin reserve of $40,461,303.

The city banks, in their latest return, show an increase of $856,300 of legal tender notes, with a loss of $1,073,100 of specie, and of $2,488,600 of deposits, also a reduction of $2,077,600 in their loan and discount averages, and of $26,000 in their item of circulation. The city bank exchanges, last week, averaged 72⅝, and thus far, this week, about 79 millions daily. The banks now hold $14,147,425 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $28,498,700, against $16,983,739 same time last year. The city bank deposits are now $245,062,700 against $257,018,004, week ending July 29, 1871. The legal tender reserve amounts to $53,571,900, against $73,963,430 same time last year. The circulation now stands at $27,350,000 against $30,360,125 same time last year. The loans are now $295,136,900 against $300,052,285 at this date last year.

The coin reserve of the city banks is now about 28½ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 53¾ millions against $46,616,000 on the statement of February 10th.

Government revenues have been yielding more liberally, since our last. The excises yielded within the week about 8½ millions, and thus far in the current fiscal year beginning with July 1, 1872, $13,370,747. The customs at the port of New York last week were $1,710,669; at the outports, equal to about $570,000 all in coin, or coin certificates.

Under the Treasury programme for August, Government proposes to sell at least seven millions of gold as follows: Thursday, August 1, $1,000,000; Thursday, August 8, $2,000,000; Thursday, August 15, $1,000,000; Thursday, August 22, $2,000,000; Thursday, August 29, $1,000,000. And to buy in six millions of Five-Twenties, as follows: Wednesday, August 7, $2,000,000; Wednesday, August 14, $1,000,000; Wednesday, August 21, $2,000,000; Wednesday, August 28, $1,000,000.

The Treasury Department on Wednesday controlled a coin reserve of $69,100,000 of which $31,900,000 were represented by outstanding coin certificates and a currency balance of $18,333,000.

There has been renewed vigor in the Gold speculation, with an upward tendency in the price, influenced in part by the anticipation of heavy drafts on the floating supply during the month of August, for both custom house purposes, and for shipment in adjustment of adverse trade balances. The week's exports have been up to 4⅜ millions. The customs draw has been temporarily light, pending the carrying into effect on the 1st of August, of the revised tariff, but a livelier inquiry is looked for presently from this source.

On Wednesday, the specie exports were $803,672.

The range of the price during the week has been from 114⅜@115¼ and the closing quotation on Wednesday was 115⅛@115¼ against 114⅝ the preceding Wednesday. The specie outflow last week, was $4,876,713. The Gold Exchange

Bank clearances have averaged about 81¾ millions per day during the week.

The customs demand for Gold last week, averaged $321,500 a day; thus far, this week, it has averaged $303,000 a day, or equal to a weekly aggregate of $1,818,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $3,017 and since Jan. 1, 1872, $2,739,869 against $3,848,306 same time in 1871 The total customs revenue of the Government, in coin, at this port, since January 1, has been $83,080,584 against $88,147,685 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $52,972,890, against $58,977,509 during the same time in 1871.

The export drain of specie was $4,376,713 last week, against $1,053,584 same week preceding year. The shipments since January 1, 1872, have been $53,162,750 against $50,937,341 during the same portion of 1871.

Foreign Exchange has been comparatively quiet, and toward the close rather easier in price. Bankers' sixty day bills on London closed on Wednesday at 109⅜@109⅝; sight bills on London, 110¼@110½.

Government securities have been attracting more attention, particularly from investment buyers, and prices have been on the advance, favored by the limited offerings of bonds, and the buoyancy in Gold.

On Wednesday, Government bought in a million of Five-Twenties at 114 38@144 75 out of an aggregate offering of $4,311,100.

U. S. sixes of 1881 at the close on Wednesday of the current week were quoted at 118⅛@118¼; U. S. Five-Twenties of 1862, (other than the bonds called in) 116⅛@116¼; U. S. Five-Twenties of 1864 at 116⅛@116¼; U. S. Five-Twenties of 1865, 116⅜@116⅞; U. S. Five-Twenties of 1865 consolidated, 115¼@116⅜; U. S. Five Twenties of 1867, 116@116⅛; U. S. Five-Twenties of 1868, 116@116¼; U. S. Ten-forties at 113¼@113⅜; U. S. Fives of 1881 (Funding Loan) 113⅞@114⅛; Six per cent. currency bonds, 114¼@114½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 17.	July 24.	July 31.
Consols	92⅛	92⅛	92¾

New Fives of 1881...	89¼@⅜	89¼	89¼
Erie	42	41¼	40⅛

State bonds have been moderately sought after at variable prices. The Southern State obligations closed more steadily.

Railway Mortgage Loans have been in more demand for investment account, and the favorite of both old and new loans have been firm in price. Central Pacific Sixes have been in fair request at 102@102⅛. Chesapeake and Ohio have been of ready sale at 94 per cent. and accrued interest.

Railway and Miscellaneous share property has been quoted steadier as to values, closing with a more buoyant temper apparent in the speculative dealings.

In the way of Metals, a er business has been reported in Ingot Copper at a shade stronger prices; sales, 100,000 lbs., for prompt delivery, at 33¼c.@33½c.; 300,000 lbs., for forward delivery, on private terms; and 50,000 lbs. best selected English at 33c. per lb. Scotch Pig-iron has been held firmly on a reduced offering of stock, but has showed less animation; sales 200 tons Glengarnock at $53 50@$54; and 500 tons various brands, in lots, on private terms. American Pig-iron has been in fair demand at full rates. Iron Rails have been firm and in fairly active request, with sales reported of 2,000 tons English on private terms. Lead and Zinc dull at unchanged quotations. Of Silesian Spelter, 25 tons sold at 7c., gold per lb. Pig-tin quiet but steady, with deliveries after Aug. 1 quoted at 34½c., gold, for English, and 35c., gold, for Straits. Tin plates have been in demand and firm, with sales, for delivery after Aug. 1, of 1,000 boxes Coke at $12 25, and 500 boxes charcoal Terne, at $11 75, gold, per box.

At the auction sale of Scranton Coal on Wednesday, 100,000 tons were disposed of at the reduced range of $3 22½@3 95, against $3 25@$4, in June.

General business has been fairly active in the line of domestic produce, but, under more liberal offerings of stock, prices of Wheat, Corn, Oats, Pork and Lard have been quoted cheaper. Petroleum, and Naval Stores dearer. Middling upland cotton closed heavily on Wednesday at 21¼ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,671,952 bales, against 3,931,439 bales same time in the preceding year; exports 1,920,734 bales against 3,107,788 bales in the previous year; stock at the ports at latest dates, 118,607 bales against 163,273 bales same date 1871.

At the Live Stock Markets, Beeves continue in fair request at 9½@13 cts.; Veals at 6@9½ cts.; Sheep at 5½@7½; Lambs, 8@12 cts.; Swine, dull at 4⅜@4⅞ cts. per lb., all live weight. The week's receipts were 8,831 Beeves, 2,448 Veal Calves, 28,922 Sheep and Lambs; and 27,369 Swine..

Foreign goods have been rather more active and held with more confidence. The week's imports of foreign goods reached the amount of $8,535,341 including $3,169,419 of dry goods.

Ocean freights have been quite active and quoted firm.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ At a meeting of the stockholders of the Hartford and New Haven Railroad Company in Hartford on the 31st ult., by a nearly unanimous vote, the agreement made by the directors with the New York and New Haven Railroad Company for the consolidation of the two corporations was ratified. The agreement has now been ratified by the stockholders of both roads. The capital stock of the two roads thus consolidated is $15,500,000. The new Board of Directors will meet in New Haven August 7, for organization. The title of the consolidated roads is now the New York, New Haven and Hartford Railroad Company.

☞ The Coupons and Registered interest due August 15, on First Mortgage Eight per cent. Gold Bonds of the St. Joseph and Denver City Railroad Company, will be paid by the Farmers' Loan and Trust Company, of New York. Messrs. Tanner & Co., 11 Wall street, New York, are the agents for the sale of these bonds.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH,
No. 5 Nassau Street.

The First Mortgage Six Per Cent. Gold Bonds of the Chesapeake and Ohio Railroad Company are amply secured upon one of the most valuable and important East and West Trunk Lines of Railway in the United States, and are the obligations of a powerful and responsible corporation of the highest standing and credit.

Holders of Government Bonds and other high-priced securities may realize an important difference by an exchange for these Bonds, without question as to the equal security of their investment.

Price 94 and accrued interest.

Full information may be obtained at our office or by mail.

FISK & HATCH, Bankers.

☞ At the recent annual meeting of the stockholders of the Taunton Branch Railroad Company, at Taunton, the old Board of Directors was re-elected. The report of the Treasurer for the year ending May 31, 1872, shows that the earnings of the Company have been as follows: Passengers, $81,900 31; freight, $70,597 03; mail and rents, $2,389 66; total, $154,887. The expenses have been $115,286 70, making the net earnings $39,600 30, and leaving a surplus of $3,138 76 after paying the usual annual dividend of 8 per cent.

☞ The survey for a railway in the valley of the Nile is completed. The line is about six hundred miles in length, and commences at Wady Kalfah, near the second cataract, and terminates at Khartum; where the Blue and the White Nile unite their waters above the sixth cataract. For nearly three fourths of its length the line will be on the edge of the valley, about three fourths of a mile from the river, and above the level of the periodical inundations.

☞ The directors of the Connecticut Western Railroad have chosen Wm. H. Barnum, of Salisbury, president; George M. Bartholomew, of Hartford, vice-president; P. L. Burrall, of Hartford, secretary; and Wm. L. Gilbert, of Winsted, treasurer. The amendment to the charter, allowing the building of a branch railroad from New Britain to Collinsville, was approved by the stockholders by a vote of ten to one.

☞ About four miles of the track of the Milwaukee and Northern road are laid beyond Plymouth. It is expected that the track will be laid as far as Elkhart Lake by Saturday. A good share of the road is graded as far as Chilton. Men are at work between Chilton and Menasha.

☞ All the property of the Staten Island Railroad and Ferry Company will be sold under foreclosure on the 27th of August to satisfy claims of sufferers by the Westfield explosion.

☞ The Savannah and Memphis Railroad had completed its fortieth mile on the 1st of July.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Besides being the obligation of a wealthy corporation, composed of men of experience and high-toned commercial integrity, they are secured by a first mortgage on the road, revenues, land grant, franchise and equipments, combined in one mortgage, and are readily negotiable both in the markets of this country and Europe.

A liberal sinking fund provided in the mortgage deed must advance the price upon the closing of the loan. Principal and interest payable in GOLD. Interest at eight (8 p. c.) per cent. per annum, payable, semi-annually, free of tax Principal in thirty years. Denominations, $1,000, $500 and $100, Coupons or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

The diminished quantity of these Bonds for sale, and the increased demand absorbing them, warrant the belief they will soon be sought for at an advance considerably above the present subscription price at which they can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.

BANKERS,

NO. 11 WALL STREET.

☞ The Philadelphia *Ledger* of 29th ult., reports the net anthracite coal tonnage for the week ending on the 20th ult., from all sources, at 431,447 tons, and for the year 10,340,979 tons, against 5,766,867 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,574,112 tons. The production of bituminous coal for the week was 52,547 tons, and for the year 1,331,815 tons, against 1,201,190 tons to the corresponding time last year—an increase of 130,625 tons. The total production of all kinds of coal for the week was 485,004 tons, and for the year 11,470,379 tons, against 6,968,057 tons to corresponding time last year, showing an increase of 4,502,322 tons.

☞ Work on the Lee and Hudson railroad is said to be progressing very rapidly and the contractors need more laborers.

Journal of Railroad Law.

RAILROAD COMPANIES—DANGEROUS CROSSINGS—COMPANY LIABLE FOR INJURIES IN ABSENCE OF NEGLIGENCE OF THOSE INJURED.

The facts in the recent case of Richardson *vs.* N. Y. Cent. R. R. Co., (45 N. Y., 846,) are fully and clearly stated in the following opinion by—

PECKHAM, J.—The statutes allow railroads to cross public highways, but require the railway company "to restore the highway thus intersected to its former state, or to such state as not unnecessarily to have impaired its usefulness." (3 N. Y. S. at large, Edm. ed., 628 § 28, sub. 5.) Another provision authorizes such companies, in crossing a highway, to go under or above it, as may be expedient. Did the legislature intend by these provisions to allow a railroad company to shut up a highway and derive the people of its entire use? That would seem to be the effect of reversing this judgment, as a road is substantially closed to the public which cannot be travelled by the cautious without imminent peril of their lives.

The injury in this case occurred to the plaintiff notwithstanding the exercise of every care by him, as such is the finding, and it is well sustained by the proof.

When he arrived at a proper distance from the crossing, for that purpose, he stopped his horses, rose up in his wagon, looked and listened, and neither saw nor heard aught of the train. Then proceeding again carefully, he sustained the injury by a train rushing suddenly against his horses and wagon, &c., which it was impossible for him to avoid after he saw it.

The deep cutting into which the rail track ran, the watch-house erected, but not used by the defendant, prevented the train from being seen until the traveler approached within a few feet of the crossing. The watch-house obstructed the view a distance further off. The sound of a fall of water at the crossing, besides the peculiarity of the road, prevented the noise of the train whistle or bell from being heard; and the cars were running at the rate of about thirty six miles an hour.

The highway was not closed in fact or in law. The public had a right to use it for travel. The plaintiff, at the time of the injury, was exercising a clear right upon that highway.

The grade of the highway was necessarily considerably changed by reason of this crossing.

All peril of this kind could have been avoided by the railroad going under or above the surface of the highway at the crossing. If this danger could be avoided in no other way, then it would seem to follow that the "usefulness" of the highway was "unnecessarily impaired" by the railway's omission to do either. It had failed in its statute obligation. It was not the duty of the highway, but of the railroad, to give this protection from the peril caused by the railroad.

Again, in laying down rules of general application, courts find it frequently necessary to make exceptions, to prevent injustice.

When the reason of the rule fails, the law usually discharges the rule. For the protection of the traveling public, the statute requires railroads to ring their bells or sound their whistles a certain distance from the crossing over a highway. The legislature required this, in order to give notice to the traveler of the approaching peril and to enable him to avoid it. Almost universally, this is a sufficient protection. But, in the case at bar, it gave no notice whatever, and gave no protection. This the defendant well knew, and could not avoid knowing from the surroundings. It also knew that the legislature intended that the traveling public at such places should have notice of the approach of a train in some manner. In this case, as it failed, knowingly failed, to give any notice, it was guilty of a neglect, for which it was justly held liable. Upon that ground it is, in my judgment, liable upon the soundest principle.

The legislature has never enacted that a railroad shall not be liable for any injury at a crossing where it rings its bell or sounds its whistle. No legislative impunity is given to the railroads for damages they may wrongfully cause. But the statute declares that they shall do those specified things, and that they shall be liable for any damages caused by their omission. As a general rule, undoubedly, they are exempt from liability to the ontside public when, in good faith, those provisions are substantially complied with. But there may be cases where the purpose of these requirements is not and cannot be attained by their technical fulfillment. Such is the case at bar—plain and palpable; easily understood, as the act of the company in building the watch-house and in keeping a watchman there for some time, shows the defendant understood it.

The principle has been substantially held by this court in the last decision in Bersiegel *vs.* This Defendant.

The defendant again, by its own act, caused this injury in its erection of the watch-house, now not used, but preventing the traveler from seeing the train, which he otherwise might.

That it obstructed this traveler's view, is found by the referee. That it thus caused the injury, may be fairly inferred, as nothing could be seen as he approached the track "owing to the formation of the ground and the situation of the watch-house."

There was a map at the trial in evidence and none is produced here. Presumptions are in favor of affirming a judgment. Error is not presumed. If there were doubts on this point, in the absence of the map, the presumption is against error.

A building thus erected by a railroad, which prevented the public from seeing a train until too near for safety, has been held by this court a good ground for recovery. (Mackay *vs.* N. Y. Cent. R. R. Co., 35 N.Y. 75.) It is so in this case.

Judgment affirmed.

☞ The Sugar River Railroad, thirty miles long, will be completed next week so that construction trains will enter Claremont, and regular passenger trains will begin running September 2. After this is completed the rails will be laid two and a half miles further to the Sullivan road. John S. Walker of Claremont, N. H., is President of the company.

☞ The Supreme Court of South Carolina has decided that the law for the issue of State scrip to the Blue Ridge Railroad, and making it receivable for taxes, is unconstitutional and void. This is said to repudiate $2,000,000 of State liabilities created by the last South Carolina Legislature.

Canal Navigation by Steam.

An inventor, whose plan has been tried on the Erie Canal, seems to have at last realized a solution of the problem of adapting steam to the navigation of canals. The New York *Sun* gives a succinct description of the invention as follows:

The new motor is called Williamson's road Steamer, and the experiments took place at Albany, on the section of the canal between that city and Troy. The tractor is a three-wheeled locomotive, weighing about six tons. Its cost is about $5,000. The wheels, which are twelve and fifteen inches broad, have india rubber ties four and a half inches thick. The steering wheel is in front, and is managed as one manages a velocipede. This engine can ascend the steepest grades, and can turn in its own length. It is also claimed that the rubber ties on the wheels, in addition to giving them the most perfect adhesion, will act as road rollers, rolling the tow-path smooth and keeping it in good order. The rubber face on the wheels is protected by a series of steel shields one inch and a-half apart, fastened together with an endless chain. On the occasion of the trial at Albany, which took place on Thursday last in the presence of Canal Commissioners Wright, Fay and Barclay and other prominent men, at the appointed time the engine ascended the incline from the Troy road to the tow-path and hitched on to one of three bull-head barges which were loaded with lumber, and having moved it into position adopted the same course with the second and third until they were arranged as a tow and properly secured. Then the engine started and drew them with the greatest ease at the rate of three and a-half miles an hour, to the lock above the city. This result was attained with ordinary boats on a common tow-path. Various preliminary trials had resulted in an equally satisfactory manner. It is said that all who witnessed the trial were fully satisfied of the practicability of this plan of steam towage, and it appears that its economical advantages are very great. The pressure of steam required to enable the engine to draw three barges is ten pounds to the square inch, and that pressure can be kept up with a consumption of one hundred and fifty pounds of coal per hour. By a careful comparison of the cost of towing three boats by the road steamer and one boat by horse power from Albany to Buffalo, in which interest, wear and tear, and all contingencies are taken into consideration, it is estimated that by the use of the road steamer the expense of towage would be $133 86 less for each boat than by horse power, while there would be a gain of four days in time. The usual time consumed in a trip between Buffalo and Albany is ten days; the road steamer would easily make it in six.

☞ The New Lisbon *Argus* says that the present line of the West Wisconsin Railroad, now ending at Tomah, is to be taken up and will henceforth run from Warren Mills to Camp Douglass, on the Milwaukee and St. Paul Railroad, and thence to Elroy, on the Chicago and Northwestern Railroad. It is expected that this portion of the road will be completed before the close of the fall season.

☞ The Wisconsin Valley Railroad is approaching completion, the grade of the entire line between New Lisbon and Grand Rapids being completed, or nearly so, with the exception of abont eighteen miles between the north branch of the Lemonwier and Remington. Arrangements for extending the road through Marathon county are now being made.

☞ Ten miles of the Galena and Southern Wisconsin Narrow Gauge Railroad has been contracted to be built, and the work of grading already commenced.

Vera Cruz and Mexico Railway.

The Railroad from Vera Cruz to the City of Mexico, it is stated, will be finished during the present year. The upper section, from the City of Mexico to Puebla, a distance of one hundred and sixteen miles, has been completed, and in 1871 the receipts of this section amounted to $689,235, and the working expenses to $352,650, leaving a net balance of $336,585. On the lower section, of seventy miles, between Vera Cruz and Fortin, in 1871 the receipts amounted to $300,330, and the expenses to $261,015, leaving a net balance of $39,315. Considerable expense was incurred in guarding the trains against attacks of Mexican guerillas. The traffic on both sections is steadily increasing, and when the entire road is completed the business, it is anticipated, will be very active. The chief articles to be transported will be grain and silver ore.

Grand Rapids and Alpena R. R.

The Toledo *Blade* says that arrangements have been completed between Geo. W. Cass, President of the C. I. Co., and M. R. Jefferds, President of the Grand Rapids, Rockford and Greenville Railroad Co. and of the Grand Rapids, Greenville and Alpena Railway Co., whereby the two latter Companies are to be consolidated, and bonds to the amount of $16,000 to the mile are to be issued for the whole length of the road. Arrangements were made so that the iron will be laid from Rockford to Greenville, and the cars will be running from Grand Rapids to Greenville in a short time.

☞ The Cumberland *News* announces the completion of the Bedford and Bridgeport Railroad, which connects with the Cumberland and Pennsylvania Railroad three miles and a half from Cumberland. The *News* says that this gives their citizens a competing passenger and freight line shorter than any other to New York and Philadelphia. Independent of this it opens up to the coal trade a fine market among the great manufactories of Pennsylvania which could not be otherwise reached, and will besides enable the placing of coal at Jersey City without breaking bulk. The road is under the control of the Pennsylvania Railroad Company.

☞ **THE ST. JOSEPH & DENVER CITY RAILROAD COMPANY.** EXECUTIVE OFFICE, No. 31 NASSAU STREET, NEW YORK, August 1st, 1872.—The Coupons and Registered Interest, due August 15th, 1872, on the First Mortgage Eight per cent. (8 per cent.) Gold Bonds of the St. Joseph and Denver City Railroad Company, BOTH EASTERN AND WESTERN DIVISION, will be paid at the office of the Farmers' Loan and Trust Company of the City of New York, upon presentation and demand, on and after that date, free of tax.

FRANCIS A. COFFIN,
Asst. Treasurer.

OFFICE OF THE
TOLEDO, PEORIA AND WARSAW RAILWAY CO.,
No. 80 BROADWAY, NEW YORK, July 30, 1872.

THE COUPONS FALLING DUE AUG. 1, ON the First Mortgage Bonds of the Toledo, Peoria and Warsaw Railway Company (Western Division) will be paid at the Farmers' Loan and Trust Company, No. 26 Exchange-place, on and after that date, free of Government tax.

JAS. F. SECOR, President.

OFFICE OF
TOLEDO, PEORIA AND WARSAW RAILWAY CO.,
No. 80 BROADWAY, NEW YORK, July 31, 1872.

AT A MEETING OF THE DIRECTORS OF the Toledo, Peoria and Warsaw Railway Company, held in Peoria, March 19, 1872, the following resolution was passed:

Resolved, That on and after the 1st day of September, A. D. 1872, the Secretary shall not exchange any first preferred stock for bonds secured by deed of trust dated the 2d day of April, 1866, on the Western Division of the Toledo, Peoria and Warsaw Railway Company, and that the holders of such bonds may, if they so desire, exchange the same for first preferred stock, as set forth in a resolution adopted at a meeting of stock and bond holders of this Company on the 15th day of June, 1868, in the City of New York.

Provided that such bonds are surrendered in exchange for such stock on or before the 1st day of September, A. D. 1872, but not otherwise.

True copy from the records.

THOS. H. WILLIAMS, Assistant Secretary.

Notice to Contractors.

MISSISSIPPI CENTRAL RAILROAD EXTENSION.

Sealed proposals will be received until the 15th day of August, 1872, at the Engineer's Office of the Mississippi Central Railroad Company in Jackson, Tenn. for the clearing and grubbing, grading and bridging, on about one hundred and seven miles of road, extending north from Jackson to Cairo.

This work embraces large quantities of earth excavation, pile and trestle bridging, and is worthy the attention of experienced railroad contractors.

Profiles, approximate estimates, general plans, specifications, and forms of contracts, can be seen at the Engineer's Office after Aug. 1.

The Company reserve the right to reject any or all bids.

Proposals must be indorsed "Proposals for Work," and addressed to

H. S. McCOMB, President; or,
S. B. REED, Engineer in Charge.
Jackson, Tennessee.

SPENCERIAN
DOUBLE ELASTIC

STEEL PENS.

These Pens are of superior English manufacture, and are a nearer approximation to the real **SWAN QUILL** than anything hitherto invented. We have recently added a new pen to the number, of great superiority where fine writing is desirable, which

we designate **THE QUEEN,** Or, No. 15.

The Spencerian Pens are for Sale everywhere, in gross and quarter gross boxes.

☞ A *Sample* Card, containing all the **15 numbers,** securely enclosed, will be sent by mail, on receipt of **25 cents.** Address

IVISON, BLAKEMAN, TAYLOR & CO.,
138 and 140 GRAND STREET, N. Y.

ENGINEER'S FIELD BOOK,

By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sal at this office. Price **$1.50.**

NOTICE.

All the Machinery of the New York Railroad Chair Works at private sale. Two Chair Machines; Three Burden Spike Machines; Bolt Heading Machine; Patent Bolt Cutters; Cold Pressed Nut Machine; Heavy Presses, Shears; One 60-horse Engine; One 20-horse do., Boilers, Lathes, &c., &c., at low prices. All in the best order. Apply at factory cor. Morgan and Washington streets, Jersey City, or J. B DAVENPORT, 85 John street, N. Y. (Box 3,041, P. O.) Lists at both places. This is a rare opportunity to buy *good* machinery.

CIRCULAR SLIDE VALVE.—TO RAILROAD Managers and other Users of Steam Power.—I will guarantee an addition to the working-power of any locomotive or slide-valve engine of one-third to one-half, at very small cost and no increase of running expenses. Tests desired everywhere. Circulars free.
4t27 J. F. TALLANT, Burlington, Iowa.

OFFICE OF ILLINOIS CENTRAL RAILROAD CO.,
NEW YORK, July 2, 1872.

A DIVIDEND OF FIVE PER CENT., free of Government tax, has been declared by this Company, payable on the first day of August next, to the holders of full-paid shares registered at the close of the thirteenth day of July instant, after which, and until the fifth day of August next, the transfer books will be closed.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**
PLAINFIELD, N. J.

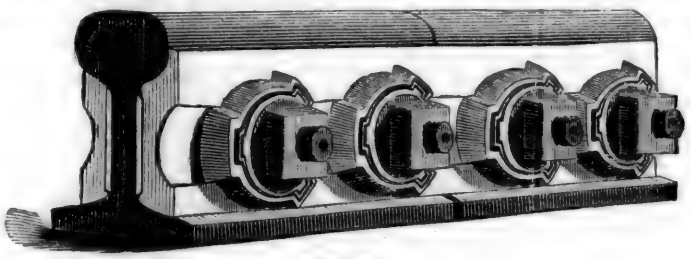
Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

New York, Saturday, August 10, 1872.

The Poughkeepsie and Eastern Railroad.

The Poughkeepsie *Eagle* says that the work of laying the track on this road is finished from Pine Plains eastward to within about two and a half miles of Boston Corners, where the junction with the Harlem will be made. Between Boston Corners and the state line, where the road joins the Connecticut Western, but little more than a mile remains to be done. The whole is expected to be finished by the 15th of August.

On the river division the grading is nearly finished, and all will be ready for the iron by the 15th, when track laying will begin at both ends, and be carried forward as rapidly as possible.

The company has been greatly retarded in its business by not having sufficient cars to carry the freight offered. A number more were ordered some time ago, but they have not yet arrived, although expected daily. A new and heavier engine, having six drivers, calculated for hauling heavy trains up the grades, is also expected to arrive in about two weeks.

☞ The first track of the Newark and Hudson road is completed, and work is progressing rapidly on the second track. Construction trains now run through, but it is understood that regular trains will not begin to run until the double track ready.

INVESTMENT SECURITIES.

The Northern Pacific Railroad Company, through its Financial Agents, offers for sale its First Mortgage 7-30 Gold Bonds. They fall due in 30 years, bear 7 3-10 per cent. gold interest, payable semi-annually, are exempt from U. S. tax to the holder, and are secured by a first and only mortgage on

1. The Railroad, its Right of Way, Franchise Rolling Stock, and other Property.

2. Its Traffic or Net Earnings.

3. A Government Grant of Land averaging on completion of the Road about 23,000 acres per mile of track.

The Road follows what is known as the Valley Route to the Pacific, flanked most of the way by an excellent country, and is assured in advance of a vast and profitable traffic which already awaits its completion. The work of construction is steadily and satisfactorily progressing; the settlement of the adjacent country and the building of towns keep pace with the advance of the road; a large body of the Company's lands is already in market, and the proceeds of sales will constitute a Sinking Fund for the redemption of the Company's Bonds, which are convertible at 110 into the Company's Lands at market prices.

Believing that these bonds, both in point of safety and profitableness, constitute such a security as judicious investors can approve, we recommend them to the public. Government bonds and all marketable securities are received in exchange at current quotations without cost to the investor.

JAY COOKE & CO.,

New York, Philadelphia and Washington.

FINANCIAL AGENTS NORTHERN PACIFIC RAILROAD COMPANY.

Reform in Railroad Management.

This is a period of "reform" in public, corporate and private life, and it need occasion no surprise, that with many examples of the results which have followed earnest and intelligent efforts in that direction, there should be an almost universal demand for more economical railroad management, without diminution of efficiency. And when the pruning knife comes to be put to extravagant expenses, it astonishes even the most prudent to see how many of them may be lopped off without injury to the service which the public has a right to expect, how many supernumeraries may be dispensed with, and to what an extent the services allotted to two or more may be performed by one. Not that we would desire to see any railroad without a sufficient operating force, but the tendency has been of late so much towards the multiplication of offices, that a proper field for retrenchment may be found in that direction.

The effect of the great inflation of the currency, and the extensive development of the public credit, which became necessary in raising means to prosecute the late war, was felt powerfully in the operation of railroads; favorably, for the moment, in some particulars, and unfavorably in others; but leaving them a legacy of almost unmixed evil. There was at once a vast increase in their nominal earnings; money was so plenty that the regular business of railroads greatly increased, to say nothing of their earnings in transporting troops and munitions of war. With the restoration of peace, earnings fell off; but in the meantime salaries had been increased, additional railroad officials had been appointed, and the cost of constructing and operating had fully doubled. None of these was so easily gotten rid of. It was not easy to reduce salaries while the cost of living was still high; it was not easy to dismiss faithful servants; and as for the expenses of keeping the roads and rolling stock in repair, and running the trains, they apparently defied management, however devoted and sagacious. The recent advance in iron of all kinds is an obstacle to the reduction of the expenditures of railroads, but in spite of this something can undoubtedly be done in that direction. The consolidation of continuous roads, either by leasing, or by the union of their respec-

tive corporations, is a measure of economy. Pretty nearly the same retinue of managing officials must be maintained for a railroad a hundred miles long as for one of a thousand miles; the maintenance of the repair shops costs out of all proportion for the shorter roads; and in the purchase of various supplies, the longer road has a great advantage so far as the expense per mile is concerned.

It is evident that the railroads of the United States are about to enter upon a new era in their history. Heretofore our people have shown activity chiefly in expanding over a vast area of territory. Hereafter, improvement of older settled communities must at least go hand in hand with expansion, and ultimately take the place of it, in the work of developing the resources of our great country. With this improvement and development, the local traffic of our railroads must increase, and this part of their business, while commanding remunerative rates, may be conducted with the most rigid economy. It is this sort of business which causes so many of the less important railroads of New England to prove remunerative; and it is to be hoped that railroads in other parts of the country will partake, in growing proportions, of their prosperity.

We need a return of the old fashioned integrity which administered the affairs of a corporation with the same fidelity that entered into the disposal of one's private affairs. The spirit and temper of the times is suitable to the promotion of such integrity and the encouragement of men who shall practice it. So many exhibitions have latterly been made of the inutility and fleeting character of ill-gotten gains, that there is reason to hope that the solid rewards of duty, faithfully and honestly performed, have not wholly lost their charms.

The tendency of circumstances is also towards the concentration of railroad shares in few hands, and that fact is highly favorable to the promotion of integrity and economy in their management. As we have said, our railroads have found it very difficult to exact any material advance in passenger fares or rates of freight over those current before the war; while in the matter of salaries, and cost of building and repairing, expenses before the war bore no relation whatever to those which have since been necessary; in fuel alone is there an approximation to ante-war figures. The prosperity of our railroads depends, therefore, upon the increased business resulting from local development, the extension of connecting roads, and upon rigid economy in management. The needed development must make progress in the very nature of things; the needed economy must, like liberty, be the price of eternal vigilance; directors and stockholders have no alternative; they must, if they would see their roads prosper, interpose a check upon everything that savors of needless expenditure; striving at the same time, to maintain a reasonable efficiency in the discharge of the service they owe the public. As they shall succeed in this, lateral roads will become more numerous; great trunk lines will flourish, and our railroad system again secure the confidence of the great body of capitalists, small as well as great.

☞ The Perkiomen Railroad, which was recently extended to Green Lane, is now being extended to Petersburg, a distance of five miles.

Atlantic, Mississippi and Ohio Railroad.

This railroad is a consolidation of the Norfolk and Petersburg, the South Side, the Virginia and Tennessee and the Virginia and Kentucky lines. The formal organization of the consolidated company was effected November 12, 1870, and the administration of affairs, so far as the accounts and returns are involved, was assumed April 1, 1871. The whole extent of the consolidated road, however, had for some time previously been worked under the same officials, Gen. Mahone, President: and hence for the preservation of the statistical series the officers of the company in their first report have returned the results for the Virginia official year ending September 30, 1871.

The line of road reported on extends from Norfolk, Va., to Bristol, on the Tennessee Line, a length, including the City Point and the Salt Works Branches, of 428 miles. The Virginia and Kentucky Railroad, on which many years ago the State of Virginia expended large sums, awaits the future, and the progress of the line in Kentucky, which is eventually to connect with it at Cumberland Gap by means of a tunnel through the mountain at that point. It is to be hoped that prompt action on both sides of the mountain will eventuate in the completion of the project and in supplying another outlet for the rich commerce that must eventually come and go between the great north-west and the ports of Norfolk, &c, on the Atlantic. This line, when completed, will surely share in the trade which the Chesapeake and Ohio Railroad will monopolize until such time as the opening of this other great enterprise—both having the same mission, the carrying trade of the ports of the South Atlantic coast.

The details of the roads now in the consolidation are as follows:

Norfolk and Petersburg R. R.—		
Norfolk to Petersburg	81	miles.
South Side R. R.—		
Petersburg to Lynchburg	123	
" to City Point	10	
	133	"
Virginia to Tennessee R. R.—		
Lynchburgh to Tennessee Line	204	
Glade Springs to Salt Works	10	
	214	"
Total completed railroad	428	miles.
To this total should be added for sidings and other tracks	29	"
Total length of tracks	457	miles.

The gauge of the road is of the usual Southern measure, 5 feet; and the weight of iron used on tracks varies from 56 to 60 lbs. to the yard.

The Virginia and Kentucky Railroad, now in progress, will add 100 miles to the complement of the roads in use.

The equipment of the road and the distribution of engines and cars to the several divisions as now operated was at the close of the fiscal year 1870-71 as follows:

	N & P.	S. Side.	V. & Tenn.	Total.
Locomotive engines:				
Passenger	2	3	10	15
Tonnage	6	9	27	42
Material	2	5	6	13
Switching	2	2	2	6
Total	12	19	45	76
Passenger train cars:				
1st class	4	5	3	12
2nd class	5	.	11	16
Mail & baggage	2	6	6	14
Tonnage train cars:				
Box	112	151	127	390
Flat	59	95	100	254
Stock	2	12	113	127
Total cars	184	269	360	813

The number of cars built at the company's shops in 1870-'71 was—mail and baggage 1, box 67, stock 20 and flat 67—total 161.

The mileage of locomotives during the year on the several divisions of the road is shown in the following table:

	Pass.	Tonnage.	Other.	Total.
N. & Pbg.	59,312	101,280	54,772	215,364
S. Side	89,042	186,396	89,303	364,641
V. and Tenn.	181,636	459,203	70,862	691,701
Total miles	329,990	726,779	214,937	1,271,706

The mileage of cars (cars hauled one mile) was in the same year as follows:

	Pass.	Tonnage.	Material.
N. & Pbg.	232,227	1,615,221	458,280
S. Side	315,323	2,668,519	604,927
V. & Tenn.	997,808	4,577,812	409,280
Total	1,546,358	8,861,552	1,467,487
Loaded	1,546,358	6,862,536	730,976
Empty		1,999,016	736,511

The total of all cars haulage was 11,875,397 miles, of which the revenue cars ran 10,407,910; or deducting cars without loads 8,408,894 miles.

The traffic, passenger and tonnage, on the divisions severally, is stated summarily thus:

PASSENGER TRAFFIC.

	Number.	Mileage.	Revenue.
N. & Pbg.	31,450	1,628,301	$55,367 72
S. Side	61,447	2,542,392	89,594 35
V. and Tenn	110,495	8,802,890	308,597 26
	203,892	12,973,583	$453,559 33

The increase and decrease of passenger traffic on the several divisions, as compared with the results of the previous year and the net decrease on the whole railroad owned by the company is shown in the following table:

	Number.	Mileage.	Revenue.
N. & P. increase	1,260	4,479	$92 92
S. S. decrease	4,387	423 299	11,318 76
V. & T. decrease	6 300	1,702,914	36,026 22
Net decrease	8,927	2,121,734	$47,252 06

TONNAGE TRAFFIC.

	Tons.	Mileage.	Revenue.
N. & Pbg.	130,254.57	9,143,386.54	$269,031 53
S. Side	174.016.14	14,737,280.32	380,298 82
V. & Tenn.	185,501.47	24,870,903.30	648,184 29
Totol	489,802.28	48,751,570.16	$1,297,514 64

The increase of tonnage traffic in 1870-'71 over that of 1869-'70 was as follows:

	Tons.	Mileage.	Revenue.
N. & Pbg.	20,957.75	1 378.120.10	$17,360 35
S. Side	28 320.52	2,348,521.27	12,365 71
V. & Tenn.	20,701.13	2,371,307.26	4,216 73
Total	69,979.40	6,097,948.63	$33,942 19

REVENUES AND EXPENDITURES.

The revenues and expenditures on account of the traffic, as above related, show the following aggregate results:

	Passenger.	Tonnage.	Other.
N. & P.	$64,171 59	$299,436 08	$11,749 04
S. S.	102,683 18	404,823 35	4,644 46
V. & T.	340,223 69	693,652 27	4,043 89
Total.	$507,088 46	$1,397,912 20	$20,437 39

	Total.
Norfolk and Petersburg	$375,356 71
South Side	512,151 49
Virginia and Tennessee	1,037,919 85
Total	$1,925,428 05
Expenses—N. & P. R. R.	$208 826 68
" —S. Side R. R.	383,180 84
" —Va. & T.R. R.	696,283 18
	1,288,290 70
Net revenue	$637,137 35

The proportion of revenue and expenses per mile of road and per mile run by revenue and by all trains is shown in the following deductions.

	Revenue. Road	Trains.		Expenses. Road	Trains.	
	p. m.	Rev.	All.	p. m.	Rev.	All.
N.&P.	$4,634 03	$2.34	$1.74	$2,578 10	$1.30	$0.97
S. S..	3,850 76	1.87	1.40	2,881 06	1.39	1.06
V.&T.	4,850 09	1.67	1.50	3,253 66	1.12	1.01
Total.	$4,498 66	$1.82	$1.51	$3,110 03	$1.22	$1.01

The revenue, expense and profit per passenger and per ton per mile transported were as follows, the deduction being given in cents.

	N. & P.	S. S.	V. & T.	Total.
Passenger revenue..	3.40	3.52	3.50	3.49
Tonnage revenue	2 94	2.58	2.60	2.66
Passenger expenses.	2.36	3.01	1.84	2.13
Tonnage expenses..	1.61	1.87	1.93	1.85
Passenger profits	1.04	0 51	1.66	1.36
Tonnage profits	1.33	0.71	0.67	0.81

The expenditures on "further construction and equipment" of the several divisions amounted for the year to an aggregate of $641,443 59, distributed as shown in the following table:

Norfolk and Petersburg	$55,641 47
South Side	208,964 74
Virginia and Tennessee	376,837 38
Total	$641,448 59

The report of President Mahone, dated January, 1872, is short, but fully adequate to the purposes and objects which are treated upon. The following abstracts from the report will show more clearly than the preceding figures the actual financial condition of the company:

The liabilities, assumed on account of the various divisions, existing at the time we administered upon their estates, are as follows:

On account of funded debt—

For Norfolk and Petersburg Division	$964,000 00
For South Side Division	1,755,100 00
For Virginia and Tennessee Division	2,773,908 11
In all	$5,493,008 11
To which add, for interest past due and outstanding on account of Virginia and Tennessee Division, mainly accruing prior to 1868, and not assumed by the former administration	130,000 00
Making in all	$5,623,008 11

On account of floating debt—

For Norfolk and Petersburg Division	$69,769 49
For South Side Division	842,863 31
For Virginia and Tennessee Division	994,817 47
For Virginia and Kentucky Division	9.545 17
In all	$1,916,995 44

The funded debt remains unchanged, in so far as it relates to the amount assumed from the old organizations, save that of the past due income mortgage bonds, of the Virginia and Tennessee Division, reported as outstanding, there are but $7,000 in the hands of individuals yet to be exchanged, $105,500 of the same having been purchased and are held by your company, and thus constitute a *quasi* liability, which will have no existence after the entire extinction of the old organizations and the cancellation of their liabilities. It is proper also to say that, since the close of the fiscal year, the $4,000 of old second mortgage bonds of the Virginia and Tennessee division have been retired, and nearly half of the past due coupons, reported as outstanding, have been funded in interest bonds under the pre-existing arrangements.

The floating debt of your company has been enlarged by the sum of $390,217 23, mainly for the purchase of additional rolling stock, which has not yet been distributed among the various divisions, making a total of $2,307,292 59, as of date September 30th, 1871. It is, however, designed to extinguish every liability of this character as rapidly as they mature, and at the time of writing this report scarcely half of this sum remains unliquidated. The accomplishment of this object is a mere question of time, since there are in hand available assets, exclusive of state stocks and claims, amounting to $1,412,587 24, which could, in the absense of other resources, if necessary, be devoted to this purpose.

In accordance with the provisions of the 9th section of the charter, your president and board of directors, on the 22nd of December, 1870, executed a covenant for $4,000,000, with the State of Virginia, for the purchase of "all the stocks held by the commonwealth," and "all and whatever claims" held by the State in or against the Norfolk and Petersburg, South Side, Virginia and Tennessee and Virginia and Kentucky Railroad Companies, and upon its acceptance by the board of public works, there were delivered to your company the following securities:

Of the Norfolk and Petersburg Division—		
2 Negotiable notes, given to the State of Virginia, in payment of interest	$40,496 41	
1 Claim for balance due on State loan	136,591 64	
1 Certificate for 8,175 shares ordinary stock	817,500 00	
1 Certificate for 825 shares guaranteed stock	82,500 00	
1 Certificate for 3,000 shares preferred stock	300,000 00	
		$1,377,088 05
Of the South Side Division—		
1 Claim for balance due on State loan	$708,102 34	
1 Certificate for 8,035 shares ordinary stock.	803,500 00	
		1,511,602 34
Of the Virginia and Tennessee Division—		
1 Claim of first mortgage for State loan.	$1,000,000 00	
1 Registered certificate in payment of interest	79,040 00	
1 Certificate for 17,168 shares ordinary stock	1,716,800 00	
1 Certificate for 832 shares guaranteed stock	83,200 00	
1 Certificate for 5,000 shares preferred stock	500,000 00	
		3,379,040 00
Of the Virginia and Kentucky Division—		
1 Certificate for 1034 shares ordinary stock		103,400 00
In all		$6,371,130 39

This covenant was made in accordance with the terms of the 10th section of your charter, and is held as in all respects subordinate to the first mortgage therein authorized.

By this transaction with the State of Virginia, we are enabled to record a profit and loss balance in your favor of $2,371,130 39, and upon the final absorption of all the stock of the various organizations embraced in your company, yet unsubscribed—the accomplishment of which cannot be much longer deferred—obligations heretofore outstanding against them, to the amount of $1,964,230 39, will be forever extinguished, to the manifest benefit of every shareholder and the credit of the company, in addition to the possession of 44,069 out of 69,219 shares of capital stock.

Divested of these extraneous matters, growing out of the necessity for a presentation of the affairs not only of your own company, but of the old organizations upon which it was erected, in accordance with the terms of your charter, the financial status may be briefly summed up, as of date September 30th, 1871, as follows:

Resources:		
Cost of road and equipment		$16,607,175 84
Interest on funded debt, &c., paid in 1870-'71		390,902 45
Assets other than State claims, &c.		1,412,587 24
State stocks owned by the company		4,406,900 00
		$22,817,565 08
Liabilities:		
Capital stock	$6,121,900 00	
Funded debt of divisions, less $105,500 Virginia & Tennessee income bonds	5,517,508 11	
Covenant with State of Virginia.	4,000,000 00	
Floating debt of all kinds	2,307.292 57	
Interest, uncalled for	45.978 85	
Net revenue, 1870-'71	637,137 35	
		19,429,816 88
Excess of resources over liabilities		$3,387,748 15

This condition of your affairs is a subject of congratulation, and places the credit of the company upon the highest basis.

The terms of your charter require that separate accounts of the old organization shall be kept, until their final absorption.

ROAD DEPARTMENT.

The operations of this department, during the fiscal year, have been conducted with a view to the rapid and thorough reconstruction of the roadway to the condition of a first-class work. In furtherance of this object there has been expended in this branch of the service,

On the Norfolk and Petersburg Division	$33,947 60
On the South Side Division	142,387 15
On the Virginia and Tennessee Division	207,013 59
In all	$383,348 34

On the Norfolk and Petersburg Division the work of graduation has been extensively prosecuted; an iron girder bridge, on stone abutments, constructed at Burnt Mills; three stone culverts built, the track improved by cross-ties, nineteen miles of spring track provided, the work of ballasting enlarged, and new buildings, for station houses, employees and shops, erected. On the South Side Division, the damages caused by the great flood not only repaired, but, as far as human foresight goes, effectully provided against; the piers and abutments of the bridge across James River, at Robinson's Mills, have been raised to the grade of the track, and splended iron Fink bridges erected in lieu of the wooden structures formerly in use at that point and at Archer's Creek; the bridges at either end of the Island, at Lynchburg, have been again erected, stone culverts built at Curve Trestle and the Canal Locks near Petersburg, over ten miles road ballasted, six miles new English iron laid, the track improved by new chairs, alignment, &c., and five station houses erected. On the Virginia and Tennessee Division, over sixteen miles new English iron rail have been laid, nearly forty miles road bed ballasted, twenty-five miles old rail cut and relaid; Howe bridges, with iron bottom chords, over Big and Little Otter Rivers, erected; two station houses, six employees houses, and six water tanks constructed, besides other important work. The

improved condition of the roadway of the line, as well as the diminished cost at which the trains run, attest the value of the work done in this behalf. The expenses of this department for the past fiscal year were $221,179 10, or 17.40 cents per mile run of all trains.

MACHINERY DEPARTMENT.

During the year, there have been added to the Rolling Stock, on the Norfolk and Petersburg Division, four locomotives; on the South Side Division, seven locomotives, and one mail and baggage, nineteen box and twenty-seven flat cars; on the Virginia and Tennessee Division, eight locomotives, and two mail and baggage, forty-eight box, twenty six stock, and forty flat cars; involving an expenditure on this account, of $255,942 68. The locomotives added, are of Mason's make, while the burthen cars were constructed in the Company's shops, at Lynchburg and Petersburg, all after the adopted standard patterns. The expenses for the maintenance of this branch of the service have been, for the past fiscal year, $201,022 27, or 15.81 cents per mile run of all trains.

The revenue, derived by means of the agencies of this Department, for the past fiscal year, has been—

From Passenger Trains	$507,078 46
From Tonnage Trains, including $4,594 46 earned by Material Trains	1,402,506 66
In all	$1,909,585 72

This result, accomplished despite the loss occasioned by the great flood, which occurred in the Fall of 1870, when our business was heaviest, is a matter of congratulation, and indicates the solid basis upon which the hopes of a brilliant future for your Road are founded.

The passenger traffic shows a decline in the number of persons transported during the past fiscal year, due, in part, to the scarcity of money at the South, consequent upon short crops, but mainly due to the loss of actual business at the time of the great flood, and the diversion of travel which grew out of that interruption.

In the tonnage business for the past year, we find an increase over that of the previous year, which is extremely gratifying. Both the through and way business have been enlarged, the former to the extent which our past predictions had indicated, and the latter in a degree which marks a healthy growth in the return to that measure of prosperity among our own people, of which they had been deprived by the losses growing out of a four years' unsuccessful war. In the increase of this manner of your business, our Virginia cities have reason to rejoice, since the benefits it has occasioned have enured to their advantage.

The expenses of this Department of the service, have been, for the past year, $619,380 42, or 48.70 cents per mile run of all trains, a decrease in the ratio of expenses from the corresponding results of the previous year, which is largely attributable to the improved condition of the track and road bed.

During the past fiscal year, there has been expended, on account of the further improvement and enlargement of the property—

On the Norfolk & Petersburg Division	$55,641 47
On the South Side Division	208,964 74
On the Virginia & Tennessee Division	376,837 88
In all	$641,443 59

The revenue for the past year was $1,925,428 05, showing a small decrease on the corresponding results of the previous year. When it is borne in mind, however, that there was a direct loss of $121,503 58 in the first month of the fiscal year, in consequence of the flood, and that this interruption occasioned an indirect loss of not less than as much more, from the diversion of business which ensued, and that for eight out of the eleven other months there is shown a handsome increase of revenue, we have every reason to anticipate that the results of the present year will exhibit the same flattering enlargement of income which has marked every year since the policy of consolidation was inaugurated.

The same causes which induced a decrease of revenue, and the increased mileage in trains, have given rise to a nominal increase of current expenses, which for the past year, were $1,288,290 70, causing an anomalous per centage of expenses to revenue, which finds explanation, however, in the extraordinary circumstances to which we have adverted. It is proper to remark that the maintenance of the large floating debt, which grew out of the imperative necessity for large expenditures on the property, occasioned a cost for discounts, which is included, in the current expenses of the past year, of $132,245 21, and which contributed largely to their nominal increase; this item is now disappearing, and will not affect your nett revenue for the present year.

In accordance with the authority conferred at your called meeting of May 18th, 1870, the negotiation of the Fifteen Million loan has been satisfactorily effected, the whole sum being placed upon European markets, after retaining in hand the amount of bonds required to be set aside for the security and ultimate redemption of the Bonded Debt of the various old companies, whose obligations we have assumed.

During the fall and winter, surveys for the extension of your Road to Cumberland Gap have been prosecuted, and its location is now being marked out. The completion of this line is measured by the time in which the execution of the tunnel at the Gap can be accomplished, a work common to your Company, and that with whose rails it there proposes to connect; arrangements for the putting to contract and most energetic prosecution of which, will be made with the Louisville and Nashville Company at an early day, and such steps will be taken, with reference to the performance of all the work required to be done to effect a junction of the two roads at that point, as will secure the consummation of that event as early as December, 1874. The importance of this line, to every interest concerned in its operations, demands that it shall be opened to traffic at the earliest practicable moment.

The financial condition of the company, as exhibited on the General Balance Sheet of Sept. 30, 1871, is shown in the following abstract:

LIABILITIES.

Capital stock:		
Ordinary	$5,845,700 00	
Preferred	800,000 00	
Guaranteed	270,200 00	
		$6,926,900 00
Funded debt:		
Norfolk and Petersburg R. R.	$964,000 00	
South Side R. R.	1,755,100 00	
Verg. and Tenn R. R.	2,773,908 11	
		5,493,008 11
2nd mortgage to State of Virginia for purchase of stocks and claims		4,000,000 00
State claims for interest, loans &c.,		1,964,230 39
Interest on funded debt		45,978 85
Profit and loss		3,412,218 15
Revenue for 1861		1,925,428 05
Accounts, notes and acceptances		2,307,292 57
Total		$26,070,086 12

RESOURCES.

Property account		$16,607,175 34
Interest account		890,912 45
Current expenses		1,288,290 70
Bills renewable		1,080,849 39
Notes and acceptances		24,623 64
Stocks, claims for loans &c.		6,871,130 39
Cash	$54,824 80	
Supplies	155,537 40	
Other investments	96,752 07	
		307,114 27
Total		$26,070,086 12

The details of the funded debt (exclusive of the 2nd mortgage bonds to the State of Virginia which were issued for the purchase of stocks and claims, in the separate companies as authorized by the Act approved June 17, 1870) are shown in the following summary:

NORFOLK AND PETERSBURG RAILROAD.

1st mort. 8s, due Jan. 1, 1877	$306,000 00
1st mort. 7s, due Jan. 1, 1877	157,000 00
1st mort. 8s, due Jan. 1, 1882	43,000 00
2nd mort. 8s, due July 1, 1893	458,000 00

SOUTH SIDE RAILROAD.

1st mort. pref. 8s, due Jan. 1, '84 to '90.	$675,000 00
2nd mort. pref. 6s, due Jan. 1, '84 to '90.	617,000 00
3nd mort. pref. 6s, due Jan. 1, '84 to '90.	448,500 00
New 2nd mort. 6s, due Jan 1, '70 to 75' (to be funded)	4,000 00
Old 3rd mort. 6s, due Jan. 1, 1862 (to be funded)	10,600 00

Storekeeper.— J. P. McINTREE.

The general offices are located at Lynchburg, Campbell Co., Va. The Division offices are at Norfolk, Petersburg and Lynchburg.

The National Railroad.

The Jersey City *Times* says of the projected National Railroad from New York to Philadelphia, the authorization of which was completed by the passage through the last New Jersey Legislature of the Stanhope Railroad charter:

Workmen are strung along the entire distance from Bound Brook, where it is to intersect the New Jersey Central, to the Delaware river, and thence on the Pennsylvania side to the city soon to be bound to us by another link of brotherly love. The contractors, A. Driesback & Co., of New Jersey, and McGraun & Co., of Pennsylvania, wealthy and experienced contractors, are pressing on vigorously. Fifty sub-contractors have taken sections of the work, and all are liable to a heavy penalty if the work be not completed between Bound Brook and Philadelphia in one year from this time.

The company has purchased the fine building No. 96 Liberty street, New York, on which street both the New Jersey Central and the Pennsylvania Central have their general offices. It is rapidly being fitted up for the company's offices for the New York terminus. The main offices have for some time past been located in an elegant granite building at No. 218 South Fourth street, Philadelphia.

It is well understood that the National Railroad Company is an adjunct of the Baltimore and Ohio, with connections, penetrating by a diversity of interests to the Pacific slope. By a short line of railroad from Yardleyville to the Philadelphia and Reading, it will control the vast coal trade and the traffic of that large corporation. It ranks among its stockholders some of the best

and most influential capitalists of the country. William G. Case, Esq., long identified with the railroad and iron interests of Columbia, Pennsylvania, is its president. Henry M. Hamilton, a man of large wealth, well known to most of our citizens, and who has long devoted his whole time to this enterprise, is its vice-president. Such men as Jacob Riegel, the merchant prince of Philadelphia, and one of the most solid and substantial men of the country, is its treasurer. Robert R. Corson, Esq., another wealthy and responsible Philadelphian, is its secretary. Isaac B. Culver, Esq., of Jersey City, who has a wide reputation in his calling, is the chief engineer.

Progress of the Northern Pacific Railroad.

At this date (August, 1872,) regular freight and passenger trains have been running for six months on schedule time over the main line of the Northern Pacific Road from Duluth to the eastern border of Dakota, 252 miles; the track is laid, and construction trains now run a considerable distance westward, across Dakota; three-fourths of the 200 miles, between the Red River and the crossing of the Missouri is graded; track-laying is progressing at the rate of nearly two miles a day, and about the middle of October the road is to be completed and in operation to the Missouri River, 200 miles from the west line of Minnesota, and 452 miles west of Lake Superior. All material and equipment are purchased and ready for the completion and operation of this section of the road.

On the Pacific coast, in Washington Territory, a finished section of 25 miles has been in regular operation for some months, and an additional extent of 40 miles is now approaching completion—making 65 miles at the western end that will be in running order the present season. They will give a total of 517 miles of road put in operation in a little more than 24 months from the date of beginning work, notwithstanding the necessary delays of the first year attendant upon the prosecution of thorough preliminary surveys and the best line through a densely wooded region.

A better idea of the real magnitude of the work accomplished will be conveyed by stating that the portion of the Northern Pacific Road, now approaching completion, is considerably longer than the New York Central Railroad and its connecting lines, extending from Albany, New York, to Cleveland, Ohio; nearly as long as the combined roads reaching from Portland, Maine, through Boston, Providence, New Haven, New York, Philadelphia and Baltimore to Washington; and almost one and a half times the length of an air-line from London to Glasgow.

SURVEYS.

In addition to this actual construction, the work of surveying and locating the entire line across the continent has been pushed with system and vigor, Summer and Winter; careful engineering, and the selection of the best of several possible lines, have in many instances reduced the cost of construction considerably below the original estimates. Continuous surveys and examination have been made from Lake Superior to Puget Sound, with the exception of a short section on the Yellowstone River, which is now being surveyed. The results of two years' careful examinations more than justify the Company's expectations and statements regarding the favorable character of the Valley Route to the Pacific—both in respect to ease of railroad construction and operation and the good quality of the country traversed by the line. Exclusive of the sections already completed or under construction, there are 836 miles now being finally located and prepared for contract. This includes the section of 226 miles extending along the valleys of Heart River and Glendive's Creek, from the crossing of the Yellowstone in Eastern Montana, and the section between the mouth of Snake River and Lake Pend d'Oreille, west of the Rocky Mountains.

TRAFFIC.

The section of road now in operation across Minnesota already enjoys a very considerable local traffic, including the carrying trade of the British settlements in Manitoba and of the Hudson's Bay Company. Three steamboats, for the accommodation of this latter business, ply on the Red River of the North between the railroad crossing and Winnipeg, in British Columbia.

The completion of this season's contracts will give the road immediate and permanent control of the very large and profitable traffic of the Upper Missouri River, including the government transportation in the Northwest. A short distance above the point where the road strikes the Missouri, the latter bends to the west, carrying a navigable water way 1,000 miles, from the railroad crossing to the foot of the Rocky Mountain divide at Fort Benton, in Western Montana. As many as thirty-three steamers have been employed in a single season to accommodate the trade of these upper waters. Thus, on the opening of navigation next spring, there will be a direct east and west line for travel and transportation—part river and part rail—from St. Paul and Lake Superior, in longitude 92 degrees, to the populous portion of Western Montana, in longitude 110 degrees. From Fort Benton westward across the summit, it is less than 400 miles to the head of reliable and constant steam navigation on the Columbia, which river carries this natural highway to the Pacific Ocean.

LANDS.

The portion of the road now nearing completion will at once entitle the Northern Pacific Railroad Company to and place in its possession about Ten Million acres of the lands granted by the government—an area exactly twice the size of Massachusetts. The lands are adjacent to either side of the track in Central Minnesota, Eastern Dakota, and Western Washington. They are mainly prairie farming lands, of excellent average quality, the remainder being covered with valuable forests of timber. They lie directly in the path of immigration and settlement, have a sufficient rain fall, a climate of unsurpassed healthfulness, and in the main, a singularly productive soil. Before advertising its lands the Company had already received applications, chiefly from actual settlers, for nearly a quarter of a million of acres.

The Land Department of the Company is fully organized and in active operation. Nearly two million acres of the Company's lands, partly in Minnesota and partly in Washington Territory, have been surveyed, examined, plotted, appraised and placed in market at a cost of about one cent per acre. Sales are now being made, and the seven-thirty first mortgage bonds of the Company have already begun to be cancelled by being received in payment for lands at a premium of ten per cent.

SETTLEMENT.

In connection with the Land Department has been organized a Bureau of Immigration, to promote and hasten the settlement of the country tributary to the road. Agencies are established in the older States of the Union and in Europe, through which information is diffused and every reasonable facility furnished to organized colonies and intending settlers equally whether they desire to locate on free government homesteads or obtain railroad lands, or both. Under the auspices of this Department, large and convenient reception houses have been built and furnished at each of several principal points on the road, to serve as temporary free homes for settlers and their families, while engaged in selecting lands and preparing their own houses. Settlement and cultivation of the country keep pace with the steady and solid progress of the road.

☞ Subscription books have been opened in Paris, Ky., and other towns along the route for the proposed railroad to the Cumberland Gap. Ten thousand dollars or more have been already subscribed.

THE INDIANA
AND
ILLINOIS CENTRAL
RAILWAY COMPANY'S
First Mortgage 7 Per Cent.
SINKING FUND
GOLD BONDS,
FREE OF GOVERNMENT TAX.

An East and West Air Line of 152 *Miles, Indianapolis, Ind., to Decatur, Ill.*

This road passes through a belt of the best settled and richest agricultural and mineral country of Indiana and Illinois, averaging thirty miles in width, with no other East and West Railway built or projected through it. It crosses, in Parke and Vermillion counties, the rich

BLOCK COAL FIELD

of Indiana, which alone will supply an ample business.

Thirty miles through Douglas County, Ill., just completed, opened and paid for.

Whole Western Division, Montezuma to Decatur, 85 miles; to be finished in 1872. Grading nearly done and materials (except iron) already procured; Bridge over Wabash ready for superstructure.

Eastern Division, 67 miles, partly graded and to be finished in 1873.

$1,300,000 in cash already expended on the road, and $1,500,000 remaining to be called from 20 subscribers, among whom are W. H. Guion, Sidney Dillon, Jay Cooke & Co., Clark Dodge & Co., J. Seligman, Vibbard, Foote & Co., and Paul S. Forbes, of New York; Benj. E. Bates of Boston, Henry Lewis of Philadelphia, and G. M. Pullman of Chicago.

Besides its right of way, the Company owns 32,000 acres of land, chiefly in Indiana, of which 2,000 acres are the best BLOCK COAL LANDS. It has also SUBSCRIPTIONS IN BONDS AND CASH from counties, towns, and individuals of $700,000.

The road connects at both termini with the most important THROUGH RAILWAY LINES of the West, and being by many miles shorter than any other line, will be indispensable to them, while its local business alone will insure good dividends on its stock.

Bonds, $1,000 each, payable to Union Trust Co., Trustee or bearer, July 1, 1901, in gold coin. Coupons, also in gold, payable Jan. 1 and July 1, in New York, or at Union Bank of London, at fixed exchange of £7 sterling.

SINKING FUND of 2½ per cent. a year on gross earnings to be invested by Trustee in bonds at not exceeding par.

For sale at 90 and accrued interest by the Financial Agents of the Company.

Walker, Andrews & CO.,
14 Wall-st.

☞ The engineers and surveying parties of the Atchison, Topeka and Santa Fe and Leavenworth, Lawrence and Galveston Railroads, will probably complete a survey of the lines from Topeka and Lawrence to Leavenworth *via* Osakaloosa this week.

☞ The work on the Narrow Gauge railroad from Greeneville to Paint Rock, Tenn., is being rapidly pushed forward

Total entered at the port.	$78,044,000	$85,877,426

☞ The New York, Kingston and Syracuse Railroad Company are rapidly extending their road and expect to commence running to Moresville on the 5th instant, at which place they reach the business of Prattville, Gilboa and several other important points heretofore compelled to go to Cattskill. The company also expect to be running to Stamford early in September, 75 miles from the river.

☞ Messrs. Walker, Andrews & Co., No. 14 Wall st., this city, are offering the bonds of the Indiana and Illinois Central Railroad Company at 90 and accrued interest in currency. The road connects Indianapolis, Ind., with Decatur, Ill., and will be 152 miles in length. One million three hundred thousand dollars has already been expended upon the road, and $1,500,000 remains to be called from 20 subscribers, among whom we notice several prominent firms in this and adjacent cities. The bonds have thirty years to run, and bear interest at the rate of 7 per cent. per annum in gold, free of Government tax. The road connects at both ends with important through rail way lines, and passes through rich coal fields, which, it is anticipated, will furnish a large and remunerative traffic. The agents are prepared to furnish information in reference to the enterprise, and invite the attention of investors to the loan.

Statement of the Public Debt of the United States August 1, 1872.

Interest paid by United States, $16,570,575 54; interest repaid by transportation of mails, &c., $3,795,367 68; balance of interest paid by United States, $12,775,207 86.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 31, 1872.

GEO. S. BOUTWELL,
Secretary of the Treasury.

☞ The Glasgow *Herald* states that a company has been formed in Barrow in-Furness to establish a line of steam service between England and the Dominion of Canada and the United States. It was registered on the 3d ultimo, with a capital of £1,000,000 sterling, in shares of £25 each. The managers of the company are Messrs. Thomas, John and Andrew Charles Henderson, and Alexander Moffat, of the firm of Handyside & Henderson, of Glasgow, and Henderson Brothers, of Liverpool, London, New York, Chicago, etc. Three magnificent steamers of over 4,000 tons register, said to be the finest and swiftest that ever crossed the Atlantic, are almost ready for launching for the new company.

☞ The directors of the Middlesex Central Railroad have completed a contract for the building of the road from Lexington to Concord, and the work has already commenced. The terminus of the road in Concord will be on Monument street, and in another part of the town from the Fitchburg depot. This road is an extension of the Lexington Branch, now owned by the Lowell Railroad Corporation, and will be run by that corporation when completed. In time the road will be extended through towns above Concord to some point in New Hampshire, making a direct line from some main line already in existence.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, August 10, 1872.

Stock Exchange and Money Market.

There has been a more active inquiry noted for Money, chiefly on call at from 3@5 per cent. The demand from mercantile borrowers, though fair, has not been urgent, in any prominent instance, and lenders have been meeting the requirements of their customers on the basis of 6@7 per cent. per annum. The tendency at the close was toward increased firmness in the general market. The Fall season is now about opened, in most lines of commercial activity, and the prospect is of a livelier call for accommodation, for legitimate purposes. The city banks, while gaining moderately, last week, in their legal tender reserve, were heavy losers, in the averages of specie and deposits. The U. S. Sub-Treasury added largely to its coin balances chiefly through the enormous receipts from customs which amounted on the first of August, to $2,863,164 at this port alone, and for the week to $4,762,329.

The U. S. Sub-Treasury office last week added to its coin balance about 4⅞ millions and cut down its currency reserve about ½ a million. The office received during the week $4,063,359 of currency, and $7,541,816 of gold, the latter including $4,762,329 from customs; and disbursed $4,591,372 of currency, and $2,645,398 of gold, the latter embracing $1,278,368 of coin interest. The city banks enlarged their loan and discount average about ¼ million during the week, and again contracted their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $7,963,778, and a coin reserve of $47,108,282.

The city banks, in their latest return, show an increase of $1,299,800 of legal tender notes, with a loss of $4,572,800 of specie, and of $3,534,700 of deposits, also an addition of $291,300 to their loan and discount averages, and a contraction of $12,800 in their item of circulation. The city bank exchanges, last week, averaged 90, and thus far, this week, about 87 millions daily. The banks now hold $11,761,900 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $23,925,900, against $18,364,453 same time last year. The city bank deposits are now $241,528,000 against $252,892,427, week ending Aug. 5, 1871. The legal tender reserve amounts to $55,051,700, against $73,892,443 same time last year. The circulation now stands at $27,337,200 against $30,236,623 same time last year. The loans are now $295,428,200 against $300,770,261 at this date last year.

The coin reserve of the city banks is now about 23⅞ millions as against about 29⅛ millions on the 20th of July; the legal tender reserve is about 55 millions against 36⅝ millions on the statement of April 13th.

Government revenues have been yielding much more liberally, since our last, chiefly in the customs form, because of the unusually extensive withdrawal of goods under the revised tariff, which went into operation on the 1st of August. The excises yielded within the week about 3¼ millions, and thus far in the current fiscal year beginning with July 1, 1872, $16,423,729. The customs at the port of New York last week were $4,762,329; at the outports, equal to about $1,200,000 all in coin, or coin certificates.

Under the Treasury programme for August, Government proposes to sell gold as follows: Thursday, August 15, $1,000,000; Thursday, August 22, $2,000,000; Thursday, August 29, $1,000,000. And to buy in Five-Twenties, as follows: Wednesday, August 14, $1,000,000; Wednesday, August 21, $2,000,000; Wednesday, August 28, $1,000,000.

Gold has further advanced in price, on an active speculative and customs demand for coin, chiefly for prompt delivery. The export call has been comparatively moderate.

On Wednesday, the specie exports were $207,625.

The range of the price during the week has been from 115⅛@115⅝ and the closing quotation on Wednesday was 115¼@ against 115⅛115¼ the preceding Wednesday. The specie outflow last week, was $1,698,289. The Gold Exchange Bank clearances have averaged about 51⅜ millions per day during the week.

The customs demand for Gold last week, averaged $815,000 a day; thus far, this week,

has averaged $929,000 a day, or equal to a weekly aggregate of $5,574,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $51,069 and since Jan. 1, 1872, $2,790,522 against $7,424,449 same time in 1871 The total customs revenue of the Government, in coin, at this port, since January 1, has been $87,972,633 against $94,025,430 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $54,251,256, against $59,923,085 during the same time in 1871.

The export drain of specie was $1,698,289 last week, against $565,675 same week preceding year. The shipments since January 1, 1872, have been $54,681,039 against $51,503,016 during the same portion of 1871.

Foreign Exchange has been offered more freely and has been quoted lower, closing weak, on a restricted business. Bankers' sixty day bills on London closed onWednesday at 109@109⅛; sight bills on London, 109⅞@110.

The week's exports hence of domestic produce have been to the currency value of $5,278,242.

Government securities have been in fair demand, mostly for investment purposes, on home and foreign account, and prices have been well maintained, in most instances.

On Wednesday, Government bought in two millions of Five-Twenties at 114 72@144 88 out of an aggregate offering of $6,574,650.

U. S. sixes of 1881 at the close on Wednesday of the current week were quoted at 118⅛@118¼; U. S. Five-Twenties of 1862, (other than the bonds called in) 116⅜@116⅝; U. S. Five-Twenties of 1864 at 116⅜@116⅝; U. S. Five-Twenties of 1865, 116¾@117; U. S. Five-Twenties of 1865 consolidated, 115⅝@116⅛; U. S. Five Twenties of 1867, 115⅝@115¾; U. S. Five-Twenties of 1868, 115½@115¾; U. S. Ten-forties at 112⅞@113⅛; U. S. Fives of 1881 (Funding Loan) 112⅝@112¾; Six per cent. currency bonds, 113¾@113⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 24.	July 31.	Aug. 7.
Consols	92½	92¾	92½
U. S. 5-20's of 1862..	91	91	91¾
U. S. 5-20s, 1865....	92⅝	92⅜	92½
" 1867	91¾	93	92
" 10-40s	89¾	90⅛	90
New Fives of 1881...	89¼	89¼	89
Erie.	41¼	40⅞	39½

State bonds have been comparatively quiet and irregular as to prices. The Southern State obligations closed in favor of buyers.

Railway Mortgage Loans have been in fair demand chiefly on investment account, with a firm market noted for all the favorite loans. Central Pacific Sixes have been in good demand at 102@102¼. Chesapeake and Ohio have been in fair request at 94 per cent. and accrued interest.

Railway and Miscellaneous share property has been moderately active, but has been somewhat depressed as to values, closing weak, in the instances of most of the speculative favorites.

In the Metal line, the reports are of a good demand for Ingot Copper which has been held with more confidence; sales, 350,000 lbs. Lake at 33⅜c.@33½., and 50,000 lbs. English at 33c., with a large movement reported for forward delivery, without definite particulars. Pig iron has been held more firmly on a restricted offering and fair inquiry; sales, 100 tons Glengarnock at $55, and 100 tons Langloan at $53. Iron Rails have been actively sought after at buoyant rates; sales, 4,000 tons English and 2,000 tons American, on private terms, the former now quoted at $74@$76, gold, and the latter at $85@$87 50, currency, per ton. Of Russian Sheet-Iron, 200 packs were sold on private terms. Lead very dull at previous nominal figures. Of Silesian Spelter, 50 tons were sold at 7c., gold per lb. Pig-Tin has been quoted at 35c.@35½c., gold, for English and Straits, and 44c., gold, for Banca, on quiet market. Tin Plates have been firm and in request at $13 50, gold, for I. C. Charcoal; sales, 1,200 boxes, in lots, on private terms.

General business has shown more activity in the leading kinds of domestic produce. Cotton Breadstuffs, Pork, Lard, Bacon, Petroleum, Naval Stores, Wool and Fish closed with more firmness. Middling upland cotton closed heavily on Wednesday at 21⅝ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,673,453 bales, against 3,943,064 bales same time in the preceding year; exports 1,927,719 bales against 3,115,450 bales in the previous year; stock at the ports at latest dates, 110,450 bales against 161,100 bales same date 1871.

At the Live Stock Markets, Beeves have been in good demand at10@13½ cts.; Veals at 6½@10 cts.; Sheep tamer at 5½@7½ cts.; Lambs, 6@11 cts.; Swine, dull at 4½@4⅞ cts. per lb., all live weight. The week's receipts were 8,630 Beeves, 2,950 Veal Calves, 28,304 Sheep and Lambs; and 31,025 Swine.

Foreign goods have been attracting more attention and have been quoted steadier as to values, in the leading instances. The week's imports of foreign goods reached the amount of $7,378,540 including $3,159,406 of dry goods.

Ocean freights have been moderately active but rates have been unsettled, and generally lower. At the close, the market exhibited more steadiness.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Montevideo and her Railways.

Advices from Montevideo represent everything in a peaceful progressive state there, the Government being actively engaged in the work of reorganization, and improving the internal condition of the republic, after the long ordeal it had passed through by civil war. It was their unanimous determination to remain perfectly neutral in the contingency of hostilities arising between Brazil and the Argentine Republic, which, we need hardly add, would throw almost the entire commerce of the Plate into the hands of Montevideo. However, we sincerely trust that no such contingency will arise, and that Uruguay will continue to advance in the legitimate manner which its commercial position and great internal resources fully warrant. We may add that the Central Uruguay railway was proceeding satisfactorily, the revenue on the first section to Canelones being at the rate of upwards of 12 per cent., and the section to Santa Lucia was expected to be opened this month, a distance of nearly 40 miles from the city, when there was every certainty of the revenue being still more developed. The North Western Railway Company of Montevideo has been successfully launched here, the works being already commenced at Salto. This important line will open and develop an enormous traffic between Uruguay and Brazil.—*Brazil and River Plate Mail.*

☞ The work upon the St. Louis bridge is going forward rapidly. The superstructure will be completed about the middle of this month. The upper roadway will be fifty-four feet wide, including two sidewalks, each eight feet in width. This leaves a width of thirty-eight feet, which will be divided into four trainways—two for street cars and light driving, and two for heavy teams. Underneath the above will be a double track railroad. It is thought that both the bridge and the tunnel will be finished in a year from this time.

The Fiery Ordeal.

Our city and its suburbs have suffered most severely from the fiery ordeal within a few days past, the conflagrations not only have been numerous, but more than usually extensive and disastrous. Here again comes new evidence of the value of underwriting by which thousands are annually saved from ruin; men who have followed sensible advice, similar to that given to the Editors' and Publishers' Association by Mr. S. H. Parker, editor of the Geneva *Gazette*, at their late meeting. Said he:

"By the calamity of the recent fire in my office I learned another lesson at a frightful, though not, thank God, irreparable cost, and I would strongly impress such lesson upon you, especially upon you who have your worldly *all* invested in your printing office. Don't neglect adequate insurance. No matter if the rate seem excessive, pay what is demanded by responsible underwriters rather than assume yourself the entire risk. Devastation is quick and complete when once the fire demon seizes hold of a printing office. He who has provided for indemnity hears the alarm bell, so full of dread to the uninsured, with scarcely a perceptible quickening of the pulse, except in sympathy with others less thoughtful and less fortunate."

To those desiring to insure safely and satisfactorily we can commend, with great confidence, the WASHINGTON FIRE INSURANCE COMPANY, of New York, office No. 172 Broadway, corner of Maiden Lane. The Washington is conducted by well-known underwriters of great experience and unblemished integrity; gentlemen who place risks carefully, and meet all losses promptly and equitably. The "Washington" grants full immunity from loss or damage by fire on buildings, merchandise, furniture, rents, leases, and other insurable property, also on inland Navigation and transportation, at rates as reasonable as other first-class companies.

Peach Bottom Railroad.

Stephen G. Boyd, Esq., recently returned from Oxford, Chester county, where he met Messrs. Clark, Smith & Co., contractors, of Philadelphia, to complete articles of agreement with them for the graduation and masonry of the eastern division of the Peach Bottom Railroad, extending from the Susquehanna river, at Peach Bottom, to Oxford, Chester county. The contractors bind themselves to complete the graduation and masonry of their division by the 1st of August, 1873. They represent a working capital of over half a million of dollars. The estimated cost of the graduation and masonry of the eastern division is $54,600. The books show a present stock subscription of $62,000 east of the river to meet this. Col. Hood commenced the location of this division at Oxford, and has already located some eight miles.—*York (Pa.) Gazette.*

☞ The estimated earnings of the Erie Railway for the week ending July 31, 1872, were $383,251; against $396,941 for the corresponding period of 1871—a decrease of $13,690. Total earnings since April 1, 1872, $6,339,975—an increase over the same time in 1871 of $424,078.

☞ Burden cars are now running on the Metropolitan Branch of the Baltimore and Ohio Railroad as far as Rockville, a distance of 15 miles from Washington. Passenger trains will commence running about the 1st of September.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Besides being the obligation of a wealthy corporation, composed of men of experience and high-toned commercial integrity, they are secured by a first mortgage on the road, revennes, land grant, franchise and equipments, combined in one mortgage, and are readily negotiable both in the markets of this country and Europe.

A liberal sinking fund provided in the mortgage deed must advance the price upon the closing of the loan. Principal and interest payable in GOLD. Interest at eight (8 p. c.) per cent. per annum, payable, semi-annually, free of tax Principal in thirty years. Denominations, $1,000, $500 and $100, Coupons or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

The diminished quantity of these Bonds for sale, and the increased demand absorbing them, warrant the belief they will soon be sought for at an advance considerably above the present subscription price at which they can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.

BANKERS,

NO. 11 WALL STREET.

☞ The Philadelphia *Ledger* of 5th inst., reports the net anthracite coal tonnage for the week ending on the 27th ult., from all sources, at 409,878 tons, and for the year 10,740,988 tons, against 6,369,442 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,371,546 tons. The production of bituminous coal for the week was 53,021 tons, and for the year 1,388,836 tons, against 1,243,523 tons to the corresponding time last year—an increase of 145,313 tons. The total production of all kinds of coal for the week was 462,399 tons, and for the year 12,139,824 tons, against 7,612,965 tons to corresponding time last year, showing an increase of 4,516,859 tons.

☞ A corps of engineers has commenced the survey of the Uniontown, Paducah and Southern railroad.

Journal of Railroad Law.

COMMON CARRIERS—BILL OF LADING—CONDITIONS AS TO DELIVERY.

The facts in the recent case of McEwen and another *vs.* The Jeffersonville, Madison and Indianapolis Railroad Company, (33 Ind., 368,) are fully and clearly stated in the following opinion by—

ELLIOT, J.—The contract of shipment, which is the basis of the complaint, is contained in the bill of lading, by which the appellee acknowledged the receipt of the flour from Jones & Co. and agreed to deliver it to Comstock & Co., at the regular station at Indianapolis, on payment of freight "*and presentation of duplicate hereof.*" The latter clause, which we have italicised, was inserted in the bill of lading by the appellee's agent, at the instance of Jones & Co. The reason for which was, as alleged in the complaint that Jones & Co. had previously contracted the flour to Comstock & Co., to be delivered on cars on the appellee's railroad, and to be paid for on the receipt of the bill of lading. Comstock & Co. had in the meantime become insolvent, and Jones & Co. did not intend that the flour should pass to their possession until it was paid for. This they intended to guard by the insertion of a clause in the bill of lading making it a condition to the delivery of the flour that Comstock & Co. should first present to the appellee the duplicate bill of lading. Jones & Co. did not forward the duplicate to Comstock & Co. but transferred it by endorsement, with a draft drawn on the latter for the price of the flour, which they negotiated with the appellants, by whom it, with the bill of lading attached, was forwarded to Indianapolis for collection. Comstock & Co. did not pay the draft on presentation and consequently the bill of lading was not delivered to them; and, therefore, they could not present it to the appellee; but the latter delivered the flour without its presentation.

Comstock & Co. were the consignees of the flour, and, in the absence of any condition being annexed to the delivery, would have been entitled to its possession on its arrival at Indianapolis, by paying the freight. The question, therefore, as to the sufficiency of the complaint depends upon the proper meaning and legal effect of the clause of the bill of lading, "and presentation of duplicate hereof."

It is contended by appellee's counsel that this clause in the bill of lading must be regarded as having been inserted for the benefit of the carrier as a means of identifying the consignees; the railroad company was responsible for the delivery of the flour to Comstock & Co. to the consignees; and that in delivering it to them without the presentation of the duplicate bill of lading, the only risk incurred was that of the proper identity of the persons named as consignees. No direct authority is cited in support of that proposition; but it is claimed that it stands upon the same footing as the other provision in the bill of lading, "upon payment of the freight," and it is insisted that it is settled by the authorities that this latter provision in bills of lading is always regarded as having been inserted for the benefit of the carrier, which he may disregard in the delivery of the goods to the consignee and look to the consignor for the freight. But this proposition is too broadly stated, and not sustained by the cases cited, In Collins & Timberlake *vs.* The Union Transportation Co., 10 Watts 384, the goods were shipped by E. and D. Gratz, commission and forwarding merchants, for Collins & Timberlake who were merchants in Lexington, Ky., and the owners of the goods which, were consigned to Hutchinson & Leslie a commission and forwarding house in Pittsburgh, and to be delivered to them "upon the payment of freights." The goods were carried by the Union Transportation Co. and delivered to Hutchinson & Leslie without the payment of the freight who forwarded them to Collins & Timberlake and they paid the freight to Hutchinson & Leslie. The latter became insolvent. The Union Transportation Co. then sued Collins & Timberlake for the freight and it was held that they were liable. It is said in the opinion of the Court "that the stipulation in a bill of lading, for delivery on payment of freight is introduced for the benefit of the consignor, or the party for whom the consignee is agent" and that "if the agent should be faithless, the loss should fall on those who trusted him, and they ought to bear it."

Barker *vs.* Havens, 17 Jons. 234, is also cited. In that case the owner of goods shipped them on the plaintiff's vessel to be carried from New York to Liverpool, to be delivered to C., the consignee, he paying freight, &c. The master delivered the goods to the consignee without receiving the freights, which the consignee subsequently refused to pay. The suit was brought against the consignor the owner of the goods, and he was held liable for the freight. But it was said by Spencer, Ch. J., who delivered the opinion of the Court, that he should be clearly of opinion "that if it appeared that the goods were not owned by the consignor and were not shipped on his account, and for his benefit, the carrier would not be entitled to call on the consignor for the freight." This, upon principle, would seem to be the proper rule in such cases. If the owner consigns the goods for his own benefit, to his agent, and the latter refuses to pay the freight though the carrier is not bound to deliver the goods to him until the freight is paid, still the owner of the goods should be liable. But if the consignee is the owner of the goods, and they are shipped for his benefit, it is his duty to pay the freight; and if it is so stipulated in the bill of lading the carrier must look to him alone for the freight.

Shepard *vs.* De Bernales, 13 East. 565 is cited in both the foregoing cases as a leading case on this subject, and accords with the opinion expressed above.

But the stipulation that the goods were to be delivered to Comstock & Co. upon the presentation of the duplicate bill of lading does not rest on the same foundation as that for the payment of freight. It is true that an unconditional consignment of goods to a consignee by name is *prima facie* evidence that he is the owner and entitled to the possession of them, but it is not conclusive, and in many cases the consignee is but the agent of the consignor and receives the goods for his benefit. It is the right of the shipper or consignor, in naming a consignee, to subject the delivery of the goods to him to any condition deemed proper by the consignor, and if upon the arrival of the goods at the place of destination, the consignee does not comply with the condition, the carrier may discharge his liability as such by storing the goods in a proper warehouse subject to the order of the shipper. In such a case the carrier is the agent of the shipper and his primary duty is "to observe the instructions of his principal, and when he disregards them he voluntarily assumes a responsibility by which he must content himself to abide." Johnson *vs.* N. Y. Cent. R. R. Co., 33 N. Y., 610.

In this case, the stipulation in the bill of lading that the flour should be delivered to Comstock & Co. upon the presentation by them of the duplicate bill of lading, was inserted at the instance of Jones & Co. for their benefit and protection. It constituted a condition to the delivery of the flour to Comstock & Co. that they should first present the duplicate bill of lading to the appellee, and without which the latter was not authorized to deliver the flour to them. The duplicate bill of lading was delivered to Jones & Co. by the agent of the appellee; it could not be in the possession of Comstock & Co. until it was delivered or transmitted to them by or through Jones & Co; and until it was received by them they were not authorized to receive the flour. By the contract of sale, Comstock & Co. were to pay for the flour on presentation of the duplicate bill of lading; and as they had become insolvent, care was taken to have the bill of lading with a draft for the price of the flour, presented to them before the arrival of the flour at Indianapolis. The draft was not paid, and the bill of lading was not, therefore, delivered to them; and if the appellee had observed the condition annexed to the delivery of the flour, the appellants as the assignees of Jones & Co. would have been protected from loss. The loss resulted from the wrongful delivery of the flour by the appellee, without requiring the production of the duplicate bill of lading. The delivery was in violation of the instruction of the consignor and the appellee must suffer the consequences.

But it is contended that under the contract between Jones & Co. and Comstock & Co. as stated in the complaint the right of property in the flour vested in Comstock & Co. as soon as it was placed on the appellee's cars at Columbus, and that they were therefore, entitled to its possession on its arrival at Indianapolis. We do not think so. Had the bill of lading stipulated for the delivery of the flour under the contract of sale to Comstock & Co. unconditionally, on its arrival at Indianapolis, the right of property would undoubtedly have vested in them, subject only to the right of Jones & Co. or their assigns of stoppage *intransitu* before delivery. But as between Jones & Co. the consignor and the carrier it was the privilege of the former to answer a condition to the shipment and delivery of the flour to Comstock & Co. by which the former would retain the control of the possession. It is conceded that if the shipment had been made subject to the order of Jones & Co. though intended to be applied to the contract with Comstock & Co. the latter could not have claimed possession without the order of Jones & Co; and we think that precisely the same result was effected by the stipulation that Comstock & Co. should present the duplicate bill of lading before receiving the flour and then withholding the bill of lading from them until the flour should be paid for. See Angell on Carriers, 424

§ 511. The discount of the draft by the appellants and the assignment and delivery to them of the duplicate bill of lading by Jones Co. amounted to a sale of the flour to the appellants in trust, to be delivered to Comstock & Co. if they paid for it on presentation of the draft and duplicate bill of lading, or in case they refused them to sell the flour and pay the draft.

It is claimed however that when Comstock and Co. accepted the draft, they were entitled to the possession of the flour. By the terms of the contract, as stated in the complaint the draft, if it be accompanied by the bill of lading, was payable on presentation, and Comstock & Co. were not entitled to three days of grace; and the error of the appellant's agent in allowing that time before protesting the draft for non-payment did not entitled Comstock & Co. to receive the flour without the duplicate bill of lading. The appellants were secure in their lien on the flour so long as they withheld from Comstock & Co. the duplicate bill of lading if the appellee had not violated the stipulation requiring the production of the duplicate before the delivery of the flour.

The third paragraph of the answer was manifestly bad. It admits, in effect, that the agent who signed the bill of lading was the appellee's station agent at Columbus, where the flour was shipped with authority to receive and forward freights which necessarily included the power to make and sign bills of lading and receipts for freights shipped at that point. It was the right of the shipper to name the consignee and annex such conditions as he deemed proper to the delivery to him of the goods shipped; and the fact that the agent was furnished blank bills of lading, which did not specify any condition to the delivery of goods shipped, would not limit the power of the agent in that respect.

Judgment reversed with costs and the case remanded with directions to the Circuit Court to overrule the demurrer to the complaint and sustain it to the third paragraph of the answer.

☞ The track of the Chicago and Northwestern railroad is laid three miles beyond Wonewoc, and it is expected will be completed in three weeks to Leroy, at or near which the junction with the West Wisconsin Railroad is to be made.

☞ The viaduct across the Normanskill, on the Athens branch of the New York Central Railroad, will consist of three spans of fifty feet wide and one of seventy eight feet. The viaduct when completed will cost about $75,000.

☞ A new route for the Massachusetts Central Railroad is to be surveyed from Belchertown to Amherst, which it is hoped, will prove practicable.

☞ The work of grading the Prince Edward Island Railway is progressing rapidly.

Notice to Contractors.

MISSISSIPPI CENTRAL RAILROAD EXTENSION.

Sealed proposals will be received until the 15th day of August, 1872, at the Engineer's Office of the Mississippi Central Railroad Company in Jackson, Tenn. for the clearing and grubbing, grading and bridging, on about one hundred and seven miles of road, extending north from Jackson to Cairo.

This work embraces large quantities of earth excavation, pile and trestle bridging, and is worthy the attention of experienced railroad contractors.

Profiles, approximate estimates, general plans, specifications, and forms of contracts, can be seen at the Engineer's Office after Aug. 1.

The Company reserve the right to reject any or all bids.

Proposals must be indorsed "Proposals for Work," and addressed to

H. S. McCOMB, President; or,

SPENCERIAN
DOUBLE ELASTIC

STEEL PENS.

These Pens are of superior English manufacture, and are a nearer approximation to the real **SWAN QUILL** than anything hitherto invented. We have recently added a new pen to the number, of great superiority where fine writing is desirable, which

we designate **THE QUEEN,** Or, No. 15.

The Spencerian Pens are for Sale everywhere, in gross and quarter gross boxes.

☞ A *Sample* Card, containing all the 15 **numbers,** securely enclosed, will be sent by mail, on receipt of **25 cents.** Address

IVISON, BLAKEMAN, TAYLOR & CO.,
138 and 140 GRAND STREET, N. Y.

NOTICE.

All the Machinery of the New York Railroad Chair Works at private sale. Two Chair Machines; Three Burden Spike Machines; Bolt Heading Machine; Patent Bolt Cutters; Cold Pressed Nut Machine; Heavy Presses, Shears; One 60-horse Engine; One 20-horse do., Boilers, Lathes, &c., &c., at low prices. All in the best order. Apply at factory cor. Morgan and Washington streets, Jersey City, or J. B DAVENPORT, 85 John street, N. Y. (Box 3,041, P. O.) Lists at both places. This is a rare opportunity to buy *good* machinery.

ENGINEER'S FIELD BOOK,

By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

CAMP'S IMPROVED DUMPING CAR.

(Used by the American Dredging Company.)

RIGHTS FOR SALE BY

N. H. CAMP,

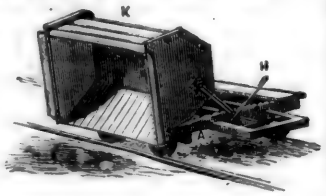

Fig. No. 1, Car Loaded. Fig. No. 2, Car Dumped.

TO DUMP THE CAR.

The Brakeman seizes the lever H, and raises it, thus removing the step from under the box-support A, when the weight of the load causes the box to roll over to the position shown in Fig. 2.

To replace the box in readiness for another load.

The Brakeman, standing on the platform, reaches over, and grasping the corner of the box, pulls it back to its place.

Address, N. H. CAMP,
Care N. C. MILLER, 61 Broadway, New York City:

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**

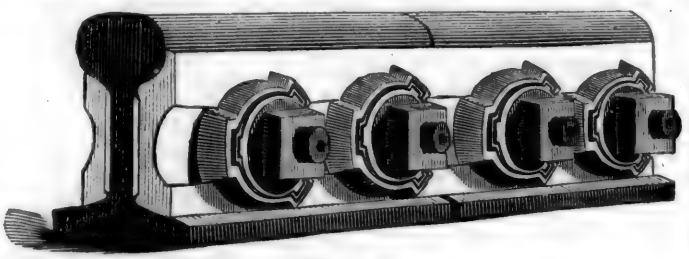
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

INVESTMENT SECURITIES.

The Northern Pacific Railroad Company, through its Financial Agents, offers for sale its First Mortgage 7-30 Gold Bonds. They fall due in 30 years, bear 7 3-10 per cent. gold interest, payable semi-annually, are exempt from U. S. tax to the holder, and are secured by a first and only mortgage on

1. The Railroad, its Right of Way, Franchise Rolling Stock, and other Property.

2. Its Traffic or Net Earnings.

3. A Government Grant of Land averaging on completion of the Road about 23,000 acres per mile of track.

The Road follows what is known as the Valley Route to the Pacific, flanked most of the way by an excellent country, and is assured in advance of a vast and profitable traffic which already awaits its completion. The work of construction is steadily and satisfactorily progressing; the settlement of the adjacent country and the building of towns keep pace with the advance of the road; a large body of the Company's lands is already in market, and the proceeds of sales will constitute a Sinking Fund for the redemption of the Company's Bonds, which are convertible at 110 into the Company's Lands at market prices.

Believing that these bonds, both in point of safety and profitableness, constitute such a security as judicious investors can approve, we recommend them to the public. Government bonds and all marketable securities are received in exchange at current quotations without cost to the investor.

JAY COOKE & CO.,

New York, Philadelphia and Washington.

FINANCIAL AGENTS NORTHERN PACIFIC RAILROAD COMPANY.

The St. Joseph and Denver City Railroad.

As this important line of communication between the Atlantic and the Pacific Oceans approaches completion, it is interesting to consider its relations with the railroad system of the country, and its prospects as a means of opening, to settlement and trade, one of the most attractive regions of the Great West.

Already, in discussing this subject, we have pointed out the excellent position which this railroad will occupy with reference to inter-oceanic traffic. It connects by a direct line with the East, an important point on the Pacific Railroad, which cannot be otherwise reached except over a long and circuitous route, involving great delay and increased expense. It will be in this connection what the Hudson River Railroad is, as a means of communication between Albany and New York, as compared with the old Housatonic line, which took New Yorkers to Albany by way of Bridgeport, in Connecticut. No sooner, was the former built than the latter was entirely superseded. There can be no doubt that the St. Joseph and Denver City Railroad will hold equal rank with the Hudson River Railroad as a means of direct communication between the great systems of railroad lying on the Atlantic and Pacific slopes of the Rocky Mountains.

Another fact which tends to assure the permanent prosperity of the St. Joseph and Denver City Railroad, is the exceeding fertility of the soil and the salubrity of the climate, in the region through which it is built. And what is more, it is almost the only region which invites the immigration of an agricultural population between the degrees of longitude which mark its Eastern and Western termini. "Westward the star of Empire takes it way," and all efforts to divert immigration to the North or the South of the middle parallels, are attended with but indifferent success. It has always been so from the time of the incursion of the Huns under Atila into Europe till the present time, and it always will be so. People, in their migrations, have pretty uniformly followed the parallel of latitude under which they have been accustomed to live. In the early settlement of this country, we find the English, the Dutch and the Swedes stretched along the Atlantic Coast,

north of the Savannah River, while the Spaniards, who were the other great colonizing people of that time, were found in Florida, Mexico and the West Indies. Thus, from the very nature of things—the instinct, so to speak, which oftens controls the action of even reasonable beings—the line of the St. Joseph and Denver City Railroad must attract a large and steady flow of population. As regards nearness to markets, it is quite as favorably situated as the greater part of Iowa and Minnesota; while as regards home and near-by demand, its location is unrivalled. It will naturally be called upon to furnish large quantities of food to the receiving districts, which are not distant from the Western terminus of the road.

In the progress of the Railroad towards completion, the lands granted by Congress in its aid appreciate rapidly in value, and contribute in a corresponding ratio to the security upon which its issue of bonds is based. All railroads constructed as this has been, and under similar auspices, have proved to be property of the most substantial value. But in favor of this road, there is one favorable circumstance which may be credited to its good fortune. The value of the rails as laid down, and of the rolling stock, has nearly doubled since their purchase. In the advanced cost of iron we have not only an increase in the value of the road above its cost, but a check upon the construction of any competing lines—thus operating in a double sense in its favor.

The St. Joseph and Denver City Railroad is 300 miles long. Its route has presented but few engineering difficulties, and it has been well built at a very moderate cost. Its bonds are issued at 8 per cent. as were those of many other railroads which would now have no difficulty in borrowing all that was needed at 6 per cent. Other roads, constructed under similar circumstances but a few years ago, are now in excellent credit. The St. Joseph and Denver City Railroad ought, in reality to borrow at seven per cent., but as eight per cent. seems to have been adopted as the current rate, the directors, with a liberal spirit, decided not to depart from it. These bonds, to a comparatively small amount, are now on the market to complete the equipment of the road, and meet some floating obligations, such as naturally arise in finishing any great work. When the road shall be fully in operation, its earnings and the sale of its lands will provide for all calls upon the treasurer of the company, including the means to pay the interest on its bonds. Other roads, less favorably situated, have by these means, nearly paid for their construction in a few years; and there is no reason to doubt that perfect success will attend the present undertaking.

Illinois and St. Louis Bridge.

Those not familiar with bridge work are unable to appreciate the progress daily being made on the great Illinois and St. Louis Bridge, which, before our public are hardly aware of it, will span the mighty Mississippi, and not only connect two great States, but give an impetus to the pursuits of the commerce of the nation. Those passing any portion of the bridge work look with wonderful eyes at the labor already performed, yet few of them can comprehend the magnitude of the undertaking. When completed, we shall not only have one of the largest, but one of the finest bridges in the world. From the west abutment, on the levee, to Third street, at the tunnel entrance, the superstructure is ready for the track, and the upper roadway is in course of construction, the planks for which are being sawed on the spot by a portable saw mill. The planks are fitted together by dowels, an ingenious method having been devised by Mr. Kattle for drilling the holes and cutting the pins with the same machinery which cuts the planks in the saw mill. The west pier is completed, and the workmen have all been withdrawn from it, being transferred to the east pier, upon which there are now about a hundred men employed. The east pier will be up to its full height in about three weeks. On the Illinois side there are some four hundred men employed on the bridge work. The whole superstructure will be finished in less than two months. There have been delivered in Pittsburg, up to July 25, by the Butcher Steel Company, of Philadelphia, 3,231,128 pounds of cast steel, which material the Keystone Bridge Company of that city works into its various shapes, ready to be fitted and put up. Besides this quantity of steel, there have been manufactured in Pittsburgh, 1,808,139 pounds of wrought iron, mostly in bars and round iron. In addition to this, forty-eight ponderous skewbacks, each weighing over three tons, have been forged in solid mass and delivered in Pittsburgh. They were manufactured by establishments in New York, Pennsylvania and Connecticut. Of cast iron, over 5,000,000 pounds are now in the bridge works, all manufactured by our home foundries. Of the 1,000 tubes which comprise the arches, there are 287 finished, over two-thirds of the material for the balance is on hand in the Keystone Bridge Company's works, which are employed day and night turning them into shape. The other material is correspondingly advanced. The first big skewback, with the tube properly attached, was shipped on the 30th from Pittsburgh for St. Louis, and it will be put in position as soon as it arrives.—*St. Louis Globe, Aug.* 13.

Michigan Central Railroad.

The earnings of this road for the years ending May 31, 1871 and 1872, have been as follows:

	1871.	1872.

Station "	709,372 87	728,175 14
Fuel	471,731 25	569,808 78
Oil and waste	64,362 18	81,202 22
Stationery, etc	37,544 47	41,174 87
Local taxes	82,724 27	48,087 62
Telegraph	38,585 11	65,778 82
Miscellaneous	74,847 46	88,323 73
	$3,538,204 45	$3,719,348 67
Net earnings	$1,439,865 70	$1,593,725 36

Compared with the previous year the gross earnings show an increase of $335,003 88, with an increase in expenses of $181,144 22—making the increase in net earnings $153,859 66.

The earnings from passengers show a decrease of $50,924 89 and the earnings from freight, an increase of $307,067 96, with an increase in mails and miscellaneous of $78,860 81.

Passenger earnings per mile were $5,941 04, freight, $11,900 09, miscellaneous, $866 87—total $18,708, an increase compared with the previous year of $1,179 60.

The expenses of operating the road (not including taxes) were $3,653,574 85, or 68.80 per cent. In 1871, they were 69.41 per cent., in 1870, 61.6 per cent., in 1869, 59 per cent., in 1868, 48.38, and in 1867, 62.81. The expenses, including taxes, the past year were 70 per cent., against 70.3 per cent. in 1871, 64.3 per cent. in 1870, 61.21 in 1869, 60.71 in 1868, and 65.35 in 1867.

The following is a comparative statement of the earnings of the entire line, including branches, for the fiscal years ending May 31—

	1871.	1872.
Passengers	$1,912,278 07	$2 114,066 44
Freight	3,329,680 70	4,046,198 76
Miscellaneous	178,214 62	281,147 36
	$5,420,123 39	$6,441,412 56
Operating expenses	$3,774,850 51	$4,377,614 39
Taxes	86,160 84	70,189 07
	$3,861,011 35	$4,447,803 46
Net earnings	$1,559,112 04	$1,993,609 10

The ratio of expenses to earnings in 1872 is 70.64, against 71.11 in 1871; exclusive of taxes, 67.96 in 1872, against 69.98 in 1871, The President in his report says:

Since last year, and for a period of nine months, the earnings of the Jackson, Lansing and Saginaw Road have been added to the revenues of this company. The operating expenses of this road have also been included in the above statement of expenses.

The gross earnings of all the lines operated by the company have been in excess of those of last year by	$1,021,289 17
It will be seen that the gross expenses have been in excess of those of last year by	602,763 88
Leaving the net earnings in excess of those of last year	$418,525 29

This, however, does not indicate so much increased prosperity, because it arises largely from adding the revenues of the Jackson, Lansing and Saginaw, leased during the past year, to the other revenues of the company.

The earnings of the company have somewhat more than maintained themselves, and in the circumstances perhaps would be deemed satisfactory.

The amount, however, might have been so very much larger, but for the causes hereinafter stated, that it is very evident that the further and very large expenditures now making for double track and other additions to the ability of the road to meet the wants of business, have been delayed even longer than was required by the real interests of the road.

The statements made in the reports for several years past show, that while the earnings of the Main Line have been steadily increasing until limited by the ability of the road to meet the demands of traffic, the relative expenses of operation have been still more rapidly increasing, and the net earnings have been relatively less. Several causes have contributed to this result, some of which are temporary, but the more important of which arises from the fact, simply, that the increase of business has been so rapid that our improvements have not kept pace with it.

Station grounds at Chicago and Detroit, which were ample for the business five years ago, have been, the last two years, far too small. Machine shops and car-repairing shops, adequate then, have become totally unequal to the task imposed upon them now. Then, a single track did the business with ease, while now, with twice as many trains as then, it has, at times, and for long times, been impossible to get over it with despatch. Then, iron could still profitably be used for rails; now, and with such business, and especially with such a winter as the last, they must be

renewed by far too often, to say nothing of the impossibility of maintaining an even and smooth track.

All these causes have been contributing to the increased operating expenses, until they amount to quite seventy per cent. of the gross business, while, with proper improvements, they should not exceed, at the outside, sixty.

It will, perhaps, be well to look a little to the past history and progress of the business, both that we may judge of the future, and also because it may perhaps show why all the appointments of the road are not equal to the exigencies of the past year or two.

In 1858 the company owned ninety-eight locomotives, and most of them were small and light, such as were adapted to the business of the road from 1846 to that date. From that date the increase of business for the next ten years had not been sufficient to render it necessary to add a single locomotive to the power.

The number of freight cars of all kinds, in 1858, was 979, and there had been an increase of these of only fifty a year, upon an average, there having been upon the road, in 1868, in all, 1,452 freight cars, of which 103 were Blue Line cars, that line then having been just formed, and making a most important era in the history of the road.

The gross earnings were as follows for the several years stated :—

1858	$2,428,757 52
1859	1,838,129 69
1860	1,832,944 86
1861	2,058,052 61
During the war and up to 1867, they had increased to	4,325,490 51

Up to that time both the power and equipment were adequate to the business, and it was not till 1870 that the traffic began to exceed the fair and reasonable means of doing it.

The number of tons of freight of all kinds moved upon the road in 1859 was 235,123. This had gradually increased in eight years to 578,177 tons. The gross tonnage for the past year has been 1,238,318 tons, being considerably more than twice as much as it was five years since, and three times that of 1862.

There is no reason to doubt that had the road been able to meet the demands of business during the past year, the increase of tonnage would have been larger than in any preceding one.

It was not easy, when the power of the road had been so long stationary, and yet equal to the traffic, to realize that it should be fully doubled in two or three years, and that in all other respects its ability, though it had already been greatly enlarged, should fall so far short.

The vast extension of railroads, west of Chicago especially, and the rapid settlement and developement of great extent of country through which they run, and the consequent multiplication of all kinds of business since the restoration of peace, presents a spectacle of progress perhaps unequalled at any time in the history of the country.

The result has been that during the past year, all the avenues eastward of Chicago have been unequal to the task required of them, though the Michigan Central Road has perhaps the most suffered by reason of it. There were, however, causes peculiar to the Michigan Central which added much to its embarrassment.

The Chicago fire not only destroyed all our buildings at Chicago, and all our means of handling freight there under cover for a considerable time, but created a demand for brick, lumber and other building material theretofore wholly unprecedented, and while totally unable to do the usual business of the road there, a very large traffic in those coarse articles was thrown upon it from roads connecting with it and running into the northern part of the state of Michigan. The difficulty of doing business at Chicago being so great that the cars for ordinary merchandise could not be handled there with any despatch, they were stored upon side tracks east of Chicago until they could, as their turn came, be taken in and unloaded and perhaps reloaded for their return. Adding to this the traffic, which was very large, in lumber and brick and other building material, and all the side tracks of the road for the west half of it were filled with loaded freight cars. It will be readily seen that the difficulty of doing business was very great, as well as the expense also. From 500 to 800 cars were, on the average, for the winter, waiting for entrance to Chicago.

This, however, does not comprise all the difficulties which have beset the business of the road during the year. The winter has been one of extraordinary severity and duration. The ice in the Detroit River has been so solid that for two periods, of about a month in all, it has been impracticable to send the freight across it, while it has been done with great difficulty during a period of nearly four months. During the cold weather, therefore, our east-bound cars as well as our west-bound have accumulated at Detroit on both sides of the river awaiting passage. At two periods, of about a fortnight each, this accumulation of loaded cars, going east, on the Michigan Central Road, stored upon its side tracks thus waiting, has run up to 1,100 and 1 200 cars. These difficulties, both at the west and the east end of the road, have been such as no human foresight could have fully obviated. The board would, however, be glad if they had ended with the approach of spring.

The Great Western Railroad Company owns the ferry across the river and undertakes to do the business there. The great increase of tonnage has swollen the traffic to such a volume, that the boats have been unable to take it across, and since the ice passed out of the river there have been, most of the time, accumulations of loaded cars on the side track at and near Detroit, sometimes amounting to upwards of 500. This it has been totally out of the power of the officers of the company to prevent or obviate. The new boat of the Great Western Company, which should have been done during the winter, will probably soon remedy this difficulty.

If to all these causes the effect of the severe cold of a very long winter, and of the heavy traffic, in spite of all these difficulties, upon the iron rail of a single track, and of its consequently worn and rough condition upon machinery, be taken into consideration, stockholders will perhaps appreciate the position of their road and its difficulties during the last six months. So rapidly did iron give way, that even during the intense coal weather, from December to March inclusive, there have been removed and replaced thirty-five miles of rail, which were in good condition when the winter set in, and much of the rail not removed was much injured.

For several years the station grounds at Chicago have been becoming more and more inadequate to the business, and though suffering greatly for want of room it has been impossible to obtain it. At times it has seemed as if the present terminus there must be abandoned. The fire at Chicago, so destructive in other respects, has relieved the company of this difficulty, to a great extent at least, and it is now believed that all the necessary grounds can be obtained for freight purposes. Already, by means of some additional ground purchased, the accommodations for handling freight have been increased nearly threefold—enough certainly to afford very great relief and save the large expenses of double forces at work every day and night of the week, as has been the case heretofore. At Detroit also the station grounds have been much enlarged. Though not all they should be, yet great progress has been made towards making them such. It is believed that at both ends of the road there will soon be provided ample room for all the necessities of business.

Upwards of a year ago, ample grounds were purchased at Jackson, for a site for machine shops. The distance from Detroit is seventy-six miles. At that place the Air Line and Main line, the Grand River Valley, and Jackson, Lansing and Saginaw roads come together, making it by much the most convenient place for the shops for repairs of machinery.

They were commenced last year on a scale commensurate with the necessities of the case, and some portion of them are about ready for use. The relief in the machine shops of the road will at once be felt, and when they are fully ready they will contribute very greatly to the economy of keeping the power of the company in good condition.

It will be necessary, also, to provide elsewhere than upon the station grounds at Detroit, shops for the building and repair of cars, and measures have been taken also for an early accomplishment of this object. With adequate and convenient machine and car shops, the saving in the two departments will be a very large sum annually. These two improvements have long been felt to be expedient. They had at last become an imperative necessity.

The power of the company had been increased last year, or rather, before the fall of 1871, very largely, by disposing of the small, light engines, and replacing them with new and powerful ones, and by adding to the number. The total number of engines now upon the road is 162, and contracts were made in the fall for 30 more, which are now arriving, making 102 which will soon be in use.

The number of freight cars of all kinds has already been increased to 3,062, an increase of 1,135 since the last report, and are to be made adequate in number to supply the demand this season.

There have been laid in the main track ninety-five miles of steel rails, most of it during the past year. There were laid also during the last year twenty-three miles of siding.

The board has been slow to give perfect confidence to the steel rails, and has adopted them later than has been expedient probably for the interests of the company. Having, however, become fully convinced of their necessity by the rapid failure of the iron, the rail is being renewed wholly with steel, and within a short time the track will be all of that material. During the year the entire distance from Detroit to Jackson, and from Niles to the connection of the track of this company with that of the Illinois Central road will be laid wholly with steel rail.

The double track for the road is now in rapid progress from Ypsilanti into Detroit, thirty miles, and from Niles to Lake Station, fifty-eight miles. The business from the West comes upon the main line of the road at Chicago, and at Lake Station, from Joliet in Illinois. At that point over the Joliet branch, the Michigan Central road connects with the Alton and St. Louis, and the Chicago and Rock Island Railroads. From that station, and from others on the branch, this company receives a large amount of business. At Lake Station, this traffic and that from Chicago come together and pass upon one track to Niles, making that portion of the road bear perhaps as heavy a burden as any part of the line. Hence the necessity for a double track there as early as anywhere.

From Niles to Jackson by means of the Air Line the track is double, and with the double track from Ypsilanti to Detroit also laid, there will remain less than fifty miles between the former place and Jackson to be laid another year, when the entire line will be double track. All the rails to be laid this year, both in the old and new track, are to be steel. To accomplish this, contracts were made during the last season and winter for 14,000 tons of steel rails, by authority of the board, which are now arriving in Michigan.

It is believed that these improvements in the track, and with the enlarged grounds, both at Chicago and Detroit, and ample means of repairing both cars and machinery with economy, it is not unreasonable to expect that the expenses of operation may be reduced to sixty per cent. of the gross earnings, while they themselves will also be very largely increased.

The chief causes which have limited the earnings and swollen the expenses, have been suffi-

ciently set out above. There is one, however somewhat remarkable, where an increased business has actually both diminished earnings and also added to the expenses. Allusion has been made to the quantity of building materials seeking Chicago during the winter. A large quantity of this came from the Chicago and Michigan Lake Shore road. The haulage on the Michigan Central was only sixty-six miles. It could not be thrown off the road, and the haulage is so short that a price adequate to the inconvenience of the business at that time and under the circumstances, could not be charged for it. It contributed to intensify the difficulties of the winter, and though with a double track and means of doing it this traffic will be valuable, yet while the difficulties lasted this particular traffic stood in the way of the long business, and enhanced the cost of doing it also. The passenger business, however, from that road constituted a tolerably satisfactory compensation. The aggregate business furnished by that road to this company the past year has been considerably more than $100,000.

With regard to another cause of limited earnings, we quote language found in the last report of the Lake Shore and Michigan Southern Company:—

"During the last six months of 1871, a ruinous competition existed on westward-bound freights, between the trunk lines (the Pennsylvania Railroad, the Erie Railway and the New York Central and Hudson River Railroad), in the course of which the prices of freight transportation were reduced to a point almost without precedent. By the arrangements between this company and the seaboard trunk lines the rates on west-bound freights are made by the latter. This company, from its relation to the several trunk lines, was compelled to submit to a most extraordinary reduction of rates, or to abandon the traffic. The first alternative was accepted as a matter of sound policy in the interests of the stockholders of this company. We have reason to hope that better counsels will prevail, and that our eastward trunk line connections will hereafter be slow to renew the warfare which worked such disastrous results to them, as well as ourselves in 1871."

This language is as applicable to our roads as to theirs, with the exception of the statement of that company that it has reason to hope that better counsel may prevail, and that the warfare may not hastily be renewed.

That warfare, in one form or another, seems to become chronic between those companies, and we have little hope of increased wisdom on that question. In our last annual report, we believe, we intimated that a warfare of the same nature, which continued about the same time the year before, was not likely to occur again. During the last year it was still more ruinous than the year before, destroying totally the whole value of west-bound business for six months of the best business season of the year.

It is not possible, as yet, to state the losses which the company sustained by the Chicago fire. The passenger and freight houses with all the freight in store were lost. The building in which were the offices of this company, and those of the Chicago, Burlington and Quincy Railroad Company, a building of considerable value, and other buildings, the property of the company, were destroyed.

All the property of the company burned, and for which it was liable, was worth probably, two hundred and fifty thousand dollars.

Fortunately, by the great exertions of the superintendent and freight agent, the ticket agent, and the untiring labor of condnctors Harris and Dickerson, several hundred cars of this company, both freight and passenger, and many of the freight cars loaded, were removed out of the city, and all saved with the exception of one car, on the last train moved, which, having taken fire, was cut off and sent back to save the others of the train. The amount of property thus saved was very large.

In some cases, where the company was liable as common carriers for merchandise burned, the loss has been made good by the company. For all property burned in the warehouses in transit from New York and Boston through Chicago, or for Chicago, it is not thought that the company is liable. For many years it has not made a transportation contract, from those cities west, nor has the Blue Line in its interest, which did not contain a special contract exempting the company from all loss of property destroyed in its warehouses by fire.

During the last year there has been built a railroad from Jonesville, on the Lake Shore and Michigan Southern Road, with the aid of that company, to Albion on the line of the Michigan Central Road, which is to be, during the season, extended northward to Lansing. Another road has been graded from Coldwater, on the line of the same road, to cross both the Air and Main lines of your road, and touching the main line at or near Battle Creek, and running thence northwest in the direction of Muskegon. It is understood that a branch of this latter road will be built to Marshall. This road is understood to be in the interest of and promoted by the Pennsylvania Central Company. It connects with its system of roads at Mansfield, Ohio, running thence to Coldwater, in this State; thence crossing the L. S. and M. S. Road, and thence north-west across the lines of this company.

How much these and other projected roads may affect the property of this company, cannot now be determined. As a general remark it may be stated that the rapid multiplication of railroads and the intense competition created thereby, is affecting seriously the value of the entire railroad property of the country.

Stockholders cannot expect the roads and property of this company to entirely escape the consequences of the general progress of these improvements. To some extent it has endeavored to preoccupy the ground and preserve to itself the territory from which it drew its support, and to bring the business of more distant territory upon its lines, instead of allowing it to cross it and go upon the lines of other companies. These efforts have been defensive rather than aggressive in all instances created by the movements of other companies.

All these efforts to preserve or to acquire business by the various railroads have intensified competition, not only for through, but for almost all local business, and resulted in a general decline of prices, until railroads are compelled to do twice or thrice the business for nearly the same money they earned a very short time since.

The result is the large necessary expenditure on capital account already made and making, to enlarge the capacity of all the great avenues between the West and the seaboard. In the case of this company, the tracks must be doubled and made the most perfect possible, power and rolling stock multiplied, and everything fitted to move the largest possible volume of business at the least possible cost, and the reliance of the stockholders must be upon small profits on a large business, instead of the reverse, as heretofore. And with the capacity and ability of the road made equal to any demand upon it, there seems good ground to hope for a future prosperity which may be equal to the past.

The improvements in the connecting line through Canada are very important, also, to the continued prosperity of your road. It is probable that the new track or Loop Line of the Great Western, our most natural eastern connection to Buffalo, and the bridge across the Niagara will be completed before the coming winter, and that by that time also the Grand Trunk from Detroit to Buffalo will be reduced from the wide to the narrow gauge. These improvements will give a triple outlet east, with full connections with the Erie as well as the New York Central Road. These improvements, with the tunnel under the Detroit River, when completed, will make the North Shore route as complete and as able successfully to compete for all classes of business at all points, as it will be possible to make it,

The funded debt charged upon the company is as follows:

On the Michigan Central Company's main line	$3,233,988 89
Less amount in the sniking fund	1,560,214 82
Net bonded debt	$1,673,774 07
The capital stock now stands at	$17,987,048 00
The bonded debt is	3,233,988 89
Total	$21,221,036 89

The capital stock has been increased to meet the payments for the improvements and expenditures heretofore made, to the extent of $3,321,200.

It has been deemed prudent and safe by the board to acquire the control and assume the management of the Jackson, Lansing and Saginaw Railroad which has been done by means of an agreement with the company owning that road, for working it. By the terms of the contract this company agree to pay the interest upon and guaranty the debt of that company, not to exceed in any event $18,000 per mile of completed road, and also to pay as rent $50,000 the first year, $60,000 the second, and $70,000 thereafter. While this company has been aiding in the construction of that road it has become the owner of some more than one-third of the capital stock of that company, which stands now at about the sum of two millions. The one-third of the rent above named is, therefore by agreement, deducted from the payments which are made semi-annually.

On the first day of May the company made a trust deed upon its main line from Detroit to Chicago, including all station grounds at both places, acquired and to be acquired, to the Farmers' Loan and Trust company, for an amount not to exceed ten millions of dollars in all. Of this amount there has been issued and sold $4,000,000, which it is believed will cover all the cost of improvements to be made this year, and also pay the bonds of the company falling due July 1, 1872, being $500,000. A portion of the proposed issue, and enough to pay all the outstanding bonds secured by prior mortgages, is reserved for that purpose. In addition to the debt upon the main line, there are outstanding bonds secured upon the branches, as follows:—

Bonds secured on the Air Line from Jackson to Niles	$1,900,000 00
Bonds on Kalamazoo and South Haven Road	710,000 00
Bonds on Joliet Branch	800,000 00
Grand River Valley Road	1,500,000 00
Jackson, Lansing and Saginaw	2,935,000 00

The proceeds of bonds issued and sold under the ten million mortgage are to be expended in the improvements required during the year. The issue of bonds on the Jackson, Lansing and Saginaw Road from time to time, as the road is extended, cannot exceed $18,000 per mile of completed road.

There has been expended for construction during the year, the large sum of	$2,380,731 41

Among the items for which this has been paid paid are—

Lands at Chicago and Detroit	$70,668 50
Locomotives	292,090 18
Passenger cars	104,163 01
Freight, baggage and second-class cars	960,607 09

The total number of passengers carried during the year was 774,349, of whom 140,679 were through, and 633,670 way. Total number of tons of freight moved, 1,238,813.

The company have 148 locomotives. Miles run by locomotives with passenger trains, 940,230; with freight trains, 1,482,984; working trains, 207,686; switching trains, 671,678—total, 3,802,478.

The cars are classified as follows: 64 day coaches, 7 Pullman Sleeping cars, 25 second class

and emigrant, 30 baggage and mail, 69 caboose, 408 stock, 1,281 merchandise, 468 Blue Line, 21 refrigerator, and 815 platform.

The National Railway.

The Philadelphia *Evening Bulletin* vigorously attacks the scheme (of which the famous Stanhope railroad charter which passed the New Jersey Legislature last session is a part) for a new air-line railroad from New York to Philadelphia. It makes the following assertions:

After a sleep of nearly eight years, the charter of the Attleborough or National Railway Company, to construct a railway some twenty miles long, is suddenly aroused to build a magnificent line of railway—one hundred feet wide right of way—with double tracks of steel, and all other modern conveniences, between Philadelphia and New York. With an authorized capital of only three thousand shares, or one hundred and fifty thousand dollars, it might well plead inability to undertake the tremendous task, but the master-minds who controlled the little bantling knew the capacity and outcome of 'the thing,' and on the 17th day of Sept., 1869, solemnly convened in stockholders' meeting, and so solemnly voted to increase the said shares to two hundred thousand, or ten millions of dollars, of which one hundred thousand shares, or five millions of dollars were to be common stock, and one hundred thousand shares, or five millions of dollars, were to be prefered stock. On the next day an agreement was signed, sealed and delivered, by which Henry M. Hamilton, of Bloomfield, Essex county, New Jersey, was the fortunate owner of five millions of dollars worth of the full paid common capital stock of the National Railway Company for the paltry considerations of the New Jersey charters named in the agreement, viz., five thousand shares of the capital stock of the Hamilton Land Improvement Company, being all the stock of the said company, and eleven hundred and fifty-eight shares of the capital stock of the Peapack and Plainfield Railroad Company, being a majority of the capital stock of the said company. More than this Mr. Hamilton not only obtained thereby the entire and at the time only issue of stock in existence, but as such sole owner was, as a matter of course, again the absolute possessor and controller of the identical New Jersey charters, upon which he had realized five millions of stock, and of the National Railway Company also. The agreement of subscription to the stock promises a dividend of ten per cent. before any dividend shall be paid to the common stock, notwithstanding the supplement of 1868 to the Attleborough Railroad Company, which authorized the issue of preferred stock, expressly prohibits a greater rate of dividend than seven per cent. until the dividends on the common stock shall amount to an equal sum.

Of the ten millions of dollars capital stock, five million dollars at the very least do not represent a dollar of money paid in to the company; the remaining five millions in preferred stock have been subscribed for, but to a small amount, and while a few of these subscribers have paid the installments as called for, many others, and the largest, have utterly repudiated theirs, and refuse to pay. To collect these by process of law the company has not yet dared to undertake.

The charter of the Trenton and Millstone Company is absolutely void: the charter of the Hamilton Land and Improvement Company was either not in the possession of Henry M. Hamilton when he sold it for common stock of the National Railway Company, or it was subsequently sold for a large sum in cash to another party, who now controls it. The published letters of the Governor and Speaker of the Senate of New Jersey show that the charter of the Stanhope Railroad Company—a new acquisition—is not the charter which passed the Legislature of New Jersey and was signed by the Governor.

☞ The earnings of the European and North American Railway for July, 1872, were $33,920 11, against $29,165 54 in July, 1871, and $22,921 54 in July, 1870.

THE INDIANA
AND
ILLINOIS CENTRAL
RAILWAY COMPANY'S
First Mortgage 7 Per Cent.
SINKING FUND
GOLD BONDS,
FREE OF GOVERNMENT TAX.

An East and West Air Line of 152 Miles, Indianapolis, Ind., to Decatur, Ill.

This road passes through a belt of the best settled and richest agricultural and mineral country of Indiana and Illinois, averaging thirty miles in width, with no other East and West Railway built or projected through it. It crosses, in Parke and Vermillion counties, the rich

BLOCK COAL FIELD

of Indiana, which alone will supply an ample business.

Thirty miles through Douglas County, Ill., just completed, opened and paid for.

Whole Western Division, Montezuma to Decatur, 85 miles; to be finished in 1872. Grading nearly done and materials (except iron) already procured; Bridge over Wabash ready for superstructure.

Eastern Division, 67 miles, partly graded and to be finished in 1873.

$1,300,000 in cash already expended on the road, and $1,500,000 remaining to be called from 20 subscribers, among whom are W. H. Guion, Sidney Dillon, Jay Cooke & Co., Clark Dodge & Co., J. Seligman, Vibbard, Foote & Co., and Paul S. Forbes, of New York; Benj. E. Bates of Boston, Henry Lewis of Philadelphia, and G. M. Pullman of Chicago.

Besides its right of way, the Company owns 32,000 acres of land chiefly in Indiana, of which 2,000 acres are the best BLOCK COAL LANDS. It has also SUBSCRIPTIONS IN BONDS AND CASH from counties, towns, and individuals of $700,000.

The road connects at both termini with the most important THROUGH RAILWAY LINES of the West, and being by many miles shorter than any other line, will be indispensable to them, while its local business alone will insure good dividends on its stock.

Bonds, $1,000 each, payable to Union Trust Co., Trustee or bearer, July 1, 1901, in gold coin. Coupons, also in gold, payable Jan. 1 and July 1, in New York, or at Union Bank of London, at fixed exchange of £7 sterling.

SINKING FUND of 2½ per cent. a year on gross earnings to be invested by Trustee in bonds at not exceeding par.

For sale at 90 and accrued interest by the Financial Agents of the Company.

Walker, Andrews & CO.,
14 Wall-st.

☞ The Intercolonial Railway will receive tenders until the 24th inst., at the office of the Engineer in St. John, N. B., for the construction of a branch line of railway, from a point near the Station House at Dorchester to Memramcook River, near Dorchester Island, a distance of about ¼ mile. Also, for the construction of a Railway Wharf on the Memramcook River, near Dorchester Island, at the terminus of the Dorchester Branch Railway.

RAILROAD EARNINGS—MONTHLY.

United States Rolling Stock Company.

To the Shareholders of the United States Rolling Stock Company:

In submitting the first Semi-annual Report of the affairs of this Company, I have to congratulate the Shareholders upon the promising aspect of their affairs. Circumstances beyond the control of the Board of Managers have, it is true, delayed the operations of the Company beyond the period anticipated for their commencement, and have thereby prevented the investment of any large part of its capital or the accumulation of any large amount of income during the half year just past; but the obstacles have all been of a merely temporary character, and the permanent success of the Company seems well assured.

The most serious delay was suffered from the numerous prior engagements of the leading car works of the United States, which prevented this Company from making contracts for early delivery unless at extravagant figures, or with inferior builders. The policy adopted by the Board was not to force their contracts, but to be ready with large orders to first class car works whenever the latter were in a position to accept them. Under this system the Company has succeeded in contracting, on the most favorable terms, for stock amounting at contract prices to $4,960,366 60—none of which could be duplicated to-day at a less advance than an average of ten per cent. The prices of locomotives have advanced no less than thirty per cent. between the earliest contracts and the later ones, and a further material advance has taken place since.

Not only was the Company unavoidably delayed in making its contracts, but the builders themselves were, in many instances, unable to comply with the dates of delivery agreed upon, owing to the unprecedented fluctuations in the labor market, and the long continued strikes and other disturbances. An additional element of delay was introduced by the uncertainty as to the time of adopting the narrow gauge on the Atlantic and Great Western Railroad, for which the major part of our rolling stock is destined. But all these difficulties have been overcome, and the Company is now in fair working order.

The earliest deliveries were made to the Company in February, and the total amount delivered to June 30, 1872, is only $785,361 60—all of which is leased at handsomely paying rates to four different Companies. The annual gross rental on this amount of stock is $226,725.

The amount of stock under contract up to June 30, and to be delivered during the balance of this year, chiefly in August and September, is $3,314,880—the annual gross rental on which will be $767,175—making a total annual gross rental for stock already leased and contracted for, up to June 30, 1872, of $993,900.

The stock contracted for since June 30, 1872, amounts to the further sum of $910,625—on which the annual gross rental will produce the additional sum of $230,625, or a prospective gross annual income from entire stock of $1,224,525. It must, however, be borne in mind that none of our stock can, during the present year, earn a full year's rental—the earliest deliveries being in February, the heaviest in August and September, a considerable portion in November and December, while the contracts completed since July 1st call for deliveries even in the first months of the year 1873. The actual gross earnings of the Company for the balance of the present year cannot, therefore, be estimated to exceed the sum of $354,750, provided the delivery dates are fully complied with—which cannot, however, under existing circumstances, be relied upon with any degree of certainty.

In order to meet the payments falling due under the contracts specified, the Board of Trustees have decided to issue the balance ($2,500,000) of the Capital Stock originally subscribed for. The instalments will be so arranged as to meet as nearly as possible the maturity of the contracts, and thus save all unnecessary loss of interest.

The income of the Company up to June 30th, 1872, has been as follows:

From interest	$19,549 06
" gross rentals	42,494 77
	$62,043 83

out of which an interim dividend of 3 per cent. for the six months, according to date of instalment, has been declared and paid. The expenses of the Company of every description for the half year have been $23,259 37. They will be larger during the present half year, owing to the increased number of persons employed both in the office and in connection with the construction and supervision of the Rolling Stock of the Company.

The question of still further increasing the capital of the Company, and entering upon the complete construction of Rolling Stock, as a permament part of the Company's business, has been under discussion by the Board of Managers, but the magnitude of the interests involved has prevented any decision from being arrived at. Before the annual Stockholders' meeting of 1st of November the managers will be prepared to submit such recommendations as they may in the meantime determine upon. To a certain extent the Company has from its commencement been engaged in manufacturing, by purchasing all the essential parts of the Rolling Stock (wheels, axles, springs, &c., &c.,) separately, and setting up the stock under the supervision of its own Superintendent, thereby saving a liberal percentage on the entire cost. What amount of further saving can be made, by establishing complete works of our own, is the question now to be decided.

Referring to the statistical report of Mr. Barton, your efficient Superintendent, submitted herewith, it will be seen that the Company's operations promise net earnings exceeding 20 per cent. per annum on the capital employed; but shareholders are reminded that, by the terms on which this Company was constituted, the Atlantic and Great Western Railroad is entitled, during seven years, to a rebate of two fifths of all profits over 12 per cent.

I am, very respectfully,
GEO. B. MCCLELLAN, *President.*

New York, July 22, 1872.

Commerce of Philadelphia.

The total value of goods imported at the port of Philadelphia for the fiscal year ending June 30, 1872, is $20,383,853, of which $1,276,810 was free of duty. There was in addition imported into the port of New York and transmitted to this port without appraisement, $2,987,940, making the total receipts of foreign goods paying duty here $23,376,793, against $17,728,006 in the preceding year. Of the imports landed directly at this port $10,802,618 was in foreign vessels and $9,581,235 in American vessels. The nationality of the vessels are entered as 523 American, 324 British, 76 German, 65 Swedish, 22 Italian, 18 Spanish, 12 Portuguese, 11 Russian, 5 Dutch, 3 Austrian, 2 Danish, and 1 each French and Nicaraguan, giving a total number of 1063 vessels, of an aggregate tonnage of 430,852 tons.

The total value of domestic exports from the port of Philadelphia for the fiscal year ending June 30 last, is $20,982,876, of which $14,297,703 was in foreign vessels, and $6,685,173 in American vessels. The exports of the previous fiscal year amounted to $17,903,202, of which $11,517,546 was in foreign vessels and $6,385,656 in American vessels. Over 8¾ millions of the exports for 1871-2 were to Germany, Belgium and Holland. Of the total exports $12,626,084 was in petroleum, covering something over 56,000,000 gallons, an excess of 2¼ million gallons over that of the previous year.

The total customs duties received at the port of Philadelphia for the fiscal year ending June 30, 1872, were $8,533,570, against $7,196,736 the previous year, an increase of $1,336,834.—*Philadelphia Ledger.*

☞ Through trains have commenced running from Ashtabula direct to Oil City, over the Ashtabula, Jamestown and Franklin Railway.

Debt of Arkansas.

The following is an official statement of the Debt of Arkansas, on the 31st of July, 1872:

Six per cent. Funded Debt Bonds representing total of Funded Debt when all outstanding bonds are exchanged		$4,520,000
Deduct Unfunded Bonds held by Government of U. S. for account of Indian Trust Fund, and offset by claims due from General Government to State of Arkansas	$1,200,000	
Deduct also Unfunded Bonds in hands of creditors or destroyed	470,000	
		1,670,000
Leaves Funded Debt Bonds issued or exchanged to date		$2,850,000
Seven per cent. State Aid Railroad Bonds authorized to be issued, (limited to 850 miles of Railroad) $11,400,000—amount issued to date		4,350,000
Seven per cent. Levee Bonds issued for the construction of Levees, being total of issue authorized	$3,000,000	
Less amount retired and cancelled by conversion into lands to date	815,000	
		2,185,000
Seven per cent. Ten Year Deficiency Bonds		300,000
Outstanding Treasurer's Certificates and Auditor's warrants		200,000
Total State Debt		$9,885,000

Against this indebtedness are present available assets as follows, viz:

Mortgages held by State on highly improved Cotton plantations estimated will realize		$3,000,000
Lands owned by the State, valued at		1,500,000
Railroad lines and property subject to lien in respect of State Aid Bonds pledged or awarded to Railroad Companies covering 850 miles	$11,400,000	
Less by amount of State Aid Bonds yet unissued, covering 490 miles	7,050,000	
Balance, or State Aid Bonds issued to date, covering 360 miles		4,350,000
Amount due from Memphis and Little Rock Railroad Co.		140,000
Total assets		$8,990,000

The Euphrates Valley Railway.

The report from the select committee on the suggested new railway to India has been issued to-day. The committee are of opinion that the two routes, by the Red Sea and by the Persian Gulf, might be maintained and used simultaneously; that at certain seasons and for certain purposes the advantage would lie with the one, and at other seasons and for other purposes it would lie with the other; that it may fairly be expected that in process of time traffic enough for the support of both would develop itself, but that this result must not be expected too soon; that the political and commercial advantages of establishing a second route would at any time be considerable, and might, under possible circumstances, be exceedingly great; and that it would be worth the while of the English Government to make an effort to secure them considering the moderate pecuniary risk which they would incur. They believe that this may best be done by opening communications with the Government of Turkey.—*London Globe, Aug. 2.*

☞ The Central Pacific Railroad Company contemplate building a road from Foans to Tinitic. It is expected to be completed within the year.

American Railroad Journal.

Saturday, August 17, 1872.

Stock Exchange and Money Market.

Notwithstanding the less favorable city bank exhibit, Money has been offered with much freedom to the leading speculative borrowers, generally on the basis of 3@4 per cent. in a temporary form. The demand for accommodation, though fairly active, has not been remarkably urgent in any prominent instance. The main call was from Stock Exchange operators, whose wants were supplied with promptness at the ruling figures. The Gold Exchange dealers were not large borrowers. The discount market was comparatively quiet. The best grades of commercial paper were offered rather moderately, and were in request at from 6½@8 per cent. per annum. The city banks, last week, were heavy losers, in the averages of specie and deposits, and also reported a falling off in their legal tender reserve. The U. S. Sub-Treasury added handsomely to its coin balances chiefly through the larger receipts from customs which amounted at this port alone, and for the week to $4,580,207. The office cut down its currency reserves nearly a million dollars.

The U. S. Sub-Treasury office last week added to its coin balance about 1⅝ millions and reduced its currency reserve nearly a million. The office received during the week $4,854,885 of currency, and $7,321,481 of gold, the latter including $4,952,000 from customs; and disbursed $5,839,912 of currency, and $5,670,687 of gold, the latter embracing $1,571,854 of coin interest. The city banks enlarged their loan and discount average nearly a million during the week, and again contracted their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $7,627,913, and a coin reserve of $47,133,760.

The city banks, in their latest return, show a reduction of $481,100 of legal tender notes, $5,726,900 of specie, and $3,895,800 of deposits, also an addition of $958,300 to their loan and discount averages, and a contraction of $24,200 in their item of circulation. The city bank exchanges last week, averaged 99, and thus far, this week, about 93 millions daily. The banks now hold $6,516,600 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $18,199,000, against $12,361,749 same time last year. The city bank deposits are now $237,668,200 against $251,245,280, week ending Aug. 12, 1871. The legal tender reserve amounts to $54,570,600, against $72,890,400 same time last year. The circulation now stands at $27,313,000 against $30,285,409 same time last year. The loans are now $296,386,500 against $302,400,397 at this date last year.

The coin reserve of the city banks is now about 18⅛ millions as against about 29⅛ millions on the 20th of July; the legal tender reserve is about 54⅛ millions against about 55⅛ millions on the statement of June 15th.

Government revenues have been again quite prolific, particularly in the line of customs. The excises yielded within the week about 2½ millions, and thus far in the current fiscal year beginning with July 1, 1872, $18,911,098. The customs at the port of New York last week were $4,580,206, at the outports, equal to about $1,500,000 all in coin, or coin certificates.

Under the Treasury programme for August, Government proposes to sell gold as follows: Thursday, August 22, $2,000,000; Thursday, August 29, $1,000,000. And to buy in Five-Twenties, as follows: Wednesday, August 21, $2,000,000; Wednesday, August 28, $1,000,000.

The Gold speculation has been less spirited, particularly toward the close. The export call has been quite limited. The customs inquiry has been the main element of activity in legitimate dealings, through the week. The chances of an early resumption of specie shipments to Europe, on an extensive scale, are not considered strong enough to stimulate speculative operations at present, and the market closed languidly.

The range of the price during the week has been from 114⅝@115¾ and the closing quotation on Wednesday was 114⅝ against 115¼ the preceding Wednesday. The specie outflow last week, was only $377,227. The Gold Exchange Bank clearances have averaged about 52 millions per day during the week.

The customs demand for Gold last week, averaged $825,300 a day; thus far, this week. it has averaged $682,000 a day, or equal to a weekly aggregate of $4,092,000. The arrivals of specie from Europe, Havana and other foreign ports since Jan. 1, 1872, were $2,790,522 against $7,424,449 same time in 1871. The total customs revenue of the Government, in coin, at this port since January 1, has been $92,691,278 against $97,577,219 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $55,773,110, against $60,599,053 during the same time in 1871.

The export drain of specie was $377,226 last week, against $727,500 same week preceding year. The shipments since January 1, 1872, have been $55,238,266 against $52,230,516 during the same portion of 1871.

Foreign Exchange has been moderately inquired for, opening lower and closing about steadily. Bankers' sixty day bills on London closed on Wednesday at 108⅝@108⅞; sight bills on London, 109½@109¾.

The week's exports hence of domestic produce have been to the currency value of $4,976,118.

The specie exports from San Francisco from Jan, 1 to Aug. 5th were $16,487,479 against $16,573,818 same time last year.

Government securities have been in fair investment demand, and prices for the favorite issues have been generally well supported, on comparatively limited offerings.

On Wednesday, Government bought in a million of Five-Twenties at 114 34@144 57 out of an aggregate offering of $4,612,200.

U. S. sixes of 1881 at the close on Wednesday of the current week were quoted at 117⅞@118; U. S. Five-Twenties of 1862, (other than the bonds called in) 116⅛@116⅜; U. S. Five-Twenties of 1864 at 116⅛@116⅜; U. S. Five-Twenties of 1865, 116⅛@116¾; U. S. Five-Twenties of 1865 consolidated, 115⅛@¼; U. S. Five Twenties of 1867, 115⅜@115⅞; U. S. Five-Twenties of 1868, 115¼@115⅜; U. S. Ten-forties at 112⅞@113⅛; U. S. Fives of 1881 (Funding Loan) 112⅝@112⅞; Six per cent. currency bonds, 113¾@113⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 31.	Aug. 7.	Aug. 14.
Consols	92¾	92½	92⅝
U. S. 5-20's of 1862..	91	91¾	92¼

" 1867	93	92	92½
" 10-40s	90⅛	90	90⅛
New Fives of 1881...	89¼	89	90
Erie.	40⅛	39½	36½

State bonds have been in rather more demand but irregular as to prices.

The Central Pacific R. R. earned $305,999 more in July of this year, than the same month of last year; and thus far in the current year, its earnings show an increase of $1,853,600 on the earnings at the corresponding period in 1871.

Railway and Miscellaneous share property has shown more activity but has been unsettled in price, some of the speculative favorites having been depressed by heavy realizations, on speculative account.

Railway Mortgage Loans have been in very good request as a rule, chiefly on investment account, and the favorite loans have been strong in price. Central Pacific Sixes have met with a freer sale at 102@102¼. Chesapeake and Ohio have been in good demand at 94 per cent. and accrued interest.

In the way of Metals, a less confident demand has been noted for Ingot Copper, which however has been held very firmly, since our last, on the basis of 33½c.@33¾c. per lb. Pig-iron has been strong in price on a moderately active inquiry, with sales reported of 300 tons Gartsherrie at $55; 150 tons Eglinton at $52@$52 50, with American quoted as before. Iron Rails have been in good request, with sales reported of 2,000 tons American at full prices, and 500 tons old on private terms. Lead, Spelter and Zinc dull at previous quotations. Pig-tin quiet but steady at 35c., gold, for Straits; sales, 100 pigs. Tin Plates have been moderately sought after, with sales of 750 boxes Charcoal Terne at $11 75; 600 boxes Coke Terne at $11 25, and 500 boxes Coke at $12 50@$12 75, gold, per box.

General business has shown more animation in the principal kinds of domestic produce. Flour Wheat, Corn, Rye, Oats, Pork, Lard, Bacon, Naval Stores and Tobacco were firmer. Middling upland cotton closed steadily on Wednesday at 21¾ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,675,166 bales, against 3,950,789 bales same time in the preceding year; exports 1,936,760 bales against 3,119,957 bales in the previous year; stock at the ports at latest dates, 90,663 bales against 149,875 bales same date 1871.

At the Live Stock Markets, Beeves have been in less demand at 8@13 cts.; Veals at 6½@10 cts.; Sheep at 5@7 cts.; Lambs, 6@10½ cts.; Swine, at 4½@4⅞ cts. per lb., all live weight. The week's receipts were 7,263 Beeves, 2,749 Veal Calves, 22,456 Sheep and Lambs; and 30,856 Swine.

Foreign goods have been in more general request and held with more confidence, in the leading instances. The week's imports of foreign goods reached the amount of $9,254,688 including $3,748,433 of dry goods.

Ocean freights have been fairly active and rates have been generally firm. Tuesday of the current week was an unusually brisk day in the line of grain and Petroleum charters.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The estimated earnings of the Erie Railway for the week ending Aug. 7, 1872, were $323,372; against $414,346 for the corresponding period of 1871—a decrease of $90,974. Total earnings since April 1, 1872, $6,663,167—an increase over the same time in 1871 of $332,924.

☞ The earnings of the Central Pacific Railroad Company for the month of July, 1872, were 1,175,295; for the month of July 1871, $869,296—increase this year over 1871, $305,999. Earnings first seven months. 1872, $6,767,778; earnings first six months, 1871, $4,914,178—increase this year over 1871, $1,853,600.

☞ The sales of the land department of the Union Pacific Railroad Company for the month of July, 1872, were 30,389¼ acres, amounting to $133,897, being an average of $4 41 per acre. The total sales from July 28, 1869, to July 31, 1872, are 601,559 acres, amounting to $2,533,307, being an average of $4 21 per acre.

☞ The lease of the Cincinnati, Sandusky and Cleveland Railroad for 99 years to the Cleveland, Columbus, Cincinnati and Indianapolis Railroad Company is announced.

☞ All the stock of the Lee and New Haven Railroad has been taken. The stockholders met at Lee on the 15th for organization.

Misplaced Switches.

It is seldom that we notice cases of accidents upon railroads, and then only when, as in the present instance, we are enabled to call the attention of Railroad Companies to an effectual remedy. It is almost impossible, however, to take up a paper from any part of the country without meeting with some such paragraph as the following:

PORTLAND, Me., August 14.

MISPLACED SWITCH—By reason of a misplaced switch the engine, tender and baggage car on the Portland and Ogdensburg outward-bound train last night ran off the track, delaying the inward and outward trains two hours.

The "WHARTON SAFETY RAILROAD SWITCH" is a sure preventive of accidents of this nature. It provides perfect safety for both the main track and side tracks, besides removing all switches from the main track as effectually as if there were no sidings on the whole line. They have been in use on a large number of our most important roads for a number of years, and in every instance have given entire satisfaction; testimonials to that effect having been repeatedly published by us. It gives us pleasure to add the following in our present issue:

PENNSYLVANIA RAILROAD COMPANY.
OFFICE OF THE VICE-PRESIDENT,
Philadelphia, January 25th, 1871.

A. BARKER, Esq.,
President Wharton Railroad Switch Company.
My Dear Sir:

After careful experiment upon our road at several points where it could be most thoroughly tested, during which you have perfected the Wharton Railroad Switch, so that we think it adapted to all our wants, we have concluded to adopt it on our own road and the roads leased by us; and will give it place as rapidly as we can do so consistently with the proper maintenance and operation of the line.

I believe that it will prove of great practical value to all the Railways of the country.

Very Respectfully Yours,
THOMAS A. SCOTT,
Vice-President.

TEXAS AND PACIFIC RAILWAY COMPANY.
OFFICE OF THE PRESIDENT,
Philadelphia, August 13th, 1872.

ABM. BARKER, Prest. of
The Wharton Railroad Switch Company.
Dear Sir:

The Wharton Railroad Safety Switch having given complete satisfaction in use upon the Pennsylvania Railroad and branches, we have concluded to adopt it upon the entire line of the Texas and Pacific Railway.

Yours truly,
THOMAS A. SCOTT,
Prest. of Texas and Pacific Railway Co.

☞ The earnings of the Union Pacific Railroad in June, 1872, were $835,459 47; and the expenses, $391,666 08—making the net earnings $443,793 39. From January 1, to June 30, 1872, the earnings were $3,841,616 71; the expenses, $2,387,143 41—and the net earnings, $1,454,473 30. This shows an increase for June of $107,285 13; and for the six months ending June 30, 1872, of $431,332 13.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Besides being the obligation of a wealthy corporation, composed of men of experience and high-toned commercial integrity, they are secured by a first mortgage on the road, revenues, land grant, franchise and equipments, combined in one mortgage, and are readily negotiable both in the markets of this country and Europe.

A liberal sinking fund provided in the mortgage deed must advance the price upon the closing of the loan. Principal and interest payable in GOLD. Interest at eight (8 p. c.) per cent. per annum, payable, semi-annually, free of tax Principal in thirty years. Denominations, $1,000, $500 and $100, Coupons or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

The diminished quantity of these Bonds for sale, and the increased demand absorbing them, warrant the belief they will soon be sought for at an advance considerably above the present subscription price at which they can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.

BANKERS,

NO. 11 WALL STREET.

☞ The Philadelphia *Ledger* of 12th inst., reports the net anthracite coal tonnage for the week ending on the 2d inst., from all sources, at 441,810 tons, and for the year 11,216,998 tons, against 6,851,594 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,365,404 tons. The production of bituminous coal for the week was 54,532 tons, and for the year 1,443,369 tons, against 1,293,761 tons to the corresponding time last year—an increase of 149,608 tons. The total production of all kinds of coal for the week was 496,292 tons, and for the year 12,660,367 tons, against 8,145,355 tons to corresponding time last year, showing an increase of 4,515,012 tons.

☞ The New Haven and Northampton Railroad Company has declared a dividend of $3 per share, payable on and after September 2.

Journal of Railroad Law.

RAILROAD COMPANIES—INJURY TO ANIMALS—DUTY TO FENCE LANDS OWNED BY COMPANY.

The facts in the late case of the Bellefontaine Railway Company *vs.* Reed (33 Ind., 476,) are fully and clearly stated in the following opinion by—

Downey, J.—This action was brought before a justice of the peace for the value of two hogs of the appellee, alleged to have been killed by a train of cars on the road of the appellant. There was a default by the defendant before the justice of the peace, and judgment for the plaintiff after an assessment of damages. The company appealed to the Circuit Court, when there was a trial by jury; finding for the plaintiff; motion for a new trial by the defendant, which was overruled; and judgment rendered on the verdict. The evidence is made part of the record by a bill of exceptions.

The errors assigned are that the court erred:

First. In overruling the motion for a new trial.

Second. In overruling the motion in arrest of judgment.

Third. In giving certain charges to the jury.

Fourth. In refusing instructions asked by the defendant.

Fifth. In refusing instructions as asked, and modifying the same.

Sixth. The verdict of the jury is not sustained by sufficient evidence.

Seventh. The verdict of the jury is contrary to law.

Eighth. The damages are excessive, as found by the verdict.

It may be remarked before proceeding to examine the questions on the verdicts, that the third, fourth, fifth, sixth, seventh, and eighth, assignments of error are all embraced in the first. They are each of them a ground for granting a new trial, and are properly assigned as reasons for granting the same, but are not necessarily, nor, perhaps properly, specified as assignments of error.

The new trial was asked for the reasons.—

First. That the verdict was not sustained by sufficient evidence.

Second. That the verdict is contrary to law.

Third. The damages are excessive.

Fourth. The court erred in giving instructions one, two, three and four by the court.

Fifth. The court erred in refusing to give instructions two and three asked by the defendant.

The motion in arrest of judgment was based on the alleged insufficiency of the complaint, and as that goes back to the foundation of the suit, we will examine it first.

The complaint alleges, that the defendant, on or about the 13th of July 1867, at and in said County of Randolph and State of Indiana, by its locomotive and train of cars, then running on its railroad, at a point on its said road in said county where its railroad track was not securely fenced ran over and killed two hogs of the plaintiff, of the value of fifty dollars, wherefore, &c.

No specific objection to the complaint is pointed out by counsel for the appellant, and we do not observe any.

The evidence discloses the following state of facts: That the hogs belonged to the plaintiff, and were killed by a train of cars on the defendant's road where it passes over lands owned by the defendant. The track of land was not inclosed, but there was a fence along the line of the railroad. It was in some places six rails high and in others four and two rails in height. At some places it had been thrown down and openings made through it in this way. In other places it had been removed entirely, and its place supplied with ranks of wood; and then the wood had been taken away in some places, and in others it had been burned away, leaving openings of from two to five rods, some of which had been open for a year, and others had been made more recently. The wood had been taken away by the employees of the Company. The plaintiff lived half a mile from the place where the hogs were killed, knew of the openings in the fence, and go upon the track of the railroad. They were killed on the railroad, at a point opposite to the openings in the fence. One of them would weigh four hundred pounds, and was worth six cents a pound. The other would weigh three hundred and twenty-five pounds, and, on account of her being of better stock, was worth eight cents a pound.

With reference to this evidence, it is insisted by the appellant that the plaintiff was guilty of negligence in allowing his hogs to run at large when he knew of the condition of the fence, and that, for this reason, the finding should have been for the defendant. We think this position cannot be maintained. See The Indianapolis, &c., Railroad *v.* McKinney, 24 Ind. 283. Again, it is urged, that as the railroad Company owned the land, and was using it as a place to deposit wood, and from which to remove it as the exigencies of the Company might require, the Company was not bound to keep it securely fenced.

We think that this ground cannot be maintained. The statute makes the company liable for stock killed when the road is not fenced. Some exceptions have been allowed in cases where it was unlawful or impracticable to fence. But, very clearly, it is not shown that it was impracticable or illegal for the company to make and maintain a fence in this instance. The facts that the company owned the land, and were using it for the purpose named, were no sufficient reasons why they should leave the way open for animals to go across their land and upon the railroad. If there was anything in the nature of the use which the company was making of the land which made it impracticable to keep up the fence, it is not shown.

The instructions of the court to the jury were in accordance with our views of the law, and the same is true of the modification of the second charge asked by the defendant, of which complant is made.

The judgment is affirmed with ten per cent. damages and costs.

☞ The Kansas City and Northern Railroad, better known as the North Missouri Railroad, will be sold at public auction, September 11th. The sale is ordered by the United States Court on the petition of William Hoge, of Philadelphia, and others, to satisfy a judgment against the road, obtained by them last fall, amounting to half a million dollars.

☞ The Buffalo, New York and Philadelphia Railroad is open from Buffalo to the State line.

Cleveland Bridge and Car-works.

We copy from a Cleveland paper the following description of these works. The proprietors are the McNairy & Claflen Manufacturing Company. The business of the concern has increased so rapidly within the last few years, that the works now cover an area of seven acres. The Vice President of the company, Henry M. Claflen, Esq., is a gentlemen whose enterprise and business capacity, no less than his agreeable personal qualities, are widely recognized in railway circles at the West and elsewhere; and his connection with the business, in filling the important position he occupies, has contributed largely to its success:

This concern was established in 1850, and moved along slowly until about seven years ago, when every thing in the city seemed to take a fresh start on the highway to prosperity. The Bridge and Car-works joined in the race. The recent purchase of more land, the employment of more men, the design to erect a large foundry this season, the rapid increase of orders for work, and the fact that present contracts will push the shops to their utmost capacity until December, are indications of extraordinary success. The development of this gigantic business has not been of a spasmodic nature, but steady, rapid, and healthy, and under practical management throughout. It is the only establishment in the country that combines the manufacture of railway and street-cars and bridges. They have facilities for building first-class passenger coaches, but dropped this line of business more than a year ago, on account of the great demand upon their capacity for other kinds of work.

Five hundred and fifty men, practical mechanics, are employed in the shops, and in putting up bridge-work all over the country. From 30,000 to 40,000 feet of lumber is required for daily consumption, and a little less than sixty tons of wrought and cast-iron. Fifty railway-cars, beside bridge and street-car work, are turned out each week. The workmen are just completing the last of fifteen hundred cars for the New-York Central Railroad, and are under way with a contract for three hundred coal cars for the Cleveland and Pittsburg road. Bridge-work is under way for the following railroads: Lake Shore; Tuscarawas Valley; Ashtabula, Youngstown, and Pittsburg; Buffalo, New York, and Philadelphia; Atlantic and Great Western; Ohio and Mississippi; Cleveland, Mount Vernon, and Pittsburg Railroad; Cleveland, Columbus, Cincinnati, and Indianapolis Railroad; and Canada Southern. The Canada Southern bridge is about three thousand feet long, and spans the American side of Detroit River, from Grosse Isle to the Michigan shore. The contract on this work includes the superstructure, as well as substructure, and the whole is to be completed by December 1st, 1872. The bridges for the Richmond and Atlanta Air-Line road, which is four hundred miles in length, are built by the McNairy and Claflen Manufacturing Company, and there are quite a number of them. The iron is shipped from Cleveland, ready for framing, and whatever wood-work is necessary is obtained along the road.

Street cars are made and shipped to almost every point in the United States, from Boston to New Orleans. The white-wood in these cars is obtained within a radius of one hundred miles from Cleveland. It is precisely the same that is shipped to New-York and made into cars there, to be returned to the Western market. With iron and wood near at hand, and skilled labor as low as the same can be had elsewhere, it is not reasonble to suppose that these cars can be furnished upon better terms from any other point. A large number are kept in stock, of all sizes and styles, so that street-car companies can safely anticipate an early shipment of any number ordered. No other car is in use at Cleveland, and we are free to say that the cars of this city cannot be surpassed for beauty, durability, and easy motion. The latter qualification is derived from a patent running-

gear, giving the car a motion similar to the easy swing of a palace passenger-coach, and its introduction on any road will prove popular with the people. The Cleveland Bridge and Car-works are organized in six divisions—paint, pattern, blacksmith, machine, railway-car, and street-car shops—with a foreman over each, and one superintendent over all. These men are selected on account of superior mechanical ability and executive capacity, and through long service in the employ of the firm have shown commendable zeal in turning out work promptly and in accordance with specifications. The machinery intrusted to their care includes every variety that can be of advantage in saving labor and obtaining quick results. It is driven by three engines, all receiving their power from boilers sheltered in a brick house, separate and apart from the other buildings. Steam is conveyed from the boilers to the engines, and to the heating apparatus in each department, by subterranean pipes, removing danger from fire to a point where it can be under the most perfect control. One of Holly's fire pumps, with hose constantly attached, stands ready for action in case of fire, while other improvements for quenching flames are found in almost every nook and corner of the vast edifice. A regularly organized fire department, composed of men in the shops, some of whom are on duty night and day, have charge of appliances for creating a young deluge at a moment's notice.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide-water from the commencement of navigation to the 31st of July, inclusive, during ing the years 1871 and 1872, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1871..	111,400	6,105,000	8,415,400	40,400
1872..	38,800	2,951,000	11,458,900	401,500
Dec.	72,600	3,154,000	*3,043,500	*261,100

* Increase.

By reducing the wheat to flour the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a decrease equal to 703,400 bbls. of flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of July, in the years indicated:

	1870.	1871.	1872.
Canal opened—	May 10.	April 24.	May 13.
Flour, bbls.....	154,900	111,400	38,800
Wheat, bushels..	6,752,600	6,105,000	2,951,000
Corn, bushels...	1,288,000	8,415,400	11,458,900
Barley, bushels.	82,400	40,400	401,500
Oats, bushels...	1,472,000	1,392,100	3,165,100
Rye, bushels....	271,000	57,900	245,800
Malt, bushels...	212,500	379,200	447,900
Feed, lbs.....	4,527,200	3,273,600	3,296,700

☞ The Alexandria *Gazette* learns from Mr. Benjamin Fendall, an engineer on the Lynchburg and Danville railroad, the southern prolongation of the Orange, Alexandria and Manassas railroad, that the grading and masonry of that road will be completed by the first of next December, and that trains will probably be running over its entire length three months afterwards—the first of the following March. Thus Baltimore will have a direct and unbroken connection through to Danville, Va., by a line in which it is largely interested.

☞ The Missouri, Kansas and Texas railroad has reached the Canadian river, and will be to the Texas line before September, meeting there the Texas Central. Through cars will run from Galveston to New York.

Alabama and Chattanooga Railroad.

We learn that negotiations are pending, if not concluded, between Governor Lindsay, representing the State of Alabama, and an English Company, for the sale of this railroad. The company desire to purchase the railroad and a large quantity of the coal and iron lands of North Alabama for the purpose of carrying on extensive mining operations. It is their intention, as soon as the purchase is consummated, to commence at once the work of constructing a railroad direct from Meridian to New Orleans. Arrangements have been made to go to work under the charters already granted by the Legislatures of Mississippi and Louisiana. This will give almost an air-line from New Orleans to New York and would become the great thoroughfare from New Orleans to the East. We learn that the agent of the company has fully agreed to the terms of sale proposed by Governor Lindsay, and that the only delay in closing the transaction is that it has to be referred to the Directors of the company in London.—*Madison Gazette.*

☞ The citizens of Bunker Hill (Ill.) are agitating the question of building a narrow gauge railroad from that town to St. Louis. The proposed route to be about midway between the Indianapolis and St. Louis and Decatur and East St. Louis Railroads, making a line of about thirty-six miles in length.

☞ The officers of the Springfield and Illinois Southeastern railroad are arranging to extend their line from Beardstown, its present northern terminus, to some point on the Mississippi river, and as soon as a location is definitely made, work will be commenced.

☞ The first installment of iron to complete the Quincy, Missouri and Pacific railroad from Edina, its present terminus, to Kirksville, has arrived at Quincy. The road will have trains running from Quincy to Kirksville by September 1.

☞ The Lansing Division of the Lake Shore and Michigan Southern is completed to Eaton Rapids, Mich., where the line crosses the Grand River Valley Division of the Michigan Central. The completion of the road to Lansing is being rapidly pushed forward.

☞ The Steamer G. H. Wilson, of St. Louis, has arrived at Dubuque with a thousand tons of railroad iron sent in bond from England via New Orleans, for the use of the Chicago, Dubuque and Minnesota Railroad.

☞ The Texas Central Railroad is in working order to Dallas, and will be completed to the Red river by January 1.

ENGINEER'S FIELD BOOK,

By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.

2d. Railroad curve tables for expeditiously determining the points at which commences the curving.

3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.

4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail**, upon receipt of the price. For sal at this office. Price **$1.50.**

CARRYING MAILS, PASSENGERS AND FREIGHT TO

KINGSTON, JAMAICA, SANTA MARTHA AND GREYTOWN, AND PACIFIC COAST OF MEXICO, CENTRAL AMERICA, PERU, AND CHILI.

Steamers leave 10th 20th and 30th each month, except when those days fall on Sunday, then the day previous.

Aug. 20, steamer OCEAN QUEEN, CAPT. H. P. CONNER, will leave Pier No. 42, North River, at 12 o'clock noon, for Aspinwall direct, connecting at Panama with steamer ARIRONA, Capt. ——, touching at Acapulco, Manzanillo, Mazatlan and Cape St. Lucas, and also connecting for all Central American and South Pacific ports. Departure of 10th each month connects with the Company's steamer, touching at San Benito, Tonata, Salina Cruz and Port Angel.

Freight for all way ports received until 4 P. M. of Aug. 17.

Steamer JAPAN will leave San Francisco, Aug. 31, 1872, for Japan and China.

For rates of passage, freight and all further information, apply at the Company's office on the pier, foot of Canal street.

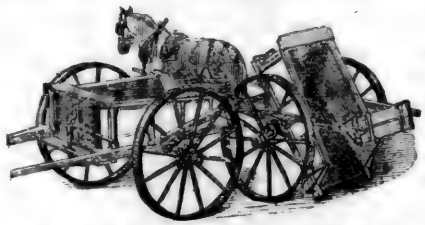
MATHEMATICAL & ENGINEERING

Instrument Manufacturers,

AT THEIR OLD LOCATION



43 NORTH SEVENTH STREET,

PHILADELPHIA,

Have so increased their facilities as to believe they can in future keep a full supply of instruments on hand.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board; without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**
PLAINFIELD, N. J.

STATE AND COUNTY RIGHTS FOR SALE.

Safe Car Lamp,
MINERAL SPERM OIL.
NO KEROSENE.

Williams, Page & Co..
BOSTON,

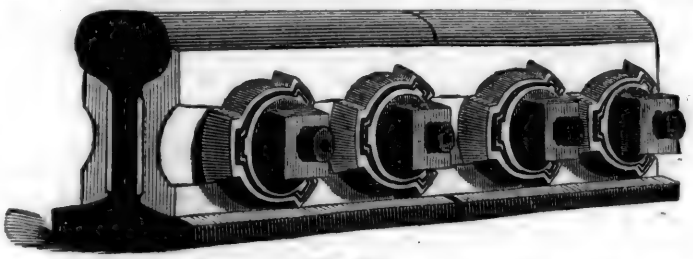
Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Monte Video and its Railways.

We hear a very good account of the progress of the Central Uruguay railway, and impartial engineers who have lately looked into the progress making, as well as the traffic likely to result from the extension of this line, report that the latter will exceed that of the Buenos Ayres Great Southern. The line passes through a populous district which has hitherto laboured under great disadvantages for want of easy communication with Monte Video; and railway facility will be a great advantage both to the country and to the city, the expense of transit having been a serious draw back to agricultural products. As we have so often remarked and called attention to, the Republic of Uruguay, or the Banda Oriental, is a comparatively limited, but compact and very fertile territory, watered by the great river of that name, with tributaries which extend a considerable distance inland, but not sufficient to depend on water facility; hence the want of railways which will open up communication with the interior, and enable farmers to send their produce quickly to market, and this will be supplied by the Central Uruguay railway. On the other hand, the Northern railway to Salto will identify Monte Video with Brazil, and bring down large quantities of produce from the Upper Uruguay. What railways have done for the Argentine Republic will soon be exemplified in the sister State, yielding, we quite believe, even more profitable results, as the Government of Monte Video is doing everything to promote and assist the development of railways.—*Brazil and River Plate Mail.*

Banking House

—OF—

JAY COOKE & CO.

No. 20 Wall Street, N. Y.

We continue to sell at par, adding accrued interest, the

FIRST MORTGAGE GOLD BONDS

—OF THE—

NORTHERN PACIFIC RAILROAD CO.

Track-laying on the Road is now progressing at the rate of two miles a day, through the most fertile prairie region of Dakota. On the completion of this season's contracts there will be

Five Hundred and Seventeen Miles

of the main line in operation, uniting Lake Superior with the Missouri River, and securing the large traffic of the Northwest. This amount of the road also entitles the Company to

Ten Millions Four Hundred Thousand Acres of Land,

located in Central Minnesota, Eastern Dakota, and in the Columbia Valley, on the Pacific coast. The bonds are secured by

A FIRST MORTGAGE

on the Road, its Traffic, and Franchise, and on the entire Land Grant received from the Government. The rate of interest is

Seven and Three-Tenths,

GOLD, equivalent to about EIGHT AND A QUARTER PER CENT. IN CURRENCY. Believing the security to be ample and the rate of interest satisfactory, we recommend these bonds as

A Desirable Investment.

Holders of United States 5-20s and high-priced corporate securities may materially increase both their principal and their interest income by exchanging for NORTHERN PACIFICS.

JAY COOKE & CO.,

New York, Philadelphia and Washington.

Safety upon Railroads.

We recently saw an item going the rounds of the daily press, to the effect that statistics had proved that traveling by railroad is the safest of any means yet devised, as it unquestionably is the most rapid and comfortable, because it more nearly comports with the every day experience of most people. To ride in a vehicle of some sort is a novel experience to but very few—scarcely any that have occasion to travel by rail—and the steam car is but an improvement upon the road wagon, exerting the same physical influence upon the occupant. The steam vessel introduces the passenger to entirely new experiences, which soon become extremely irksome. Therefore, as we have said, traveling by rail is more comfortable, as well as safer and more expeditious than by other means yet invented, or which now seem practicable.

Yet it cannot be denied that loss of life and limb is often severe, and that accidents often occur under circumstances which bring a reproach upon the management of our railroads. It is no matter for congratulation, that in the destruction of life and injury to limb, one railroad is no worse, or even a little better, than its neighbors. It is the clear and bounden duty of railroad officials to use all precautions against accidents, to neglect no means that may be presented which promise a mitigation of the perils to which this means of locomotion are especially subject.

Probably there is no more fruitful source of accidents resulting in great destruction of property, loss of life, and maiming, than the switch. Take the record of railroad accidents, and the "misplaced switch" holds a painful prominence in them. The reason is plain. The switch as ordinarily constructed and operated, depends for its efficiency upon the intelligence, sobriety, and presence of mind of a poorly paid class of operatives, in whom those qualities are not tested at stated intervals, under the eye of their superiors, but are daily and hourly called in requisition, and often with none near to correct their mistakes and omissions. It is obvious, therefore, that whatever can contribute to security of the switch has special claims upon the attention of builders and managers of railroads. It is comparatively easy to guard

against accidents in other parts of a railroad, and its rolling stock. In the rail, in the road bed, in the bridges, in the wheels and trucks, and in the locomotive, it is easy to discover and prevent imperfections; the examiner may know just where to look for danger, and to apply the remedy at once. But in the switch, danger lurks when least expected. The switch tender, who has been vigilant and faithful for years, may fail at a time when his failure will involve calamities that could not have been incurred at any other time.

In fact, a moment's reflection will satisfy any man, that there may be criminal negligence in this matter—not on the part of the humble switch tender, for imperfections are a part of human nature, and lapses a human weakness—but on the part of railroad managers. We would not, however, insist upon the indiscriminate application to roads of the many patent contrivances, warranted as absolute security against accidents of this sort. Doubtless many railroad superintendents have been disgusted with the whole subject, by the many worthless inventions that have been urged upon them. But this does not relieve them of the responsibility of seeking out some effective aid to security. And for the purpose of aiding them in this duty, we call their attention to the WHARTON SAFETY RAILROAD SWITCH. We see that it is commended as having proved effective in many emergencies, and as having been adopted for use upon some of the great railroads. We have no space for details, but those interested may obtain further information by addressing WM. WHARTON, Jr., Superintendent, &c., 28 South Third Street, Philadelphia.

Transportation of Live Stock.

A meeting was held in Jersey City on the 17th inst., to organize a company or corporation for the transportation of live stock from Communipaw to any point in New York, Brooklyn or Williamsburg. The idea is to avert the necessity of driving cattle or sheep through the streets. A large boat is to be built, with engines powerful enough to stem the East River tide, and by this means land any number of animals at any point. Directors were elected as follows: Hon. John McPherson and Messrs David H. Sherman, Isaac Freese, J. Stearn and S. Shuster. The books were opened and $40,000 worth of stock was subscribed. The directors subsequently met and elected Mr. David H. Sherman President, and Hon. John H. McPherson Secretary and Treasurer. The directors were empowered to carry the work forward.

Cannon Valley Railroad.

The Red Wing *Argus* says the surveying party which, under the direction of Major Rogers, has been over a month engaged in surveying the proposed Cannon Valley Railroad between Faribault and Red Wing, arrived at Red Wing Saturday evening. The line run comes in nearly a direct course from Faribault to Belle Creek, passing about a mile north of Hader; thence to Belle Creek to near the Red Wing and Le on Railroad; thence over the divide into Hay Creek valley, and down that valley to this city; making from Faribault to Red Wing 46 1-2 miles, with favorable grades and but little curvature. On Monday, Major Rogers and party started on their return trip, to survey a route along the banks of Cannon, via Cannon Falls to Faribault; after which they will run two lines on the other half of the proposed road, between Faribault and Mankato.

Railroad Extension in Ohio.

The Marietta and Pittsburg Railroad Company has filed with the Secretary of State the necessary papers to enable them to construct branches to the main line, described as follows: Northwest Extension from a point on the main line in Liberty township, Guernsey county, through Guernsey, Coshocton, Holmes, Knox, Ashland and Richland counties, to a connection with the Mansfield, Coldwater and Lake Michigan road, at Mansfield; the McConnelsville Branch, from a point on the main line near Point Pleasant, Valley township Guernsey county, through Guernsey, Noble, Muskingum and Morgancounties, to a connection with the Marietta and Muskingum Valley road, at McConnelsville; East Fork Branch, from a point on the main line in Salem township, Washington county, to a point on the east line of Noble county, near Hafford township, Monroe county; Dexter Coal Branch, from a point near Dexter station, Jefferson township, Noble county, up Buffalo run; Marietta City Branch, from a point in Washington township, Washington county, through the city of Marietta to a connection with the Marietta and Cincinnati road in Harmar township.

Chicago and Northwestern Railway.

The earnings of this road for the years ending May 31, 1871 and 1872, were as follows:

	1870-'71.	1871-'72.
From passengers	$3,333,111 03	$3,260,654 06

From this amount two dividends of 3½ per cent. each have been declared on the preferred stock, amounting in all to		1,486,188 64
Balance of net income for the year		$1,132,135 14
To which should be added the balance standing to credit of income on the 31st of May, 1871		333,559 17
Leaving balance to credit of income account May 31, 1872		$1,465,694 81

The line comprising the different divisions of the road are as follows:

Wisconsin Division:	Miles.
Chicago to Fort Howard	242.2
Fort Howard to Marrinette	49.1
Kenosha to Rockford	72.4
	363.7
Galena Division:	
Chicago to East Bank of Mississippi River, opposite Clinton	137.0
Chicago to Freeport	121.0
Elgin to Geneva Lake	44.5
Geneva to St. Charles	2.4
	304.9
Iowa Division:	
Length of Bridge from East Bank of Mississippi River to Clinton	1.1
Clinton to Cedar Rapids, (Chicago, Iowa and Nebraska Railroad)	81.3
Cedar Rapids to Missouri River opposite Omaha, (Cedar Rapids and Missouri River Railroad)	271.6
Clinton to Lyons, (Lyons Branch Railroad)	2.6
Lyons to Anamosa (Iowa Midland Railroad)	68.8
	425.4
Madison Division:	
Belvidere to Madison	67.6
Madison to Reedsburg	52.6
	120.2
Peninsula Division:	
Escanaba to Lake Angeline Mine	67.9
Branches and Extensions to Mines	15.8
	83.7
Milwaukee Division:	
Chicago to Milwaukee	85.0
Total miles	1,382.9

The business of the different Divisions of the road during the past and preceding years compare as follows:

Earnings:	1871.	1872.
Wisconsin Division	$2,611,578 67	$3,037,341 31
Galena "	3,989,262 91	3,591,888 51
Iowa "	2,879,556 39	2,343,726 10
Madison "	202,705 91	269,428 65
Peninsula "	865,573 08	800,614 82
Milwaukee "	1,146,237 48	1,369,162 55
Total	$11,694,914 44	$11,402,161 44

Expenses:		
Wisconsin Division.	$1,587,543 01	$1,921,348 90
Galena " .	1,854,602 56	2.074,935 25
Iowa " .	1,820,263 40	1,638,496 92
Madison " .	145,687 64	244,206 13
Peninsula " .	367,630 80	373,484 22
Milwaukee " .	535,778 89	557,554 48
Total.....	$6,311,606 40	$6,810,025 90
Net, as above...	$5,383,408 14	$4,592,135 54

Compared with the previous year, the earnings show a decrease of $292,753, or 2.56 per cent. The extent of the loss occasioned by the stoppage of business, the temporary diversion of traffic from Chicago to other points, during the depression caused by the great fire in that city in October last, cannot be measured by this result. Of the deficit above shown, $143,966 16 belongs to first week, and $279,454 49, or nearly the entire amount to the four weeks immediately subsequent to the fire.

The total decrease in earnings for the first half year, ending November 30th, 1871, embracing the period of the Chicago fire, amounted to $765,562 21; while the earnings of the second half year, ending May 31st, 1872, show a gain over the corresponding months of the previous year of $472,-809 21; being an average gain for the six months, of nearly $80,000 per month.

The cost of operating, while comparing favorably with the expenses of other leading lines of railway, has been affected by the extra amount and price of labor and materials required for temporary accommodations in the City of Chicago, and in expensive renewals and repairs, consequent upon the destruction of property by the fire. Large outlays were also required for the maintenance of the track and rolling stock during a winter of much severity and long duration in the latitude traversed by a large portion of the company's lines. The whole expenses properly pertaining to operating for the year were $6,463,100 72, or 56.68 per cent. of gross earnings, and including taxes and charges to account of fire losses, were $6,810,025 90 or 59.72 per cent.

The net earnings for the year amounted to $2,-618,323 78, which is equal to 7.3 per cent. on both classes of stock; and with the surplus at the beginning of the year, amounted to $2,951,882 95, or 8.2 per cent. From these earnings the directors have declared two semi-annual dividends of 3½ per cent. each, on the preferred stock, leaving a balance of $1,465,694 31, to the credit of income account at the close of the fiscal year.

The amount of capital stock issued during the past year is as follows:

Common stock:	
For exchange of Beloit and Madison Railroad stock.....	$750 00
For dividends on Beloit and Madison Railroad stock.....	75 00
For conversion of Peninsula bonds....	36,000 00
" fractional dividends on stock.....	150 00
	$36,975 00
Preferred stock:	
For exchange of Beloit and Madison Railroad stock.....	$800 00
For dividends on Beloit and Madison Railroad stock.....	300 00
For conversion of Peninsula bonds....	36,000 00
" fractional dividends on stock.....	250 00
	$37,350 00

The total amount of capital stock outstanding, including the above, and that held by trustees, as explained in last report, is as follows:

Common stock and fractional scrip.	$14,810,980 40
Preferred stock.....	21,067,663 42
Total amount.....	$35,878,643 82

The last instalment of $275,000, of ten per cent. equipment bonds, due on the first of November, 1871, was paid off at maturity.

The amount of bonds retired during the year was as follows:

Of Peninsula bonds.....	$72,000 00
Of Appleton extension bonds.....	34,000 00
Of Green Bay " "	11,000 00
Of Beloit and Madison bonds.....	9,000 00
Of ten per cent. equipment bonds ...	275,000 00
Total.....	$401,000 00

Consolidated bonds have been issued in accordance with the terms of the mortgage for bonds retired, to the extent of $126,000, making a total reduction for the year of $275,000.

The aggregate of funded debt outstanding against the completed lines of the company, has been materially reduced by payments and conversion of bonds into stock during the last five years.

By reference to the report of 1867, it will be seen that the funded debt at that date, exclusive of the debts of the Chicago and Milwaukee and the Beloit and Madison Companies, amounted to $16,251,000. The same class of bonded indebtedness now stands at $12 575,500, being a reduction in the five years of $3,675,500.

Bonds outstanding	May 31, '67.	May 31, '72.
Flagg Trust Bonds.....	$200,000	None.
Preferred Sinking Fund Bonds.....	1,250.000	$1,245,500
Appleton Ext. Bonds....	184,000	148,000
Green Bay " " ...	300,000	289,000
Funded coupon " ...	756 000	755,000
General 1st mortgage...	3,600,000	3,588,000
1st mortgage G. & C. U. R. R. Bonds.....	1,919,000	1,785,100
2d mortgage G. & C. U. R. R. Bonds.....	1,173,000	918,000
G. & C. U. R. R. 6 per cent. Elgin and St. Line Bonds.....	189,000	135,000
G. & C. U. R. R. Mississippi River Bridge Bonds.....	200,000	200,000
7 per cent. Equipment Bonds.....	165,000	101,000
Peninsula Bonds..... ...	1,075,000	695,000
Consolidated Sinking Fund Bonds.....	3,040,000	2,686,000
10 per cent. Equipment Bonds.....	2,200,000	None.
Totals.....	$16,251,000	$12,575,500

The amount of Chicago and Milwaukee and Beloit and Madison Bonds then outstanding was.....	$2,097,400
The amount now is.....	2,048,500
Reduction in these bonds.....	$48,900

The more recent issues of gold bonds by this company were made for the purpose of providing means for the construction of the Madison and Menominee Extensions, described in the last Annual Report, and cover entirely new and additional property.

These extensions, when completed, will add about 250 miles of new railroad to our system; and should the expectations which are confidently entertained of their productiveness be realized, they will bring, even at moderate estimates, a large accession of business to existing lines, and greatly increase our annual revenues; sufficient, it is believed, to pay the interest on the bonds, and return a reasonable dividend on this new property.

The amount of these bonds, as stated in the general balance sheet appended to this report, is as follows:

For the 126 miles of Madison Extension.	$3,150,000
" 120 " of Menominee Extension.....	2,700,000
Total issues on new works.....	$5,850,000

The materials are purchased for the track of both these lines, and the grading is being pushed forward to complete them during the present year. Portions of the lines have been opened for use from time to time during the last year, as the work has progressed, and at the date of this report 101 miles have been in operation for a few months to accommodate local business.

The principal object of their construction as parts of the great thoroughfares to the Northwest and North cannot be attained, nor their value as feeders be felt, to any considerable extent, until by completion they shall come to connect with the other portions of our roads which lie beyond them.

The unparalled calamity which, in the month of October last, swept over a great portion of the City of Chicago, destroyed a large amount of property owned and used by this company, and seriously impaired those facilities, which, at their best capacity, were no more than adequate for the accommodation of the usual fall traffic. Among the most important property destroyed were two large brick freight houses, a brick flour warehouse, one large grain elevator, from which the company derived an annual rental of $25 000, and two other elevators belonging to other parties situated on our tracks, but which were exclusively used in the company's business. The passenger buildings and depot of the Galena Division, besides several smaller buildings, and the large block occupied by the general offices of of the company, were utterly destroyed.

One hundred and thirty-three freight cars, standing on the tracks and in the warehouses, were burned. These will be replaced by new cars and the equipment made good.

The total losses were estimated at $194,000, against which there was partial insurance in good companies. The amount of insurance realized up to the present time is $68,400. The total loss will probably be something more than the original estimate, and will by a little exceed $500,000.

The actual value of property destroyed was, however, less than the inevitable loss of business resulting from the first effects of the fire. But the immense recuperative power which inheres in the business of Chicago, was too strong for any permanent destruction of trade, and within sixty days after the fire the receipts of the company had recovered their decline, and exceeded the earnings of the same period in the previous year From that time the increase in earnings has steadily continued, although covering the dullest six months of the fiscal year.

The amount of elevator capacity destroyed was about 1,300,000 bushels, and this curtailment of our storage facilities necessarily restricted the transportation of grain, seeking market over our lines, during the winter and spring. Two new elevators—one on the company's grounds, and one on the old site on their tracks—are in process of construction, to be completed, with a capacity of over 1,500,000 bushels, in ample time for the next ensuing harvest. Two large temporary wooden freight houses were erected last fall in place of the brick one destroyed, to supply immediate and pressing wants. Since then, and during the winter and spring, the company has rebuilt and is rebuilding the brick freight and flour warehouses, and enlarging others for permanent occupancy. It is not expected that all the buildings destroyed, will be restored, but such as are needed from time to time will be rebuilt.

During the last year there has been expended on the Madison Extension the sum of $2,175,007 44, which includes payments for large quantities of iron, ties and materials for the completion of the entire track to the junction with the La Crosse, Trempealeau and Prescott Railroad. The grading is far advanced north of Wonowoc, to which point the track is now laid, and as soon as the tunnels can be finished, the whole line will be put in operation.

The sum of $1 503 560 52 has been expended during the year in the construction of the Menominee Extension, between Fort Howard and Escanaba, and about fifty miles were completed, including the bridge across the Menominee River, and put in operation in February last. The balance of the work is in progress, and will be completed to a connection with the Peninsula Division, by the close of the present year.

Other important expenditures for construction

have been made as follows: For new side tracks and extensions to various iron mines on the Peninsula Division, $122,425 67; for new buildings on the several divisions of the company's lines, $79,575 67; for the Erie Street Viaduct in Chicago, $23,884 87; for changing the old line of the Madison Division, between Syene and Madison, $10,608 06; for rights of way and depot grounds, $11,338 58; for construction of telegraph, $1,137 17; for the Saint Charles and Batavia branches of the Galena Division, $2,471 63; and for the difference in weight between the light rails taken up and heavy rails laid down to replace the same, the sum of $73,663 09; making a total expenditure for these Extension and for general construction purposes, less some items to credit of construction account, of $3,981,258 01.

Since the last annual report, the Winona and Saint Peter and the La Crosse, Trempealeau and Prescott Railroads have been connected by the completion of the new bridge, with an iron draw, across the Mississippi River at Winona with its necessary approaches; and the extension of the Winona and Saint Peter Railroad west of St. Peter has been vigorously prosecuted, and is now in active progress, with a view of completing the entire line within the period limited by its land grant. The rails, spikes and track materials were purchased in the early part of the year, before the large advance had taken place in the prices of these important and expensive items; and a large saving will be effected by these purchases in the cost of the road.

This line from St. Peter to New Ulm, 30 miles, was opened in February last, and the remaining portions are being rapidly constructed. The cost of this extension and its equipment is borne by the Winona and Saint Peter Railroad Company, and the means provided by the issue of its first mortgage gold bonds on the property, and further secured by the proceeds which will result from the sale of its land grant lands. There has been expended for account of this extension, within the year, the sum of $2,428,262 51, and the further sum of $20,317 81 for account of the previous extension east of St. Peter, and for the branch to Mankato.

The Iowa Midland Railway was finished to Anamosa in October last, where a connection is made with the Dubuque and South West Railway, with which reciprocal and permanent arrangements have been established, that will materially benefit and increase the business of both parties. The expenditures for account of the completion of this road for the year were $730,883 74.

The opening of the line to Anamosa was made at a period so nearly simultaneous with the occurence of the Chicago fire, as to seriously affect the natural course of its business during the entire fall, and caused a diversion into other channels of a large share of its traffic, which, under ordinary circumstances, would be forwarded over the Galena Division to Chicago.

The company have 269 locomotives; of these 98 are wood burners and 171 coal burners; 216 are first class and 53 second class and switching. The car equipment consists of 123 first-class and 27 second-class passenger cars, 4 business, 123 caboose and way, 76 baggage, mail and express, 7 boarding, 3,530 box, 960 platform, 337 stock, 25 dump, 1,121 iron ore, and 10 wrecking, etc., cars.

The number of passengers carried during the year was 2,224,705; do carried one mile, 99,299,476. Number of tons of freight carried, 2,510,016; do. carried one mile, 287,764,006. The total number of passengers and tons of freight was 4,734,721; total of same carried one mile, 387,063,482. Earnings per passenger, $1 47; earnings per ton $3; average earnings per passenger and per ton, $2 38. Earnings per passenger per mile, 3.28 cents; earnings per ton per mile, 2.61 cents; average earnings per passenger and per ton per mile, 2.92 cents.

General Balance Sheet, May 31, 1872.

Old Construction:		
Cost of road and property in accordance with terms of consolidation, to May 31, 1871		$39,972,412 62

Liability of Telegraph Companies.

An important legal decision was announced at the last term of the law court in this district, which settles the law in this State as to the liability of telegraph companies to their employers in case of failure to transmit or deliver messages. As the case (George W. True *et als* against International Telegraph Company) is of novel impression in our courts and of interest to the public, we give a brief statement of the facts. In 1870 George W. True & Co., of this city, sent a dispatch to their correspondents in Baltimore, accepting an offer of a cargo of corn at a given price and freight. The offer had been made by telegraph the same day and the reply was sent on a "night blank" of the International Telegraph line at the usual night rates. The dispatch, on account of the carelessness of some operator on the line west of Boston, was not duly forwarded, and True & Co. failed to secure the cargo of corn. As the market price of corn and freights advanced immediately, they were obliged to buy other corn to meet the wants of their business at a price largely in advance of that offered. A claim was immediately preferred against the telegraph company for the damage resulting from their failure to promptly transmit the message to its destination, which was resisted by the company, on the ground that one of the conditions printed on their "night banks," subject to which the message was sent, was that the telegraph company should not be liable, in case of failure to deliver the message, to an amount greater than the sum paid for its transmission—in this case forty-eight cents. Suit was therefore brought to recover special damages; the case was argued July, 1870, and has been under consideration two years; the court has now rendered a decision in which the claim of the plaintiffs is sustained in full.

The ground of the decision being that although telegraph companies may establish reasonable rules for the conduct of their business, they cannot by printed notices on their blanks relieve themselves from the liability which the law imposes on them from motives of public policy; that the courts are to determine in the last resort whether the rules and limitations prescribed by the company are reasonable, and that the condition set up in defense in this case was not binding upon the plaintiffs, as it attempted to relieve the telegraph company from all liability, (beyond the amount paid for the message,) whether arising from carelessness, accident or willful default of the company and its servants. The measure of damage was declared to be the difference between the price of the cargo offered and of that bought to supply its place with the additional freight.—*Portland (Me.) Press.*

☞ An advantageous and more reasonable arrangement in regard to the pre-payment of newspaper postage has come into operation under the new law than prevailed heretofore. The new postal code provides that on newspapers and other periodicals sent from the office of publication to regular subscribers postage can be paid for one quarter or one year, commencing at any date, in advance. Formerly only the regular quarters of the official year could be paid for separately in advance.

The Supreme Court of Iowa has declared that where cattle are enticed by the dripping of water from a railroad tank, and are thereby brought upon a railroad track, and while there injured, the railroad company is liable.

☞ The contractors have begun on the Nashua section of the Boston, Nashua and Acton Railroad.

☞ The Summit Branch Railroad has declared a dividend of 3 per cent., or $1 50 per share, payable Aug. 15.

Milwaukee and Northern R. R.

The Milwaukee *Wisconsin* says that the Milwaukee and Northern Railroad Company are pushing their road ahead. They will reach New Holstein by about Thursday evening next. A large lot of iron, plates, &c., has just been received here, and the track is being laid as fast as possible. The distance by this road is materially shortened between Milwaukee and Fond du Lac and other cities between there and Green Bay, and as between Green Bay and Chicago the distance is so much less that it enables passengers to stop two hours in Milwaukee, and yet reach there destination as early as by the old route. For instance, passengers can leave Chicago on the Milwaukee Division of the Chicago and Northwestern rail road, reach Milwaukee at one P. M., stay in that city two hours, and taking the Milwaukee and Northern railroad, reach Green Bay at 10.30 P. M. On the old line via Janesville and Watertown they leave Chicago at 10 A. M. and reach Green Bay at 10.30 P. M., traveling all the time.

☞ The Petersburg *Index* says that "new iron is pouring in for the Atlantic, Mississippi and Ohio Railroad. Two cargoes, containing 1,500 tons of best rails, have already been received. The Norwegian ship Edwin is now discharging at City Point her cargo of some 530 tons, and lying below the Point, in James River, is the Italian ship Don Justo, with 1,000 tons. The road is improving in all its divisions, and we hope we may look before long for a reduction in the time made from Petersburg west."

☞ The Atchison, Topeka and Santa Fe Railroad, stimulated by a liberal land grant, is being built at the rate of from two to three miles per day. The end of the track is over 300 miles from Atchison, and a branch of twenty seven miles has been built from Newton to Wichita. There is about 120 miles more to be built before the conditions of its grant are fulfilled, which is to reach the west line of the State before the 1st of March, 1873. The company expect, however, to reach that point before winter sets in.

☞ A dispatch from Dakota states that track-laying on the Northern Pacific Railroad is progressing at the rate of three miles per day, and that trains will reach the Missouri river in October. The line is now being located along the Yellowstone, in Montana, and there is no opposition from Indians on any part of the route.

☞ The Cleveland and Mahoning Railroad Company, the Niles and New Lisbon Railroad Company, and the Liberty and Vienna Railroad Company, have filed with the Secretary of State of Ohio an agreement of consolidation under the name of the Cleveland and Mahoning Valley Railway Company.

☞ The Charleston (West Virginia) *Courier* says that the officers of the Chesapeake and Ohio Railroad Company and those of the Peytona Cannel coal company contemplate at no very distant time effecting a connection by rail between the cannel coal mines of the latter corporation and the railway of the former.

☞ The Providence and Worcester Railroad Company has completed its second track to Saundersville, nine miles from Worcester.

$5,000,000.

A

PRIME INVESTMENT

AT A

LOW PRICE

THE

CHICAGO

AND

CANADA SOUTHERN

First Mortgage Sinking Fund 30 Years'

7 PER CENT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

Interest Payable April and October at Union Trust Company.

This road is the western link in the new AIR LINE from BUFFALO to CHICAGO, and runs from the Detroit River to Chicago in nearly a straight line.

The road is a part of the same line as the Canada Southern, and is being built by the same men, viz.: Milton Courtright, John F. Tracy, David Dows, Wm. L. Scott, Henry Farnham, R. A. Forsyth, John M. Burke, M. L. Sykes, Jr., all Directors either in the Chicago and Northwest, or the Chicago, Rock Island and Pacific; Geo. Opdyke, of the Midland Road; Sidney Dillon, Daniel Drew, John Ross, David Stewart, Samuel J. Tilden, Kenyon Cox, and other prominent railroad men.

The Road, like the Canada Southern, will have steel rails (60 pounds to the yard) throughout; is practically straight and level; much shorter, and can be run more quickly and with greater safety than any other road connecting Buffalo and Chicago.

Twenty-five miles are finished and running; seventy-five miles more are so far advanced as to be finished by January 1st, and the entire road will be completed during the ensuing year. Steel rails and ties for one-half the entire road have already been purchased.

The builders of the road control enough of its Chicago feeders to obtain for it a profitable business from the start, having projected the line to accommodate existing business, and having seen the necessity for another trunk line between Chicago and the Atlantic seaboard, located expressly with the view of obtaining the cheapest transportation practicable.

The branch lines will make the shortest connections between Chicago and Toledo, and Chicago and Detroit, as well as between all these points and Buffalo.

The Canada Southern Bonds in every particular like these, were eagerly taken, the last of them several weeks ago, by the best class of investors, and were on the market a shorter time than any other railroad loan of like amount for years past.

The proceeds of these bonds will complete the entire line, and we recommend them with the same confidence as we did the Canada Southern, and regard them as in every way a choice security.

Leavenworth, Lawrence and Galveston Railroad.

The Superintendent and Chief Engineer, Mr. O. Channte, reports as follows for the fiscal year ending April 30, 1872:

At the date of our last report, the road was in operation to Thayer, 108 miles south of Lawrence, or 134 miles from Kansas City. Construction had just begun for its extension to the State line. This was pushed with vigor, and the road opened to Cherryvale, July 19, and to Coffeyville and the south line of Kansas, August 28, 1871.

Arrangements having been made to build a branch to Parker, 1 8-10 miles, and to undertake the construction of so much of the Southern Kansas Railroad as lies between Cherryvale and Independence (the county seat of Montgomery county) the former was opened on the 1st of November, and the latter on the 31st of December, 1871.

The system now operated by this company consists of the following:

Leavenworth, Lawrence and Galveston Railroad, main line—Lawrence to State line	144.16
Leavenworth, Lawrence and Galveston Railroad, Parker Branch—South Coffeyville to Parker	1.80
Southern Kansas Railroad—Cherryvale to Independence	9.70
Kansas City and Santa Fe Railroad—Ottawa to Olathe	31.91
Missouri River, Fort Scott and Gulf Railroad, joint track—Olathe to Kansas City	21.00
Total	208.57

The average number of miles operated during the year, over this company's own lines, amounts to 169 42-100 miles, and, including the joint track used in common with the Missouri River, Fort Scott and Gulf Railroad, to 190 42-100 miles.

These extension have been completed in the same style of excellence as the remainder of the road constructed by the present management and fully up to the first class Western standards.

The ruling maximum grades are 45 feet per mile, and the curves of long radius. The embankments are from 14 to 16 feet, and the cuts 20 feet wide at grade; while much greater care than is usual has been paid to thorough drainage. In grading the line, the stone from the rock cuts was saved and deposited on the sides, and no less than 20 miles are already ballasted with broken stone. The track is laid of 57 pound rails, well fished at the joints, and resting on abont 2,700 white oak and black walnut ties per mile. It is safe to run at the rate of 60 miles an hour over any part of it.

The stations, appointments and rolling stock are fully up to the same standard of excellence in character, and all passenger trains are equipped with Miller's platforms and couplers, and with Westinghouse' atmospheric brake.

The amount of the equipment now on the road is as follows: 20 engines, 10 passenger coaches, 4 smoking cars, 5 baggage cars, 4 mail and express cars, 7 caboose way cars, 165 box cars (combination), 90 flat and coal cars, 1 wrecking car, 86 hand cars, and 82 rubble cars.

This is barely sufficient for the present business. If this increases, as it is believed it will, additions will be required from time to time, and probably 50 or more box cars before the end of the year.

The country through which the road runs is a fertile, attractive prairie region, well watered, and sufficiently supplied with timber for all farming operations. The substratum of the soil is limestone. It is, as yet, comparatively thinly settled, the eastern tier of counties in Kansas having received the earlier emigration to the State.

The population is rapidly increasing, no less than 22,000 settlers having been added during the year. The country is so attractive that, should Kansas continue to be favored with the splendid crops of the last few years, it must, in a short time, afford a remunerative traffic. Every effort is being made to invite emigration to this portion of the State, and to promote the development of the country.

The earnings and operating expenses during the past fiscal year, upon the average of 190.42 miles operated, have been as follows:

Earnings from freight		$322,978 49
" passengers		238,499 41
" mails		20,266 62
" express		10,222 79
Miscellaneous		2,025 76
		$593,992 87
Operating expenses, 66 per cent.		395,678 92
Net earnings		$198,313 95

The operating expenses have been increased by the transportation of materials for the extension of the road, the volume of which has been nearly 22 per cent. of the whole tonnage carried.

As the road has a double northern terminus, at Lawrence and at Kansas City, and through cars have to be run to both cities, more passenger accommodation is furnished than would be otherwise required.

It will also be noticed, from the table of commodities carried, that 68,692 tons were transported southward, and only 16,258 tons, or less than one quarter, northward. This result is incident to the settlement of a new country. Immigrants import lumber, supplies of various kinds, and food, and have nothing to export. These causes greatly increase the percentage of cost and operating expenses.

During the past year a bridge has been built over the Kansas river at Lawrence. This structure consists of four spans of Howe Truss, 150 feet each, resting upon wooden piers, and, with the approaches, has cost about $70,000.

The city of Ottawa having voted $60,000 in city bonds, and furnished twenty acres of ground, to be used in the construction of the machine shops at that point, some 22 more acres have been secured by gift and purchase, and arrangements are now being perfected to go on with the work, so that this much needed accommodation may be furnished before next winter.

In closing, permit me to return my thanks for the valuable assistance furnished to me by the heads of the various departments, and to call your attention to the fidelity and zeal with which the agents and employees have, all alike, performed their services in the operation and construction of the road.

The report of the President, Mr. James M. Walker, which recites many of the facts contained in the Superintendent's report, says that the ten miles from Cherryvale to Independence were built from the proceeds of $75,000 of city and township bonds of Independence, donated for the purpose, and from the proceeds of $160,000 of 8 per cent. 20 year bonds of the Southern Kansas Railroad Company. The Leavenworth, Lawrence and Galveston Company has a perpetual lease of the line, the rental being the interest on the $160,000 of bonds ($12,800 yearly) and the provision of a fund for the purchase of the bonds in the market by setting aside 40 per cent. of the gross earnings on the main line from all traffic received from the leased road.

The company uses the 21 miles of Missouri River, Fort Scott and Gulf road between Kansas City and Olathe for through traffic, by paying half the cost of maintenance and 10 per cent. on half the cost of the road. It uses the depot grounds in Kansas one-fourth of which it owns, in common with the same company, and they are to be improved at their joint expense.

The company sold during the year 42,539.42 acres of land at an average of $3 15 per acre, making the amount, with the receipts of town lots $361,079 20. Sales were interrupted by a question as to the validity of the company's title to the Osage Ceded Lands, which has been fully confirmed, the patents having been granted. It is hoped that now the land will sell more rapidly. The assets and liabilities of the company are:

ASSETS.

Balance due for lands sold to date		$440,660 84
418,969 acres of land and estimated value town lots		3,275,727 14
County and townships bonds (par value)		1,349,400 00
		$5,066,787 98
Construction of main line, 146 miles of road	$4,300,319 97	
Construction of Kansas City and Santa Fe Railroad, 33 miles of road	913 623 05	
Construction of Southern Kansas Railroad, 10 miles of road	164,208 03	
Equipment	604,364 36	
		5,982,515 41
Due from Post Office department	$8,842 43	
Due from agents and foreign roads	64,207 52	
Materials on hand paid for	15,866 27	
Balance in treasury	36,202 99	
		125,119 21
Total		$11,173,422 60

LIABILITIES.

Funded debt:		
Leavenworth, Lawrence and Galveston R. R. bonds	$5 000,000 00	
Kansas City and Santa Fe R. R. bonds	720,000 00	
Southern Kansas R. R. bonds	160,000 00	
		5,880,000 00
Bills and accounts payable		278,616 12
Surplus		5,014,806 48
Total, as above		$11,173,422 60

The capital stock stands at $5,000,000.

☞ The Chicago, Clinton and Dubuque Road has a corps of engineers surveying the route for an extension of the road to Burlington. Engineers of the Chicago, Dubuque, and Minnesota road are also busily searching for a route for a branch north for a junction of that road with the Iowa and Pacific to Mankato and New Ulm, Minn. The Wisconsin Valley Road, building by the Chicago, Dubuque and Minnesota Road, is under construction on the whole route. The grading is nearly finished between Tomah and Grand Rapids, Wis. A branch from Sparta, via Black River Falls, to Neilsville, Clark county, Wis., is contemplated.

☞ Colonel Wm. J. Budd, the well known railroad contractor, has the contract for building fifty miles of the Texas Pacific railroad, west from Long View, and will set three thousand men at work at once. A section of sixty-five miles of this road between Shreveport, La., and Long View, is already built. Three branches of this road, one from Memphis, one from Vicksburg, and one from New Orleans, will concentrate at Fort Worth.

☞ The track of the Hastings and Dakota Railroad is laid to Young America, a distance of sixty-four miles from Hastings.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, August 24, 1872.

Stock Exchange and Money Market.

Under speculative manipulations, designed mainly to influence stock values, Money has been quoted firmer in price, ranging from 3@6 per cent. on call, on a more active inquiry for prompt aid, but at the advanced rates, there has been an adequate supply available to responsible borrowers on good callaterals, and the market has shown no indications of anything like uncomfortable stringency. In the line of mercantile credit, a fair business has been reported, with strictly choice to good paper rated at from 6½@9 per cent. per annum. The fall trade prospects are quite encouraging, in most instances. The new importations are large, while the withdrawal of goods, of the previous importation, from bond, continue quite free. The city banks, last week, were again losers, in the averages of legal tender notes and of deposits, while reporting a handsome gain in their specie reserve. The U. S. Sub-Treasury added liberally to its coin balances chiefly through the free receipts from customs which amounted at this port alone, and for the week to $3,609,000. The office cut down its currency reserves slightly.

The U. S. Sub-Treasury office last week added to its coin balance about 2⅛ millions and reduced its currency reserve about an eighth of a million. The office received during the week $3,327,095 of currency, and $4,691,425 of gold, the latter including $3,780,000 from customs; and disbursed $3,453,218 of currency, and $2,527,952 of gold, the latter embracing $525,919 of coin interest. The city banks reduced their loan and discount average over 3¼ million during the week, and again contracted their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $7,759,849, and a coin reserve of $49,252,061.

The city banks, in their latest return, show a reduction of $2,037,200 of legal tender notes with an increase of $2,200,300 of specie, and a loss of $1,910,600 of deposits, also a contraction of $3,583,700 in their loan and discount averages, and of $22,400 in their item of circulation. The city bank exchanges, last week, averaged 91¼, and thus far, this week, about 92 millions daily. The banks now hold $7,170,650 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $20,399,300, against $9,408,805 same time last year. The city bank deposits are now $235,757,600 against $247,257,470, week ending Aug. 19, 1871. The legal tender reserve amounts to $52,533,400, against $70,098,500 same time last year. The circulation now stands at $27,290,600 against $30,247,552 same time last year. The loans are now $295,802,800 against $304,537,429 at this date last year.

The coin reserve of the city banks is now about 20⅜ millions as against about 29½ millions on the 20th of July; the legal tender reserve is about 52½ millions against about 55½ millions on the statement of June 15th.

Government revenues yielded liberally during the week. The excises yielded within the week about three millions, and thus far in the current fiscal year beginning with July 1, 1872, about 21½ millions The customs at the port of New York last week were $3,609,773; at the outports, equal to about $1,200,000 all in coin, or coin certificates.

Under the Treasury programme for August, Government proposes to sell gold as follows: Thursday, August 29, $1,000,000. And to buy in Five-Twenties, as follows: Wednesday, August 28, $1,000,000.

Gold has been offered much more freely, chiefly on speculative account, and the price has been depressed, closing rather steadier. The dealings have been more extensive and mainly speculative. The customs call has been moderatively active, and the export drain light.

The range of the price during the week has been from 113¾@115 and the closing quotation on Wednesday was 114 against 114⅝ the preceding Wednesday. The specie outflow last week, was only $582,175. The Gold Exchange Bank clearances have averaged about 62¼ millions per day during the week. On Tuesday of the current week, they were up to $142,974,000; and on Wednesday over 90 millions.

The customs demand for Gold last week, averaged $630,000 a day; thus far, this week, it has averaged $518,500 a day, or equal to a

weekly aggregate of $3,111,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $21,838, and since Jan. 1, 1872, $2,819,260 against $7,465,207 same time in 1871. The total customs revenue of the Government, in coin, at this port, since January 1, has been $96,474,277 against $101,984,954 during the same time in 1871.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $56,299,029, against $61,090,565 during the same time in 1871.

The export drain of specie was $582,185 last week, against $647,340 same week preceding year. The shipments since January 1, 1872, have been $55,820,441 against $52,877,856 during the same portion of 1871.

Foreign Exchange has been rather steadier in price, on a moderate offering of prime bills, and a somewhat better supply. Bankers' sixty day bills on London closed on Wednesday at 108¾@109; sight bills on London, 109⅝@109⅞.

The week's exports hence of domestic produce have been to the currency value of $3,906,951.

Government securities have been less active, and rather lower in price, influenced by the decline in Gold. At the close, the market was firm, and the investment inquiry for the gold bearing issues, fair, at the ruling figures.

On Wednesday, Government bought in only $34,300 of Five-Twenties at 113 50@113 60 out of an aggregate offering of $3,236,650.

U. S. sixes of 1881 at the close on Wednesday of the current week were quoted at 117½@118; U. S. Five-Twenties of 1862, (other than the bonds called in) 115⅜@115⅜; U. S. Five-Twenties of 1864 at 115⅜@115⅝; U. S. Five-Twenties of 1865, 115⅞@116¼; U. S. Five-Twenties of 1865 consolidated, 114½@114⅝; U. S. Five-Twenties of 1867, 115@115⅛; U. S. Five-Twenties of 1868, 114½@115; U. S. Ten-forties at 112⅜@113⅞; U. S. Fives of 1881 (Funding Loan) 112⅜@112⅝; Six per cent. currency bonds, 113½@113¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 7.	Aug. 14.	Aug. 21.
Consols	92½	92⅝	93
U. S. 5-20's of 1862	91¾	92¼	92¾

New Fives of 1881	89	90	90¼
Erie	39½	36½	39½

*Less September coupon.

State bonds have been in limited demand and generally weak in values.

Railway and Miscellaneous share property has been pressed for sale and quoted lower, influenced by heavy realizations, on speculative account, closing irregularly.

Railway Mortgage Loans have been in fair demand, on investment account, at generally firm prices. Central Pacific Sixes have been in good request at 101¾@102. Chesapeake and Ohio have been in more general demand at 94 per cent. and accrued interest. This loan is nearly closed out by the financial agent of the company, Messrs. Fisk & Hatch, who have successfully marketed nearly sixty million dollars of railroad bonds within the past few years, or since the Government commenced to call in its 7-30 and six per cent. debt. The greater part of this was on account of the Central Pacific Railroad and branches, the bonds of which have been received with unusual favor by investors both in this country and in Europe. The Central Pacific Road is now earning about $12,000,000 per annum.

There has been less activity in domestic produce, since our last. Breadstuffs closed lower, Provisions firmer. Naval Stores and Petroleum cheaper. Middling upland cotton closed steadily on Wednesday at 21⅞ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,677,535 bales, against 3,958,067 bales same time in the preceding year; exports 1,944,483 bales against 3,135,630 bales in the previous year; stock at the ports at latest dates, 76,647 bales against 135,828 bales same date 1871.

At the Live Stock Markets, Beeves have been in moderate demand at 9@13 cts.; Veals at 6@9 cts.; Sheep at 4@6½ cts.; Lambs, 6@9½ cts.; Swine, at 4½@4¾ cts. per lb., all live weight. The week's receipts were 8,538 Beeves, 3,570 Veal Calves, 35,565 Sheep and Lambs; and 38,025 Swine.

In the way of Metals, there has been an active call for Ingot Copper on the basis of 33½c. for prompt and 35c. for forward delivery; sales, 500,000 lbs. Pig iron has been quiet at about steady rates, including Eglinton at $52@$52 50, Glengarnock at $54 50@$55, Gartsherrie at $55@$56 per ton and American as before; 100 tons Glengarnock sold on private terms. Iron Rails have been moderately sought after on the basis of $73@$75 gold for England, with sales reported of 2,000 tons on private terms. Old Rails have been quoted stronger at $50@52, with sales of 200 tons on private terms. Wrought Scrap Iron has been in less request and less firm, offering at $50 from dock; 100 tons sold on private terms. Lead, Spelter and Zinc quiet at former figures. Pig-tin dull, with Straits quoted at 33½c@35, gold, the latter an extreme; sales 50 slabs on private terms. Tin Plates, though quoted firm, have been less inquired for; sales 750 boxes assorted Char coal at $13 50, gold, and 500 boxes Coke Terne on private terms.

Foreign goods adapted to the fall trade, have been attracting more attention, at generally steady rates. The week's imports of foreign goods reached the amount of $10,139,006 including $5,422,036 of dry goods.

Ocean freights have been quite active with rates quoted stronger. On Tuesday of the current week, the grain engagements both on berth and charter were again very liberal, with a fair business in Petroleum, Cheese, Tobacco, &c.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ Messrs. W. Bailey Lang & Co., 54 Cliff Street, this city, have for sale "Alarm Torpedoes, or Fog Signals," for Railway Tracks. See their Advertisement.

☞ The Frederick and Pennsylvania Line Railroad is being pushed forward in the direction of Frederick, and has reached a point about three miles south of Woodsboro. It is expected that by the 15th of September the trains over this road will run into Frederick.

☞ Application will be made to the next session of the Vermont General Assembly for a charter for a narrow gauge railroad, from some point on the Vermont Central Railroad in the county of Washington, through the Mad River valley, thence through the counties of Addison, Windsor and Rutland, to connect with the Rutland and Burlington Railroad at some point in the county of Rutland.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH, Bankers,
No. 5 Nassau st., New York.

As Government Bonds are so high that the income derived from them is too small for ordinary investments, and as the number of persons seeking permanent and safe securities, other than Governments, is constantly increasing, we have, in order to accommodate our friends and customers, made thorough and searching examinations of several which we can fully recommend as possessing the requisite qualifications of a good investment. Prominent among these are the Six Per Cent. Bonds of the Chesapeake and Ohio R. R. Company—the interest and principal of which are payable in New York City, in gold coin. They are issued in denominations of $100, $500, and $1,000, either coupon or registered. The price at present is 94 and accrued interest. The amount remaining unsold is small.

This road is now nearly completed and will soon become one of the great trunk roads from the Atlantic tide-waters to the heart of the great West, and opening a low grade and direct line with Cincinnati, Dayton, Louisville, St. Louis, and other great cities.

FISK & HATCH.

Chicago and Canada Southern.

A few weeks ago the builders of the new air line railroad between Buffalo and Chicago, which is to be the shortest, lowest graded, and most easily worked of the trunk lines which connect the great West with the Atlantic seaboard, marketed the bonds on the eastern link of the line, to wit, the Canada Southern, at 90 and accrued interest—and they were on the market less than three months. They have now brought out, as will be seen in their advertisement, the bonds on the western link, to wit, the Chicago and Canada Southern. Both roads are under the same management, they being two corporations simply because one part of the road is in Canada and the other (the western link) in the United States. The builders of the line are among the leading railroad men of the West who control the Chicago and North-western, the Chicago, Rock Island and Pacific, two of the most important lines centering at Chicago, and the Toledo, Wabash and Western, which has its eastern terminus at Toledo. The Chicago and Canada Southern will therefore have a large business from the start—in fact, is building to accommodate business already waiting for it. The features of the loan, which are calculated to attract the attention of investors, are, that the enterprise is in the hands of men who have the means, ability, and interest to make the road a success; that the road will have the shortest and straightest route attainable between Buffalo and Chicago, the lowest grades, and, even with steel rails, the smallest capital. The bonds, therefore, have elements of strength which are calculated to insure their speedy sale. Messrs. Winslow, Lanier, & Co., and Leonard, Sheldon & Foster, are the agents for the sale of the bonds.

☞ The estimated earnings of the Erie Railway for the week ending Aug. 15, 1872, were $398,296; against $483,448 for the corresponding period of 1871—a decrease of $85,108. Total earnings since April 1, 1872, $7,061,463—an increase over the same time in 1871 of $247,816.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Besides being the obligation of a wealthy corporation, composed of men of experience and high-toned commercial integrity, they are secured by a first mortgage on the road, revenues, land grant, franchise and equipments, combined in one mortgage, and are readily negotiable both in the markets of this country and Europe.

A liberal sinking fund provided in the mortgage deed must advance the price upon the closing of the loan. Principal and interest payable in gold. Interest at eight (8 p. c.) per cent. per annum, payable, semi-annually, free of tax Principal in thirty years. Denominations, $1,000, $500 and $100, Coupons or Registered.

Price 97½ and accrued interest in currency, from February 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

The diminished quantity of these Bonds for sale, and the increased demand absorbing them, warrant the belief they will soon be sought for at an advance considerably above the present subscription price at which they can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.

BANKERS,

NO. 11 WALL STREET.

☞ The Philadelphia *Ledger* of 19th inst., reports the net anthracite coal tonnage for the week ending on the 10th inst., from all sources, at 441,889 tons, and for the year 11,599,449 tons, against 7,322,876 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,276,573 tons. The production of bituminous coal for the week was 55,308 tons, and for the year 1,498,775 tons, against 1,325,434 tons to the corresponding time last year—an increase of 173,341 tons. The total production of all kinds of coal for the week was 467,197 tons, and for the year 13,098,327 tons, against 8,648,310 tons to corresponding time last year, showing an increase of 4,450,017 tons.

The lease of the Western and Atlantic Railroad to the Brown-Cameron party has been ratified by both branches of the Legislature at Atlanta.

Journal of Railroad Law.

RAILROAD COMPANIES—LIABILITY OF, TO ITS EMPLOYES FOR INJURIES SUSTAINED IN ITS SERVICE—WHO ARE FELLOW-SERVANTS.

The facts in the late case of Wonder *vs.* The Baltimore and Ohio Railroad Company (32 Maryland 411) are fully and clearly stated in the following opinion by—

ALVEY, J.—This is an action by an employe against his employer to recover for an injury received while engaged in the work for which he was employed, by reason of defective machinery that he was required to operate.

The plaintiff was a brakeman in the employ of the defendant, on one of its burden trains, and, while engaged in his work, he received the injury complained of, which was occasioned by an alleged defect in the brake to one of the cars that he was using in the regular course of his duty. The supposed defect consisted in the use of a hook instead of an eye bolt on the brake, and in having the point of the hook turned the wrong way. In attempting to use the brake, in consequence of the defect, the plaintiff was suddenly thrown from the car to the track, and was caught between the brake-shaft and the trucks of the car and dragged a considerable distance, and seriously injured. He alleges that there was negligence on the part of the defendant in regard to the use of this defective brake, and that he is entitled to recover from the company the damages sustained by him as the consequence of such negligence.

It is now settled that there is no contract obligation imposed upon the master from the mere relation that he bears to the servant, to provide machinery of any character or description, to be operated by the latter, nor is there any implied undertaking on the part of the former, resulting from the mere relation as employer that the machinery shall be kept free from defects, such as may expose the servant to danger: The servant is a free agent to select the employment into which he enters, and in contracting for the wages that he is to receive, must be supposed to take into account the risks to which the employment may expose him; among those risks are the defects and accidents of the machinery and the negligence and want of caution of fellow servants in the common employment. To hold the master liable to the servant for all the injuries resulting to the latter from defects in the machinery or materials upon which he may be employed, or from the negligence of fellow-servants, engaged in the common employment, would go far to impede, if not to make it impossible to carry on, many of the great works of the country. All that can be required of the master, and for the neglect of which he is responsible to the servant, is, that he shall use due and reasonable diligence in providing safe and sound machinery, and in the selection of fellow-servants of competent skill and prudence, so as to make it reasonably probable that injury will not occur in the exercise of the employment. He is required, also, as far as he can by reasonable care, to avoid exposing his servants to extraordinary risks which could not have been reasonably anticipated at the time of the contract of service, though, as to such extraordinary risks it would seem does not guarantee against them.

From these general principles it follows that the master is not liable to his servant for any injury occasioned by a defect of machinery furnished to the latter to operate, unless he was negligent in providing such machinery, or, if he knew of the defect, in omitting to warn the servant of its existence. And where the defect producing the injury complained of, was the consequence of the incompetency or neglect of a fellow-servant, or where the origin of the defect did not appear, it has been held that the master was not liable to his servant, it not appearing that he had been guility of negligence, either in selecting the fellow-servant or in providing the machinery in which the defect occurred.

Who is a fellow-servant, within the meaning of the rule, has been a question of some diversity of decision, though the decided weight of authority is to the effect that all who serve the same master, work under the same control, deriving authority and compensation from the same source, and are engaged in the same general business, though it may be in different grades and departments of it, are fellow servants, each taking the risk of the other's negligence. Or, to state the rule more generally, in the language of a decision that has been approved by this court, "all who are engaged in accomplishing the ultimate purpose in view—that is the running of the road—must be regarded as engaged in the same general business, within the meaning of the rule." It follows, therefore, that the brakeman on the train is in the same common employment with the mechanics in the shops to keep in repair and order the machinery and with the inspector of the machinery and rolling stock of the road and the superintendent of the movement of trains.

If, therefore, the defect in the brake that caused the injury in the present instance existed by reason of the neglect or want of care on the part of such empfoyes of the defendant, the latter cannot be held liable, unless there has been negligence in the selection of those servants and the *onus* of proof of such negligence is on the plaintiff.

The case ot Searle *vs.* Lindsay before referred to, well illustrated this. There the plaintiff was employed by the defendant as their third engineer on board their steam-vessel. While turning a winch, one of the handles came off, in consequence of the want of a nut or pin to secure it, and the plaintiff was thereby seriously injured. He was, with others at work at the winch by the orders of the chief engineer, who knew that the instrument was out of order, but was, nevertheless, a competent person for the position he occupied. There was no evidence of personal negligence on the part of the defendants, and it was held that the chief engineer and the plaintiff were fellow-servants, and that as the defect existed by reason of the negligence of the chief engineer whose duty it was to see that the machinery was kept in proper condition, the plaintiff could not recover. And, in the concurring opinion of Mr. Justice Williams in that case, the law is briefly but clearly stated that governs cases like the present. He said "I think there was no foundation for the argument that Simpson, the chief engineer of the vessel, and the plaintiff stood in any other relation towards each other than that of ordinary fellow-servants. Then applying the rule of law which is now firmly established, the common employer is not liable to either for an injury sustained through the negligence of the other. In order to take this case out of the ordinary rule, it was contended that here there was negligence on the part of the employers themselves. In order to make that out there must be reasonable evidence to show that they were to blame, either in respect to their not having provided proper machinery and appliances, or not having retained competent workmen. I do not find any evidence at all of any default in either of these particulars.

If the winch was out of order, it was owing to Simpson's negligence.

There was no evidence, nor any suggestion, that Simpson was not a perfectly competent engineer. And such was the view of all the judges.

In the case before us, the question, depending upon a diversity of opinion as to whether the eye-bolt or the hook is the better mode of fastening the brake, is immaterial, as both seem to be approved appliances, tested by trial and experience; and if it were conceded that the eye-bolt has superior merits, it by no means follows that the defendant was bound to discard the hook that had been used for a long time, and on so many of its cars, without accident.

A master is not bound to change his machinery, in order to apply every new invention or supposed improvement in appliances, and he may even have in use a machine, or an appliance for its operation, shown to be less safe than another in general use, without being liable to his servants for the consequences of the use of it.

If the servant thinks proper to operate such machine it is at his own risk; and all that he can require is, that he shall not be deceived as to the degree of danger that he incurs.

As to the defective attachment of the hook, it was shown to have been the duty of the employes, Fairbanks, Buckingham & Day, to see that the cars and their appliances were kept in proper and safe repair.

Whatever negligence, therefore, may have existed in regard to the arrangement of the brake, and of the defective attachment of the hook thereto, was the negligence of those employes, the fellow-servants of the plaintiff, and there is an entire absence of evidence to show that there was the least negligence on the part of the defendant in the selection and employment of those servants; but, on the contrary, there is the most abundant evidence that such servants were of sufficient competency and skill; nor is there the slightest evidence in the case, that any superintendent or other agent, having control and general direction of the employes, and for whose negligence and conduct the defendant would be responsible to the plaintiff ever had knowledge of the defective condition of the brake before the occurrence of the injury.

The proof wholly failing in these important particulars, the court below could not have done otherwise than instruct against the plaintiff.

The essential proofs of the gravaman of the action was wanting and of course the plaintiff could not recover.

The several prayers of the defendant were unobjectionable and the court was therefore right in granting them.

And as by the granting of the defendant's prayers the case was taken from the jury, the plaintiff's prayer, which was rejected became unimportant. For these reasons the judgment will be affirmed.

Judgment affirmed.

☞ The Cumberland *News* says that the leasing of the Bedford and Bridgeport Railroad to the Pennsylvania Railroad Company seems to have infused new life into the first named corporation, and that "orders have been given to push the work at once vigorously, with the design of having the route open if possible by September 1. The track is laid from this end as far as the State line, while the grading is nearly done on the route between the State line and Bridgeport."

☞ A correspondent of the Alexandria Gazette, writing from Rappahannock county, Virginia says: "The Piedmont and Potomac railroad has had a corps of engineers seeking a pass through the Blue Ridge, in this direction, for more than a month, headed by Col. Pryor, the chief engineer of the road. They have surveyed two routes, either of which they report practicable. They ask only the right of way, which the land owners will doubtless readily give."

☞ The Union Pacific Railroad Company will proceed at once to iron the grade previously made from the air line to Coalville, thereby furnishing an outlet for the coal and silver deposits of Parley's Park.

☞ The Kansas Central narrow gauge road is now completed forty-five miles from Leavenworth. The grading is finished eleven miles further.

LOCOMOTIVES
FOR SALE.

1 Locomotive, with tender, in use two months, gauge 4 ft. 8½ in., cylinders 16 in. by 24 in., weight about 25 tons.

1 Tank Locomotive, in use two months, gauge 4 ft. 8½ in., cylinders 7 in. by 12 in., weight 6 tons, steel tires; cheap.

1 Tank Locomotive, gauge 4 ft. 8½ in., cylinders 10 by 16 in., weight 12 tons.

3 Locomotives, with separate tenders, gauge 3 ft., cylinders 11 in. by 16 in., weight 15 tons, 6 drivers, 36 inch, steel tires, etc., new.

2 Locomotives, with separate tenders, 3ft. gauge, 9 in. by 16 in. cylinders, 4 drivers, 40 in., steel tires (new). Further particulars will be given.

8 Second hand Locomotives, 4ft. 8½ in. gauge, from 12 to 23 tons, and two 5½ ft. gnage Locomotives; some of these are in excellent condition, one or two entirely overhauled, not used since, in good repair.

GEO. R. DUER,
52 Broadway,
Railroad Equipments and Supplies.

☞ NOTICE TO RAILROAD CONTRACTORS—Sealed proposals will be received at the office of the NEW YORK, WEST SHORE AND CHICAGO RAILROAD COMPANY, until Monday noon, the 2d of September, 1872, for the grading and masonry of the Eastern Division of said road, from Jersey City to Catskill, 110 miles in length.

Proposals can embrace any portion of the work not less than five miles in length.

Maps, profiles and specifications can be seen at the office of the Engineer in Chief, from and after the 22d inst. New York, August 19, 1872.

J. M. COURTENAY,
President.

Notice to Contractors.

OFFICE KENTUCKY AND TENNESSEE R. R.
MOBILE, ALA., August 18, 1872.

THE KENTUCKY AND TENNESSEE RAILroad Company desire to contract for the construction of their Road from Columbus, Ky., to Fillmore City on the Ohio River, opposite to the City of Cairo, Illinois, a distance of about twenty-one miles.

The road runs up the Valley of the Mississippi River, and, for the greater part of its length, will require heavy embankments, trestle work, and pile bridging.

Maps, profiles, specifications, and any other information, may be obtained at this office after the first of September next.

The work is required to be completed within six months after the ratification of the contract, and is worthy of the attention of large contractors.

L. J. FLEMING,
6t34 Chief Eng. Ken. and Tenn. R.R.

THE INDIANA
AND
ILLINOIS CENTRAL
RAILWAY COMPANY'S
First Mortgage 7 Per Cent.
SINKING FUND
GOLD BONDS,
FREE OF GOVERNMENT TAX.

An East and West Air Line of 152 Miles, Indianapolis, Ind., to Decatur, Ill.

This road passes through a belt of the best settled and richest agricultural and mineral country of Indiana and Illinois, averaging thirty miles in width, with no other East and West Railway built or projected through it. It crosses, in Parke and Vermillion counties, the rich

BLOCK COAL FIELD

of Indiana, which alone will supply an ample business.

Thirty miles through Douglas County, Ill., just completed, opened and paid for.

Whole Western Division, Montezuma to Decatur, 85 miles; to be finished in 1872. Grading nearly done and materials (except iron) already procured; Bridge over Wabash ready for superstructure.

Eastern Division, 67 miles, partly graded and to be finished in 1873.

$1,300,000 in cash already expended on the road, and $1,500,000 remaining to be called from 20 subscribers, among whom are W. H. Guion, Sidney Dillon, Jay Cooke & Co., Clark Dodge & Co., J. Seligman, Vibbard, Foote & Co., and Paul S. Forbes, of New York; Benj. E. Bates of Boston, Henry Lewis of Philadelphia, and G. M. Pullman of Chicago.

Besides its right of way, the Company owns 32,000 acres of land, chiefly in Indiana, of which 2,000 acres are the best BLOCK COAL LANDS. It has also SUBSCRIPTIONS IN BONDS AND CASH from counties, towns, and individuals of $700,000.

The road connects at both termini with the most important THROUGH RAILWAY LINES of the West, and being by many miles shorter than any other line, will be indispensable to them, while its local business alone will insure good dividends on its stock.

Bonds, $1,000 each, payable to Union Trust Co., Trustee or bearer, July 1, 1901, in gold coin. Coupons, also in gold, payable Jan. 1 and July 1, in New York, or at Union Bank of London, at fixed exchange of £7 sterling.

SINKING FUND of 2½ per cent. a year on gross earnings to be invested by Trustee in bonds at not exceeding par.

For sale at 90 and accrued interest by the Financial Agents of the Company.

CAMP'S IMPROVED DUMPING CAR.

(Used by the American Dredging Company.)

RIGHTS FOR SALE BY

N. H. CAMP,

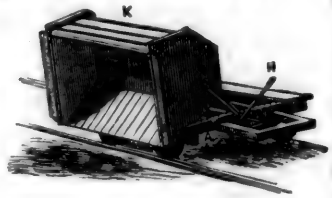

Fig. No. 1, Car Loaded. **TO DUMP THE CAR.** Fig. No. 2, Car Dumped.

The Brakeman seizes the lever H, and raises it, thus removing the step from under the box-support A, when the weight of the load causes the box to roll over to the position shown in Fig. 2.

To replace the box in readiness for another load.

The Brakeman, standing on the platform, reaches over, and grasping the corner of the box, pulls it back to its place.

Address, N. H. CAMP,
Care N. C. MILLER, 61 Broadway, New York City;
or HAWKINS, WILLARD & CO., 28 Market St., Chicago.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by WILLIAM & HENRY HAND,

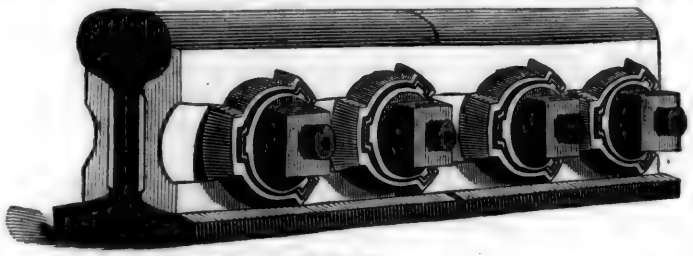
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Montreal and its Trade.

The growing trade and rapid progress of Montreal must be gratifying to every true friend of the Dominion. As the commercial centre of Canada, its fast increasing importance is indicative of the advancement which is going on all over the country. The annual trade of the city—taking both imports and exports—amounts to close upon one-third of that of the whole Dominion, although it must be borne in mind that the province of Ontario supplies the greater part of its exports, and takes from it a corresponding portion of its importations.

Year	Dols. Imports.	Dols. Exports.
1835	3,783,864	1,080,000
1840	5,036,676	1,677,124
1845	10,459,644	2,777,096
1850	7,174,780	1,744,722
1855	12 371,580	1,910,844
1860	15,479,463	6,020 715
1865	19,843,448	5,361,184
1870	31,012,864	19,027,153

The increase in the city's trade during the five years ending in 1870, was 98.58 per cent., a very marked and gratifying advance. During the last year, 1871, its commerce was the largest ever known, having reached the large sum of $54,637,853. Of this amount $19,138,519 were exports, and $35,504,334 imports. But for a change in the manner of making up the customs returns, it is claimed that the exports for 1871 would show at least five millions more.—*Canadian Monetary Times.*

Banking House

OF

JAY COOKE & CO.

No. 20 Wall Street, N. Y.

We continue to sell at par, adding accrued interest, the First Mortgage Gold Bonds of the Northern Pacific Railroad Company. On the completion of this season's contracts there will be FIVE HUNDRED AND SEVENTEEN miles of the main line of the Road in operation, uniting Lake Superior with the Missouri River, and securing the large traffic of the Northwest. This amount of Road also entitles the Company to Ten Million Four Hundred Thousand Acres of Land, located in Central Minnesota, Eastern Dakota, and in the Columbia Valley on the Pacific Coast. The bonds are secured by a first mortgage on the Road, its Traffic and Franchise, and on the entire Land Grant received from the Government. The rate of interest is Seven and Three-Tenths, Gold, equivalent to about Eight and a Quarter per cent. in Currency. Believing the security to be ample, and the rate of interest satisfactory, we recommend these bonds as a desirable investment. Holders of United States 5-20s and high-priced corporate securities may materially increase both their principal and their interest income by exchanging for Northern Pacifics.

JAY COOKE & CO.,

New York, Philadelphia and Washington.

Northern Pacific Railroad.

LETTER FROM CHIEF ENGINEER ROBERTS.

RAILROAD TRAFFIC—CHARACTER OF DAKOTA LANDS—AN EXCELLENT COUNTRY—INDIAN MATTERS.

Chief Engineer W. Milnor Roberts, who has recently (July 15, 1872), completed a tour of inspection along the line of the Northern Pacific Railroad in Minnesota, and as far west as the valley of Heart river in Western Dakota, writes as follows of the results of his professional observations:

A heavy business is constantly passing over the completed section of the road through Minnesota, consisting of the local carrying trade of the country traversed by the line, the business of the Hudson's Bay Company and the British settlements in the lower Red River Valley; the transportation of railroad iron, cross-ties, materials and supplies for the large amount of track now being laid by the St. Paul and Pacific Company in Western Minnesota, and similar material for the Dakota division of the Northern Pacific Road. I passed across Dakota, between the Red river and the Missouri, going and returning in a wagon, travelling only by day and camping at night, so that I had a full view of every portion of the railroad line, and of the country through which it is located. I carefully observed not only the grading and construction, but also the character of the country and the soil. The distance across is about 200 miles, and we were seldom out of sight of our engineers' and contractors' camps.

There has been no difficulty whatever in obtaining at all points good water for men and stock, either from natural springs or from excavations of eight to ten feet in depth. This settles one important question relating to the early settlement and successful cultivation of this section. This is entirely a prairie region, intersected by a few streams, such as the Rush, Maple, Sheyenne, and James Rivers. The valleys of these contain what timber there is.

After much careful exploratory work and preliminary location, the assistant engineers have secured an admirable line, with generally very light grades and easy curvature. Even in passing into and out of the larger valleys—the Sheyenne and James—we were not compelled to exceed (and only for very short distances to reach) our maximum of sixty feet per mile ascending westward, and fifty per mile ascending eastward. The whole country is a gentle undulating plain, affording ample drainage interspersed with occasional lakes, some of which are brackish and the others of fresh water. The rain fall the present season, through all this region, has been abundant, and at times superabundant.

The *mauvais terre*, or bad lands, so called, of the great valley of the Missouri, are not met with on the line of this road. About thirty miles east of the Missouri our line enters the wide and beautiful valley of Apple Creek, down which it passes by a gentle grade, over excellent soil all the way to the river. The entire region from the Red river to the Missouri and beyond, at the time I passed over it, was clothed with nutritious grass, affording fine pasture, without exception, along the whole 200 miles. For a large portion of the distance the soil is very superior, equal to the best of any land. It is safe to say that at least nine-tenths of the country that I saw is good, arable land, constituting one of the most fertile and attractive prairie regions I have anywhere seen.

Some of our exploratory lines were traced through what is called the *mauvais terre*. These so-called 'bad lands' are not designated thus on account of their soil, but more on account of their shape, being water worn, or broken, so that they are not adapted to cultivation, while they would also increase materially the cost of railroad construction through them. The 'Coteaux' (hillocks) through this portion of Dakota are by no means formidable. They are rounded, gently sloping, and covered with good grass. Within a recent period this whole region has been a vast pasture land for the buffalo and the antelope, which no longer roam here.

Of the productive qualities of the soil, I saw sufficient evidence of the superb appearance of a garden of several acres at the second Sheyenne crossing, fifty-six miles west of Red river. The potatoes, corn, peas, beans, radishes, &c., were among the finest I have anywhere seen, and it was no fault of the soil or the climate that, ten days later, that occasional scourge of all new prairie regions, the grasshopper, had appropriated the growing crop to his private use.

The valleys of the Sheyenne and the James, where our line crosses, are particularly lovely, having abundant water, trees enough to relieve the eye, and a rich soil. The Missouri is a noble river where the road strikes it—wide and deep, with a swift current, and heavily wooded along its shores and islands. It is navigable for a thousand miles above, to Fort Benton, and quite a number of large steamers, heavily laden with merchandise for Montana, had recently passed up. It is the opinion of an experienced Missouri river steamboat man, that on the completion of the Northern Pacific Road to the Missouri, the business will be done over this road, not merely to all points on the river above, but also to points several hundred miles below.

I spent a day on horseback west of the Missouri river, along Buck creek and Heart river valleys, and found good grass everywhere. The valley of Heart river, which our line follows some distance toward the Yellowstone, comes fully up to, and even exceeds, the expectations I had formed from Division Engineer Rosser's reports, maps and profiles, and his verbal explanations. It is a source of great gratification to me to know that our assistant engineers have been very cautious in their statements respecting all the country west of Minnesota—knowing as I do, the desire of the company to have all their published representations understate, rather than overstate the advantages of the region through which the road is building. Fortunately, our final and critical surveys are proving that the facts may be considerably understated, and yet make a perfectly satisfactory showing.

The newspaper stories about Indians, and danger from them to the railroad across Dakota, have no solid foundation in fact. The Indian situation, so far as the Northern Pacific Railroad is concerned, is this: As far west as the Missouri river, the question is settled, and no danger need be apprehended. Our men travel all over the country between the Red and Missouri rivers, by day and by night, without escort and unarmed. The few troops at the James and Missouri rivers will suffice to prevent theiving raids by straggling natives, until the last have finally disappeared before the army of white settlers. West of Fort Ellis, in Montana, all the way to the Pacific coast, the Indian question is forever disposed of. All our engineering parties, six in number, between Montana and the Pacific, are operating without escort. The only portion of the line yet in abeyance between the Indians and the whites is between the Missouri river and the westerly bend of the Yellowstone, east of Fort Ellis; there our parties, now taking the field, have strong escorts of United States troops, well prepared to fight, if necessary. But no fighting is to be apprehended. If our escorts were weak, there might be some risk. Frontier speculators who wish to see Government money freely spent in their vicinity and to their advantage, will doubtless continue to furnish the newspapers with prophecies of imminent "Indian Wars" in the Northwest.

The construction of the Northern Pacific Railroad will entirely settle the Indian troubles on a belt at least one hundred miles wide and fifteen hundred miles long, embracing one hundred and fifty thousand square miles, a large portion of which will ere long contain an industrious population, giving profitable employment not only to the main line, but to the numerous branch feeders which will surely be opened as the country becomes settled and its many resources developed.

Mobile and Montgomery Railroad.

The receipts from operations of this road for the years ending April 30, 1871 and 1872, were as follows:

	1871.	1872.
From passengers	$222,366 00	$257,482 84
" freight	376,942 06	369 219 41
" express	20,750 98	22,236 82
" mail	18,600 00	18,600 00
	$638,649 04	$667,539 07
Expenses, viz:		
Conducting transp.	$197,226 31	$216,961 42

Maintenance of cars	34,863 72	33,944 53
	$494,293 82	$517,414 81
Leaving net income	$144,355 22	$150,124 26

It will be seen that the receipts have increased from passengers $35,126 84, and from express $1,475 84; but there has been a falling off in freight of $7,722 65—making a total increase of $28,880 03. The President in his report says:

The gross earnings of the road, as shown by the Report of the Superintendent, herewith submitted, were $667,539 07, against $638,649 04 for the year ending 30th April, 1871; being an increase of $28,880 03, not as good a result as was expected when the last Annual Report was made to you, but when the short crop of cotton, made in the section of country from which the road derives its support is taken into consideration, as the receipts in Montgomery alone show a deficiency as compared with the last season of 40,000 bales, and at the stations on the line of road the falling off in receipts will be in about the same proportion, we have every reason to be satisfied with what has been done.

The extension to Mobile was not opened for use as soon as it was promised by the contractors, but with all the difficulties they had to encounter, and particularly that of keeping up a full force of workmen during the sickly season, the entire extension was pushed through in less time than any work of the same magnitude has ever been constructed in the Southern country. It has been most faithfully done, and reflects great credit on the contractors and on your Chief Engineer, G. Jordan, Esq., under whose superintendence the work has been constructed. Although the trains commenced running over the new work early in March, it was not considered safe to rely entirely on it and discontinue the boat service between Tensas and Mobile until late in the month, and the use of the extension as to its effects upon the income of the road may be dated from the 1st of April. It is gratifying to be enabled to report that the receipts for the two months that it has been in use, show an increase of $15,000 upon the same month of last year, and a decrease of the expenses of $12,000, giving good reason to hope that the anticipated value of the work will be fully realized and the close of the fiscal year to end 30th April, 1873, will show an increased income and a reduced ratio of expenses.

The amount charged up to the Extension on the books of the company up to April 30th, is	$1,003,803 95
To this will have to be added the cost of property purchased in Mobile for depot purposes and on the line of the extension	167,608 00
And to pay off the reserve on Boynton & Co.'s contract not yet completed, and to complete the grading between Mobile River Bridge and the city of Mobile, will require about	78,588 05
Showing that the cost of Extension, entirely completed, will be	$1,250,000 00

This of course includes the loss on the $1,000,000 of State endorsed bonds appropriated to this work, which were sold to nett the Company 82, and also includes the interest on money paid as the work progressed, computing it up to the time the road was opened for use. It is a large outlay, but the construction of the work was a necessity to preserve the position of the road as a part of an all rail line from New Orleans to New York, and give it a chance of successful competition with rival lines.

Taking up the previous reports made to you, beginning with the report made for the year ending 30th April, 1869, one year after the consolidation, and you will find that there has been expended in the reconstruction of the road between Montgomery and Tensas from 30th April, 1869, up to 30th April, 1872 $644,836 35

And an increase of outfit and machinery 351,400 47

Making a total of	$966,236 82
And on Mobile Extension and purchase of property	1,171,411 95
Making a total amount expended	$2,167,648 77
Which has been provided for by sale of bonds	1,617,942 50
Leaving a debt of	$549,706 27

yet to be provided for. To do so the Board of Directors authorized the issue of one million of dollars of second mortgage bonds, from the proceeds of which this debt will within the year be paid off. Upon reference to the general statement of the condition of the company, you will find that there is yet outstanding, which is a lien on the road, $41,000 of the old first mortgage bonds of the Mobile and Montgomery Railroad Company, to provide for which, either by exchange or payment, we hold on hand an equal amount of the new first mortgage bonds, endorsed by the State. There is also, yet outstanding of the old debt of the Alabama and Florida Railroad Company, not a lien on the road, $27,500 of Bonds issued in 1862 and sold for Confederate money. 300,000 of these bonds were issued to complete the road and make it available for the purposes of the Confederate Government, and although under the peculiar circumstances of their issue the company could not be made legally responsible for their payment, it was deemed advisable to give for them the preferred stock of the company, which has been done for $272,500, and leaving yet outstanding, as above stated, 27,500 which will be settled in the same way.

I ask your very careful consideration as stockholders, and your influence upon your representatives in the legislature, upon the subject of taxation of railroad property and their regulation of

transportation—they are destined to effect most seriously the value of your property unless more liberality is manifested, and unless the laws now in force are very materially modified, the future of railroads in Alabama is not encouraging. Liberal aid has been extended by the use of State credit to build roads, but the fact seems to have been entirely overlooked, that with the present population of the State, these roads can only be kept up and sustained by moderate taxation and by allowing them to charge, as is done in other States, compensating rates for the transportation of freight and passengers. There is not to day a railroad in the State of Alabama paying a dollar of dividend to the stockholders, and indeed hardly making net income enough to pay interest on their debts, and still they are forced to pay as heavy a tax on the property as if it was a paying investment, and to transport passengers at as low rates as roads charge in other States where passenger trains are always crowded. More careful considerations must be given to this subject by our legislature, or in three years many of the roads brought into existence by State aid will be forced into bankruptcy, entailing upon their stockholders a total loss of what they have invested, and heavy losses upon the State—nothing can save them but the recognition of the fact that they are great instruments of wealth to the State, by increasing its population and productive property, and that those who use them should be required to pay such rates of transportation as will work and keep them up until an increased population will warrant a change.

Very important connections of your road, now in progress, will be completed within the year.

The first of these will be the South and North Alabama Railroad, which will, I have no doubt, be completed and in operation to Decatur by November, giving a line under one control and management from Montgomery to Louisville, Kentucky.

The next to be completed will be the Atlanta and Charlotte Air Line Railroad, giving the shortest through line from New Orleans and Mobile to New York that will probably be built in many years. These two lines completed and in operation must add largely to both the passenger and freight business of this road.

The board have recently been apprised that an effort will soon be made by the Atlantic and Gulf Railroad Company of Georgia to extend their road, now in operation from Savannah to Bainbridge, through to Pollard, so as to carry out the original intention of giving to the road a Gulf connection. The distance from Bainbridge to Pollard is about one hundred and sixty-five miles, and although when completed it may turn from our road at Pollard, some business that would otherwise pass over the entire road, still the board believe the benefit arising out of the construction of this road would greatly exceed any losses we might sustain from a division of a part of our business at Pollard; and they believe it to be the interest of this Company to meet the friends and managers of the Atlantic and Gulf road, with the most friendly assurance, that we recognize their line as of great value to us, and that arrangements for a connection at Pollard and for interchange of business and trains will be made upon the most liberal terms. It is to be regretted that our finances are not in a condition to offer material aid to this work, as it would open up to us a tier of counties in Alabama and Florida containing about 50,000 inhabitants, and producing about 25,000 bales of cotton that at present are entirely lost to us; and it would complete the Coast Line from New Orleans to New York, that would only be about one hundred miles longer than the Atlantic Air Line, and one of the most attractive Winter routes on the Continent. Savannah, Mobile and New Orleans are deeply interested in this line—as it would not only open up to them a section of country that now has access to the sea only, via the Apalachicola and Choctawhatchee rivers, but would give you a line at least one hundred and fifty miles shorter than the present line between those cities.

The financial condition of the company April 30, 1872, was as follows:

LIABILITIES.

Capital stock M. M. R. R.		$1,148,300 00
In the name of the Ala. and Fla. R. R. not exchanged		86,500 00

☞ The freight and express business on the Poughkeepsie and Eastern Railroad has been good and is rapidly increasing. The passenger trains have commenced running to Ancram Lead Mines.

The Late Mr. George C. Satterlee.

At a special meeting of the New York Board of Fire Underwriters, held August 8, after eulogistic remarks had been made, it was voted that Messrs. Crowell, of the Phenix, Hodges, of the Hoffman, McDonald, of the Royal, Martin, of the Home, and Ely, of the Peter Cooper Insurance Companies, prepare suitable resolutions, and by the unanimous vote of the Board the resolutions were directed to be sent to the family of the late Mr. George C. Satterlee:

Resolved, That by the sudden death of Mr. George C. Satterlee, for so many years President of the Washington Insurance Company, and for a long term of years a member of the New York Board of Fire Underwriters, we are most forcibly reminded of man's frailty and the uncertainty of life.

Resolved That as vice-president of the New York Board of Fire Underwriters from 1858 to 1861, and for years one of the members of the executive committee, the deceased discharged his official duties with distinguished ability, and all his official acts met with general approbation.

Resolved, That we shall do well to emulate his virtues, to pattern after his unvarying uprightness, his Christian charity, his pleasant deportment and great kindness, with which he ever greeted all.

Resolved, That while we deplore his death, and would offer our sincere condolence to his family, we would and should be thankful to Almighty God for having continued his useful life beyond "three score and ten years," that his family, the members of the Board and the community might enjoy the good influences of his life, so constantly manifested by precept and example.

(Attest). WM. W. HENSHAW.
Sec'y N. Y. Board of Fire Underwriters.

The following resolutions in regard to the death of Mr. Satterlee were adopted by the directors of the Washington Fire Insurance Company, at a meeting held on August 21:

Whereas, By the unlooked for death of Mr. Geo. C. Satterlee, it has pleased Divine Providence to take from us our late friend and president, who has for more than twenty years presided over both organizations of the Washington Fire Insurance Company with watchful care and signal ability; and,

Whereas, Many of us have had intimate social and business relations with him during this time and a long period antecedent thereto, in which he has always been held in the highest estimation by us.

Resolved, That in all these years the life and character of the deceased, as exemplified in the high-toned and honorable merchant, in the faithful and just performance of all the duties pertaining to the many positions of trust and confidence conferred upon him, in his kind and courteous demeanor in all the social relations of life, and in all the graces and attributes of the true and dignified Christian gentleman, have endeared his memory to us in no ordinary manner, and we hold and cherish it with the most affectionate regard and esteem.

Resolved, That our heartfelt sympathies are tendered to his family in their sorrowful bereavement and irreparable loss, and that a copy of these resolutions be sent to them by our secretary.

Resolved, That these proceedings be entered in our minutes.

(Attest) W. K. LOTHROP, Secretary.

☞ The railway between Yokohama and Shinagawa—the first railway constructed in Japan—was opened on the 12th of June. The line is worked on the block system, by which accident is rendered impossible. The Stations are plain but substantial, and the arrangements are such that any press of traffic can be easily dealt with.

Elizabethtown and Paducah Railroad.

PRESIDENT'S REPORT.

To the Stockholders of the Elizabethtown and Paducah Railroad Company:

The president and directors herewith submit their Fifth Annual Report for the fiscal year ending May 31st, 1872.

Since your last annual meeting eighty-eight miles of the western half of your road has been completed, leaving only four miles of unfinished track to open your road to Paducah. We ventured to predict, in our annual report of 1871, the completion of your road in July of the current year, and but for the annoying delay in raising a part of the superstructure of Tennessee River Bridge and the non arrival of rails in New Orleans within contract time, the hope we then hesitated to express would have been more than realized, and to-day the cars would have been running through to Paducah. The rails necessary for the completion of the road have been landed at Paducah, and the work on the Tennessee River Bridge will be completed during the month of July. In order that the travelling public may have the benefit of a through line, a transfer by means of a steam ferry will at once be established across the Tennessee River until the completion of the bridge.

By reference to the Secretary's report it will be seen that of the $2,103,000 of mortgage bonds held on June 1st, 1871, only $18,000 remain in the hands of the company.

Of the $1,009,900 of county bonds held at that time the company have paid out to contractors the sum of $377,900, holding $632,000. We look for a decided improvement in the value of our county bonds as the contractors have ceased flooding the market with them, and as the road grows in public favor and its value is fully realized by the citizens along its line.

There is yet due the company $81 742 42 from individual stockholders. The leniency extended to stockholders, in both city and counties cannot longer be indulged. The necessities of the company in stocking the road for successful operat on, its entire length, and bringing it up to a point where it can be safely worked through the approaching winter, and providing the interest on the mortgage bonds accruing Sept. 1st, will require the closest management and the use of every dollar due the road. Delinquent subscribers must not therefore complain if harsh means be adopted in collecting outstanding subscriptions.

The company has purchased 13½ acres of ground in Paducah since your last meeting and had previously purchased 30 acres in Elizabethtown for depot grounds, machine shops, &c. No steps have been taken toward building machine shops beyond having the plans and specifications prepared for a machine shop at Elizabethtown. The Attorney of the company was instructed to present these plans to the parties at Elizabethtown, who were suing the company to test the validity of the subscription of $75,000 by said town to the capital stock of your company, and authorized to agree that if they would withdraw the suit the machine shop should be put under contract. This proposition being rejected no further steps have been taken toward building it.

The outlay necessary to place your road in a condition to be operated with safety and comfort, after passing into the hands of the superintendent, together with the ordinary expenses of running a new road have been very great. These extraordinary expenses must continue until the road from Nortonville to Paducah is in as good running order as that portion of it from Elizabethtown to Nortonville.

The local trade from Elizabethtown to Greenville, to which point the road has been in operation for twelve months, has not met our expectations. Larger revenues were confidently anticipated from the vast coal deposits known to exist in Ohio and Muhlenberg counties, but capital and skilled labor were wanting, and the coal famine of last winter in Louisville, which offered great inducements for a speedy development of the coal, passed away, giving to your company the transportation of only a little over half a million bushels of coal, six fifteenths of the profits went to the Louisville and Nashville road. I am gratified, however to state that many new mines are now being worked by men of means and experience, and the opening of the road to Paducah will give a new and valuable market for the coal of your road.

The completion of the Owensboro and Russellville Railroad to the junction of your road, in the month of July, will add, it is believed, largely to the receipts.

President Weir expresses the fullest confidence in his ability to continue his road to Nashville within a reasonable length of time, which will at once open to your road the travel and traffic centering at that point.

A consolidation of the Paducah and Gulf with the Mississippi River Railroad was effected last autumn, and the work on the road being pressed forward with much energy under the new organization known as the Paducah and Memphis road. Most of the road is now under contract and the remainder will be let in July. One third of the rails have been purchased, and we are informed by President Ex Norton that the road will be completed in twelve months from this date. We cannot over-estimate the importance of this road to your enterprise, affording as it will a most direct connection with Memphis and the whole system of southwestern railroads and an unlimited market for your coal.

The report of the Chief Engineer, George MacLeod Esq., is herewith submitted which contains much information of interest to the stockholders. The full report of the line surveyed from Louisville, via the mouth of Salt River and Grahamton to Leitchfield, and a very accurate map of the same, with a carefully estimated cost of the extension, is also submitted.

The length of this extension will be sixty five miles, and total cost of road without equipment, $1,500,000, and it is thought no additional equipment is required to operate this part of the road should it be made.

Your attention is called to the following abstracts from the minutes of the company of Oct. 9th, 1871.

Louisville, Oct. 9th, 1871.

A meeting of the board of directors held this day. Present, W. H. Dulaney, President. Jas. Trabue, J. S. Lithgow, S. B. Thomas, Dennis Long and L. M. Flournoy.

The minutes of the last meeting were read and on motion they were approved.

On motion of Jas. Trabue the following resolutions were offered:

Resolved 1st. That the chief engineer be and he is hereby directed to make, at once, an examination of the various routes for a line of railway from the city of Louisville to some practical point on the Elizabethtown and Paducah Railroad.

2d. That the chief engineer be also directed, so soon as said examination is completed, to place a corps of engineers upon the lines inspected and report as early as practical the cost of the various routes surveyed.

3d. That a committee of this board (the president being the chairman) be appointed to communicate the purpose of this board as indicated in the two foregoing resolutions, to the railroad committees of the two boards of the General Council of the city of Louisville, which were unanimously adopted.

At this important meeting all the members of the board were present except R. A. Robinson and T. L. Barret, who subsequently fully approved its action.

When these resolutions were adopted there was pending in the General Council of the city of Louisville, an ordinance asking the subscription of $1,500,000 to build the L. M. & N. O. Air Line Road out of the city of Louisville, through the counties of Jefferson, Hardin, Meade, Breckinridge, Ohio and Muhlenburg, in the direction of Memphis. Your board believed that such a subscription on the part of the city would not only embarrass your company in the completion of its road, by lessening the value of its bonds, but if built would destroy the future value of your enterprise to its present stockholders.

In consideration of these facts, and in view of what has been considered a vital necessity for two or more years and even anticipated by an amendment to your charter, in February, 1868, (the extension of your road into the city) your board byits unanimous voice directed an ordinance to be presented to the Council, which, if approved by the city and the stockholders of the company, would not only remove all apprehensions of a parallel road being built, but would raise your enterprise from a mere local and tributary road to a great thoroughfare. In the opinion of your board the necessity and advantages of extending your road into Louisville still exists, and the danger which threatens your enterprise from the construction of a road running parallel with your line some 48 miles, and only an average distance of four miles from it, is yet imminent.

In this connection is is proper that the stockholders should know that the board of directors had by resolution respected the opinion and protected the interest of all stockholders, in requiring that the whole action of the board should be submitted to a stockholders meeting for ratification.

The amendments to your charter, approved February 16th, 1872, and March 27th, 1872, are herewith submitted for your acceptance or rejection. The amendment of March 27, 1872, regulating the tariff of your road, is considered ambiguous and may lead to much litigation and should therefore be carefully considered. The board acknowledge their obligations to the Secretary and Treasurer, A. A. Gordon, and the Assistant Secretary, Robert Howe, for a faithful and efficient discharge of their respective duties, also to Superintendent, D. Brock, whose report is herewith submitted, for the able and energetic attention given to the practical working of the road. To the Chief Engineer, George MacLeod, your company is largely indebted for this gigantic enterprise, so full of promise, a monument to his science and skill. With untiring energy he has marked out the pathway of your road, and brought to successful completion the work you have watched with deepest interest.

W. H. DULANEY,
President.

☞ The Poughkeepsie and Eastern Railroad will be completed to Millerton, Ct., by the first of October.

Iowa Railroads.

The following statement of the railroads of Iowa has just been made by the Census Board of the State:

Statement showing the number of roads, number of miles of main track, and gross earnings for the year ending Dec. 31, 1871:

	No. miles m. track.	Gross Earnings.
*Chicago, Iowa & Nebraska.	81.30	$890,498 75
*Cedar Rapids and Missouri.	273.71	1,379,540 55
*Iowa Midland	66.80	53,428 59
Chicago and Northwestern	423.81	2,323,467 89
†Chicago, Rock Island and Pacific	367.87	1,975,792 98
†Chicago and Southwestern	128.87	183,450 00
†Des Moines and Indianola	22.62	2,330 63
Chicago, Rock Island and Pacific	519.37	2,161,573 61
Dubuque and Sioux City	142.85	945,247 37
Iowa Falls and Sioux City	183.64	282,277 90
Iowa Falls and Minnesota	75.56	121,146 08
Illinois Central	402.04	1,348,701 35
Creston Branch Burlington and Missouri	42.67	1,087 73
Burlington and Missouri Riv.	349.59	2,545,390 10
Burlington and Missouri	28.29	.....
Dubuque Southwestern	54.76	161,547 86
Des Moines Valley	248.49	771,962 42

Central Railroad of Iowa	189.14	418,790 12
Keokuk and St. Paul	42.46	152,487 58
Davenport and St. Paul	43.00	61,117 13
Sabula, Ackley and Dacota	51.75	12,215 59
Milwaukee and St. Paul	247.00	808,295 56
Chicago, Dubuque and Minnesota	56.76	9,704 70

*Operated by the Chicago and Northwestern railway, and the total appears in the statement of that company.

†Operated by the Chicago, Rock Island and Pacific railroad, and the total appears in the statement of that company.

☞ The Sodus Point and Southern Railroad, extending from Sodus Point, on Lake Ontario, to Newark, N. Y., a distance of 35 miles, is now open for business. The officers of the company, just elected, are: S. K. Williams, President; R. F. Norris, Vice President; F. A. Bassler, Treasurer; C. A. Pusey, Financial Agent, and C. E. Pomeroy, B. F. Rogers, E. Granger, E. Mather, C. Dawson, W. A. Connett, L. R. Rose, W. S. Turner, C. M. Atkins, and E. Blackman, Directors.

☞ Six railroads are now running into Keokuk, Iowa, viz: Toledo, Wabash and Western; Toledo, Peoria and Warsaw; Mississippi Valley and Western; Chicago, Burlington and Quincy; Missouri, Iowa and Nebraska; and Des Moines Valley, while one or two others are under process of construction, which taken in connection with the Mississippi river, affords rare import and export facilities.

☞ Two new locomotives have been ordered for the Marietta and Pittsburg Railroad. The cars will be running to Cambridge from Marietta by the middle of September. The whole work is progressing satisfactorily.

☞ The people of White Oak township, Highland Co., Ohio, have voted, 109 to 28, to appropriate $28,800 toward building the Columbus and Marysville Railroad.

Narrow Gauge Suspension Railway.

A narrow gauge suspension railway, eighteen inches wide and one mile in length, has been laid at the Aldershott Camp, England, as an experiment. This railway is specially calculated to meet military requirements and consists of a continuous structure formed of wood or iron. A single row of pillars stand at intervals along the line, the lower ends resting upon wooden sleepers, and being steadied by diagonal struts. The lengths of the pillars vary from three to thirty feet, according to the contour of the ground. The superstructure consists of two longitudinal beams of wood or iron placed side by side, with a distance of eighteen inches between them, and bolted to, strutted from and supported by the pillars. These longitudinal beams form continuous sleepers and carry four rails, two on their upper surfaces and two on their outer sides. The surface rails are of iron, and carry the train. The side rails are of wood or iron, are nailed along the beams, near the lower edges, and act as guides for the horizontal wheels of the wagons. Where sidings occur, the switches are formed by making a twenty-feet length of the railway to pivot on one end, while the other end, resting on a pair of rollers, travels from the main line to the siding. The carriages are suspended below the axles, and are furnished with horizontal wheels running against the guide rails. The locomotive is specially designed for traveling on this peculiar track. Several miles of this road are to be laid down about the camps at Aldershott, and the soldiers at leisure times are to be exercised in taking the structures down and putting them up again for military transport service. Aldershott, it may be mentioned, is a large, permanent camp, with barracks, situated about thirty-five miles southwest of London.

☞ The Ellicott City *News* says: "It is credibly reported that parties are already at work upon a preliminary survey of the new railroad from Baltimore to this city. The Canton Coal Company are the principal corporators of the work, and it is understood that they are prepared to push it through at once. Various conjectures as to the exact route are afloat, one report having it that the new road will be extended through this county to the Potomac river."

☞ Work has been suspended on that portion of the Pembina branch of the St. Paul and Pacific road between Alexandria and Glyndon, the point of junction with the Northern Pacific on the Red River. The grading and track laying as far as Alexandria will be completed as fast as possible.

☞ Application will be made to the next Vermont Legislature for a continuous line of railway through the centre of the State, from Newport on the north, through Montepelier, Chelsea, Woodstock and Cavendish, to Brattleboro' on the south.

☞ The Silver mining Company of Silver Islet, Lake Superior, have declared a dividend of $2 per share, payable September 3.

☞ There is a probability of a branch of the Dubuque and Minnesota Railroad being built up the Black River Valley, in Wisconsin.

☞ Engineers of the Milwaukee and Northern Railway are now surveying a line from Menasha to Appleton.

☞ Track-laying on the Turkey Valley Branch of the Chicago, Dubuque and Minnesota Railroad has been resumed and is progressing rapidly.

$5,000,000.

First Mortgage Sinking Fund

30 Years'

7 PER CENT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

Interest Payable April and October at Union Trust Company.

This road is the western link in the new AIR LINE from BUFFALO to CHICAGO, and runs from the Detroit River to Chicago in nearly a straight line.

The road is a part of the same line as the Canada Southern, and is being built by the same men, viz.: Milton Courtright, John F. Tracy, David Dows, Wm. L. Scott, Henry Farnham, R. A. Forsyth, John M. Burke, M. L. Sykes, Jr., all Directors either in the Chicago and Northwest, or the Chicago, Rock Island and Pacific; Geo. Opdyke, of the Midland Road; Sidney Dillon, Daniel Drew, John Ross, David Stewart, Samuel J. Tilden, Kenyon Cox, and other prominent railroad men.

The Road, like the Canada Southern, will have steel rails (60 pounds to the yard) throughout: is practically straight and level: much shorter, and can be run more quickly and with greater safety than any other road connecting Buffalo and Chicago.

Twenty-five miles are finished and running: seventy-five miles more are so far advanced as to be finished by January 1st, and the entire road will be completed during the ensuing year. Steel rails and ties for one-half the entire road have already been purchased.

The builders of the road control enough of its Chicago feeders to obtain for it a profitable business from the start, having projected the line to accommodate existing business, and having seen the necessity for another trunk line between Chicago and the Atlantic seaboard, located expressly with the view of obtaining the cheapest transportation practicable.

The branch lines will make the shortest connections between Chicago and Toledo, and Chicago and Detroit, as well as between all these points and Buffalo.

The Canada Southern Bonds in every particular like these, were eagerly taken, the last of them several weeks ago, by the best class of investors, and were on the market a shorter time than any other railroad loan of like amount for years past.

The proceeds of these bonds will complete the entire line, and we recommend them with the same confidence as we did the Canada Southern, and regard them as in every way a choice security.

Bridge over the Mississippi River.

AN ACT to authorize the construction of a bridge across the Mississippi river at or near the city of Red Wing, in the State of Minnesota, and to establish it as a postroad.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall be lawful for any person or persons, company or corporation, being first thereto authorized by the legislatures of Minnesota and Wisconsin respectively, to build a bridge across the Mississippi river, at or near the city of Red Wing, in the state of Minnesota, and to lay on or over said bridge railway tracks for the more perfect connection of any railroads that are, or shall be, constructed to the said river at or opposite said point, under the limitations and conditions hereinafter provided; that said bridge shall not interfere with the free navigation of said river beyond what is necessary in order to carry into effect the rights and privileges hereby granted; and in case of any litigation arising from any obstruction, or alleged obstruction, to the free navigation of said river, the cause may be tried before any district court of the United States of any State in which any portion of said obstructions or bridge touches.

Section 2. That any bridge built under the provisions of this act may, at the option of the company building the same, be built as a drawbridge, with a pivot or other form of draw, or with unbroken or continuous spans: *Provided,* That if the said bridge shall be made with unbroken and continuous spans, it shall not be of less elevation, in any case, than fifty feet above extreme high water mark, as understood at the point of location, to the bottom chord of the bridge; nor shall the spans of said bridge be less than two hundred and fifty feet in length, and the piers of said bridge shall be parallel with the current of the river and the main span shall be over the main channel of the river, and not less than three hundred feet in length: *And provided also,* That if any bridge built under this act shall be constructed as a drawbridge, the same shall be constructed as a pivot drawbridge with a draw over the main channel of the river at an accessible and navigable point, and with spans of not less than one hundred and sixty feet, in length in the clear on each side of the central or pivot pier of the draw; and the next adjoining spans to the draw shall not be less than two hundred and fifty feet; and said spans shall not be less than thirty feet above low-water mark, and not less than ten above extreme high-water mark, measuring to the bottom chord of the bridge; and the piers of said bridge shall be parallel with the current of the river: *And provided also,* That said draw shall be opened promptly, upon reasonable signal, for the passage of boats; and in no case shall unnecessary delay occur in opening the said draw during or after the passage of trains.

Section 3. That any bridge constructed under this act, and according to its limitations, shall be a lawful structure, and shall be known and recognized as a post-route, upon which, also no higher charge shall be made for the transmission over the same of the mails, the troops, and the munitions of war of the United States than the rate per mile paid for their transportation over the railroads or public highways leading to the said bridge, and the United States shall have the right of way for postal-telegraph purposes across said bridge.

Section 4. That all railway companies desiring to use the said bridge shall have and be entitled to equal rights and privileges in the passage of the same, and in the use of the machinery and fixtures thereof, and of all the approaches thereto, under and upon such terms and conditions as shall be prescribed by the Secretary of War, upon hearing the allegations and proofs of the parties in case they shall not agree.

Section 5. That the plans and specifications, with the necessary drawings of said bridge, shall be submitted to the Secretary of War for his approval, and until he approve the plan and location of said bridge it shall not be built or commenced; and should any change be made in the plan of said bridge during the progress of the work thereon, such changes shall be subject to the approval of the Secretary of War; and all changes in the construction of said bridge that may be directed by Congress shall be made at the cost and expense of the owners thereof.

Section 6. That the right to alter or amend this act, so as to prevent or remove all material obstructions to the navigation of said river by the construction of bridges, is hereby expressly reserved.

Approved June 10, 1872.

Iron versus Steel.

The following extract from an article in the *Journal of the Franklin Institute* for July seems to show iron to be in some respects superior to steel, but for rails we believe steel still reigns supreme.

"So loud, of late, have been the praises of steel over iron, and so general the confidence in it, that only the minor shafts of the great (St. Louis) bridge were designed to be of iron; the remainder, embracing the more important parts were to be of steel. In order to be assured of the excellence of every portion of the structure the engineer in charge, not content with the results obtained from the straining of small sections, determined to subject every shaft supplied to a similar strain; and for this purpose constructed an enormous hydraulic testing machine. Thirty-two shafts, each nearly forty feet long, and weighing nearly two tons, were furnished by Messrs. Macpherson, Willard, and Co., the well-known iron forgers. These were subjected to a strain of about 300 tons without stretching—a strain so nearly approaching the resistance of sound iron that a slight flaw in any of them would have caused rupture; a fact which speaks well for the excellence of the work. With the steel shafts, from which so much was expected, the result was very different. Many of them snapped under strains in some cases even less than those which the iron ones stood perfectly, and so great became the distrust of them, that the forge was ordered to proceed with more iron ones to take the place of steel, and have now furnished nearly a hundred without a single failure. These results also emphasise, if they do not inaugurate, a tendency in the engineering world to return from steel to iron when employed in large masses. We have long known all about steel in small sections, but till recently no large masses of steel could be produced, and this series of tests by Captain Eads is the first instance on record of attempts to ascertain whether the known laws of strength of small sections hold good in large masses of either wrought-iron or steel. A practical comparison of the two metals was made two years ago on the C. & A. R. boat "Red Jacket," with its two screws—the shafts being of equal size, one steel, one iron. The steel one twisted off in a week, while the two iron ones (one now replacing steel) both made here, have been running ever since. What the difficulty is with steel in the large mass is not clear, but the long list of failures of steel guns confirm the facts. Krupp, the great Prussian steel maker, has already abandoned the solid forged steel gun. The matter is exciting considerable interest in the engineering fraternity and journals, and in practice, for large masses, there is a probable return for the present, to the old-fashioned wrought iron in vogue ever since the days of Tubal Cain."

☞ The following gentlemen were chosen directors of the Maryland and Delaware Canal on the 23d inst: Horace B. Tebbetts, C. B. Smith, Gerhard Jansen and Gen. Stabel, of New York, and Levin Woolford, Robert Lehr and John W. Garrett, of Maryland. The directors afterwards organized by the election of Mr. Tebbetts as president and Mr. Emil Sauer, president of the German American Bank, New York, as treasurer.

THE INDIANA
AND
ILLINOIS CENTRAL
RAILWAY COMPANY'S
First Mortgage 7 Per Cent.
SINKING FUND
GOLD BONDS,
FREE OF GOVERNMENT TAX.

An East and West Air Line of 152 *Miles, Indianapolis, Ind., to Decatur, Ill.*

This road passes through a belt of the best settled and richest agricultural and mineral country of Indiana and Illinois, averaging thirty miles in width, with no other East and West Railway built or projected through it. It crosses, in Parke and Vermillion counties, the rich

BLOCK COAL FIELD

of Indiana, which alone will supply an ample business.

Thirty miles through Douglas County, Ill., just completed, opened and paid for.

Whole Western Division, Montezuma to Decatur, 85 miles; to be finished in 1872. Grading nearly done and materials (except iron) already procured; Bridge over Wabash ready for superstructure.

Eastern Division, 67 miles, partly graded and to be finished in 1873.

$1,300,000 in cash already expended on the road, and $1,500,000 remaining to be called from 20 subscribers, among whom are W. H. Guion, Sidney Dillon, Jay Cooke & Co., Clark Dodge & Co., J. Seligman, Vibbard, Foote & Co., and Paul S. Forbes, of New York; Benj. E. Bates of Boston, Henry Lewis of Philadelphia, and G. M. Pullman of Chicago.

Besides its right of way, the Company owns 32,000 acres of land, chiefly in Indiana, of which 2,000 acres are the best BLOCK COAL LANDS. It has also SUBSCRIPTIONS IN BONDS AND CASH from counties, towns, and individuals of $700,000.

The road connects at both termini with the most important THROUGH RAILWAY LINES of the West, and being by many miles shorter than any other line, will be indispensable to them, while its local business alone will insure good dividends on its stock.

Bonds, $1,000 each, payable to Union Trust Co., Trustee or bearer, July 1, 1901, in gold coin. Coupons, also in gold, payable Jan. 1 and July 1, in New York, or at Union Bank of London, at fixed exchange of £7 sterling.

SINKING FUND of 2½ per cent. a year on gross earnings to be invested by Trustee in bonds at not exceeding par.

For sale at 90 and accrued interest by the Financial Agents of the Company.

Walker, Andrews & CO.,
14 Wall-st.

☞ The iron on the St. Paul and Sioux City Railroad is now laid to a point within twenty-one miles of LeMars, where they make a junction with the Illinois Central, using a joint track to Dubuque. The track is being laid at the rate of a mile a day, and it is expected to reach Dubuque by September 1.

American Railroad Journal.

Saturday, August 31, 1872.

Stock Exchange and Money Market.

Money has been in fairly active demand for speculative use, but has been offered with comparative freedom, at 4@6 per cent. generally 5 per cent. on call. The enlarged speculative dealings at the Stock Exchange served to increase the need of aid. All responsible borrowers, however, have had their wants readily provided for at the ruling figures. The Gold speculation has been less spirited, and has called for less pecuniary help. The mercantile business has been on a more extensive scale, in connection with the Fall revival of activity in the wholesale, as well as retail trade, and commercial paper, of strictly choice to good grades, has been rated at from 6@8½ per cent. per annum, on rather freer offerings. The city banks, last week, were again losers, in their leading items of averages, especially so in that of deposits, while reporting a slight increase in their circulation. The U. S. Sub-Treasury added a fair amount to its coin balances chiefly through the free receipts from customs which amounted at this port alone, for the week to $3,336,537. The office also enlarged its currency reserves handsomely.

The U. S. Sub-Treasury office last week added to its coin balance about ⅝ ths, of a million and to its currency about two millions. The office received during the week $4 686,126 currency, and $4,246,002 of gold, the latter including $3,492,000 from customs; and disbursed $2,693,650 of currency and $3,554,440 of gold, the latter embracing $284,000 of coin interest. The city banks reduced their loan and discount average about 3⅜ millions during the week, and enlarged their outstanding circulation slightly. The U. S. Sub-Treasury held a currency balance on Wednesday morning of $9,549,336, and a coin reserve of $49,338,763.

The city banks, in their latest return, show a reduction of $1,664,400 of legal tender notes $2,192,100 of specie, and of $9,308,300 of deposits, also a contraction of $3,374,200 in their loan and discount averages, and an increase of $81,100 in their item of circulation. The city bank exchanges, last week, averaged 90¼, and thus far, this week, about 97⅜ millions daily. The banks now hold $5,620,950 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $18,207,200, against $10,722,050 same time last year. The city bank deposits are now $226,449,300 against $248,709,800, week ending Aug. 26, 1871. The legal tender reserve amounts to $50,869,000, against $69,489,500 same time last year. The circulation now stands at $27,371,700 against $30,198,820 same time last year. The loans are now $292,428,600 against $305,047,680 at this date last year.

The coin reserve of the city banks is now about 18¾ millions as against about 29½ millions on the 20th of July; the legal tender reserve is about 50⅞ millions against about 55½ millions on the statement of June 15th.

Government revenues have been yielding quite liberally in the customs form, and moderately in that of excises, since our last. The excises yielded within the week about 1¾ millions, and thus far in the current fiscal year beginning with July 1, 1872, $23,218,477. The customs at the port of New York last week were $3,366,537; at the outports, equal to about $1,100,000 all in coin, or coin certificates.

The Gold speculation has been decidedly less confident, and the price has been depressed materially by much more liberal offerings of coin for prompt delivery. The demand from other than speculative sources has been comparatively moderate at the ruling figures. The later dealings showed rather more firmness.

The range of the price during the week has been from 112⅝@114⅛ and the closing quotation on Wednesday was 113¼ against 114 the preceding Wednesday. The specie outflow last week, was only $354,190. The Gold Exchange Bank clearances have averaged about 76 millions per day during the week.

The specie export from this port on Wednesday of the current week were only $170,000.

The customs demand for Gold last week, averaged $582,000 a day; thus far, this week, it has averaged $784,500 a day, or equal to a weekly aggregate of $4,707,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $49,368, and since Jan. 1, 1872, $2,868,628 against $7,561,163 same time in 1871.

The total customs revenue of the Government, in coin, at this port, since January 1, has been $99,972,277 against $104,011,797 during the same time in 1871.

Government has disbursed through the U. S Sub-Treasury here, on account of the coin interest on the public debt, since January 1, 1872, $56,574,029, against $61,522,870 during the same time in 1871.

The export drain of specie was $354,190 last week, against $431,478 same week preceding year. The shipments since January 1, 1872, have been $56,174,631 against $35,309,334 during the same portion of 1871.

Foreign Exchange has been in fair supply and generally quoted weak in price, on a restricted business. Bankers' sixty day bills on London closed on Wednesday at 108¾@109; sight bills on London, 109⅝@109⅞.

The week's exports hence of domestic produce have been to the currency value of $4,695,445.

Government securities has been quoted lower, influenced by the decline in Gold, but have not been offered with freedom at the reduced figures, and have been moderately sought after, mostly by investment purchasers.

On Wednesday, Government bought in a million of Five-Twenties at 112 24@112 95 out of an aggregate offering of $4,584,300.

U. S. sixes of 1881 at the close on Wednesday of the current week were quoted at 116¼@116½; U. S. Five-Twenties of 1862, 114⅜@114⅝; U. S. Five-Twenties of 1864 at 114⅜@114⅝; U. S. Five-Twenties of 1865, 114⅞@115; U. S. Five-Twenties of 1865 consolidated, 113⅝@113½; U. S. Five Twenties of 1867, 114@114⅛; U. S. Five-Twenties of 1868, 113⅞@114⅛; U. S. Ten-forties at 112⅛@112¼; U. S. Fives of 1881 (Funding Loan) 111¾@112; Six per cent. currency bonds, 112¾@112⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 14.	Aug. 21.	Aug. 28.
Consols	92⅝	93	92¾
U. S. 5-20's of 1862	92¼	92¾	92½

" 1867	92½	92⅝	92½
" 10-40s	90⅛	*88¼	88
New Fives of 1881	90	90¼	89¾
Erie	36½	39½	40⅓

*Less September coupon.

State bonds have been in slack demand at generally less firm prices.

Railway and Miscellaneous share property has been more active, the speculative inquiry having been more animated, and towards the close, prices showed more firmness and buoyancy.

Railway Mortgage Loans have been moderately inquired for on investment account, at the ruling prices. Central Pacific Sixes have been in demand at 101½@102. Chesapeake and Ohio have been selling at 94 per cent. and accrued interest.

General business has been moderately active, in the line of domestic produce, with prices of Flour, Wheat, Corn, Oats, Pork, Lard, Bacon, Cheese, Petroleum and Rosin, quoted firmer. Middling upland cotton closed steadily on Wednesday at 22 cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,679,332 bales, against 3,966,622 bales same time in the preceding year; exports 1,950,053 bales against 3,159,643 bales in the previous year; stock at the ports at latest dates, 65,250 bales against 123,200 bales same date 1871.

At the Live Stock Markets, Beeves have been in more demand at 10@13½ cts.; Veals at 6@9½ cts.; Sheep at 4½@6¾ cts.; Lambs, 7@10 cts.; Swine, at 5¼@5½ cts. per lb., all live weight. The week's receipt were 9,653 Beeves, 2,650 Veal Calves, 19,019 Sheep and Lambs, and 34,038 Swine.

There has been less inquiry for Metals since our last. Ingot Copper has been quiet since our last, at about previous prices; 150,000 lbs. sold at 33⅜c.@33½c. per lb. Stotch Pig-iron has been in moderate demand at firm rates, with Eglinton quoted at $51 50@$52. Glengarnock at $54@$52, and Gartsherrie at $55 50@56, with sales reported of 350 tons Glengarnock, 100 tons Eglinton, and 100 tons Gartsherrie on private terms. No. 1 American Pig has been offered sparingly, and quoted up to $56@$57, with No. 2. at $53@$55, on, however, a tame market; 250 tons Franklin sold on privrte terms. Iron Rails have been quiet but steady. Lead Spelter and Morselman Zinc dull at old figures; 10 casks of the latter sold on private terms. Pig Tin in slack demand and quoted weak at 34c@34¼c., gold, for Straits and English; 250 slabs Straits sold on private terms. Tin Plates have been quoted less firm, on a restricted business; sales, 500 boxes assorted Charcoal Plates at $13 37½, gold, and 250 boxes Charcoal Terne at $11 75, gold. Of Regulus Antimony, 10 casks sold at 15¾c., gold.

Foreign goods have been in fair request, and seasonable stocks has been generally quoted firm as to prices. The week's imports of foreign goods reached the amount of $9,162,526 including $4,140,711 of dry goods.

Ocean freights have been moderately active and rates have been again quoted stronger. Room suitable for the Grain, Petroleum, Provisions, Tobacco, and Stave Trade, has been offered less freely.

At the auction sale of Scranton Coal on Wednesday, 100,000 tons were sold at a further reduction, in prices, the range having been from $3 15@3 80, against $3 22@3 95 per ton in July.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Defense Loan, 1883, 103⅛@104; City Passenger R. R., 23@23¼; George's Creek Coal, 92½@98; Atlantic Coal, 1.50@1.95.

☞ The estimated earnings of the Erie Railway for the week ending Aug. 24, 1872, were $381,070; against $483,404 for the corresponding period of 1871—a decrease of $17,226. Total earnings since April 1, 1872, $7,442,533—an increase over the same time in 1871 of $145,482.

☞ The Atlanta *Constitution* reports that the Atlanta and Richmond Air-Line Railway Company have secured the right of way for their line of road through that city to a connection with the Macon and Western and Atlanta and West Point Railroads.

☞ The Railway in Turkey, from Constantinople to Adrianople, has been opened to the public for a distance of forty five miles from the former city. The rest of the line is in course of construction.

☞ There are now seven gangs of men at work on the Montpelier and Wells River Railroad, between Groton and Wells River, Vt., and the entire line will be in running order by the first of November.

☞ The Logansport, Crawfordsville and Southwestern Railway has been completed to Clemer station, just below Logansport.

☞ Work will soon be commenced on the extension of the Sheboygan and Fond du Lac Railroad west of Princeton.

George C. Satterlee.

Mr. George C. Satterlee, well known as the President of the Washington Fire Insurance Company, died on the 7th inst., at the age of seventy-two, while making a summer trip to Mount Desert. He was one of the old and honorable school of New York merchants, and had been prominent in the insurance business since the great fire of 1835, when he was one of the directors of the old Mutual Fire Insurance Company, out of which grew the Knickerbocker. He became president of the Washington Company in 1850, and held that position to the satisfaction of the stockholders and the public until the dissolution of the company after the Chicago fire. He immediately set to work to organize the new Washington, his experience and assured integrity being a guaranty of its success from the start. His death will be deeply felt in the business community as well as in the private circle, where he was highly esteemed.—*Evening Mail.*

Milwaukee and Fund du Lac R. R.

The St. Paul *Press* says that a large number of men left that city on the 19th inst., for an overland journey to the line of the Milwaukee and Fond du Lac Air Line Railroad, for the building of which the DeGraffs have taken the contract. Last week a force of men began the grading of the Milwaukee end, and other forces will be immediately put to work at Fond du Lac and at various places along the line—twenty-five hundred if necessary. This road is about sixty-four miles long, a portion of the line requiring very heavy grading. The energetic contractors say that they will have everything in readiness for the cars by the 1st of December.

☞ An independent company is now making survey for a narrow-gauge three feet railroad between Newport and the mouth of the Big Sandy, with a view of penetrating the coal regions. They propose now to survey about forty miles, but will ultimately extend the road to the point above named. It is ascertained that by the narrow gauge a train 1,800 feet long can make a curve within the radius of one chain, and, therefore, can better adapt itself to the surface of the country than the wide gauge, and consequently it can be built at about half the cost. Dr. John Locke, of Cincinnati, is one of the engineers engaged in the survey above mentioned.

☞ The survey of the railway along the Nile is completed, The line is about six hundred miles in length; commences at Wady Kallah, near the second cataract, and terminates at Chartum, where the Blue and White Nile unite their waters above the sixth cataract. For nearly three-fourths of its length the line will be on the edge of the valley, about three fourths of a mile from the river, and above the level of the periodical inundations.

☞ The Patterson and Newark branch of the Erie Railway has been connected with the main road at the tunnel. A large portion of the through traffic of the road, it is understood, is to be transferred to this branch.

☞ The Newark (Ohio) *American*, of 9th inst., says that the contract has been let for the grading of the Atlantic and Erie road through Hartford township.

☞ The Wallkill Valley Railway has been completed to Scott's Woods, near the southern limits of Kingston.

THE

St. Joseph & Denver City

RAILROAD COMPANY'S

First Mortgage Bonds

are being absorbed by an increasing demand for them.

Besides being the obligation of a wealthy corporation, composed of men of experience and high-toned commercial integrity, they are secured by a first mortgage on the road, revenues, land grant, franchise and equipments, combined in one mortgage, and are readily negotiable both in the markets of this country and Europe.

A liberal sinking fund provided in the mortgage deed must advance the price upon the closing of the loan. Principal and interest payable in GOLD. Interest at eight (8 p. c.) per cent. per annum, payable, semi-annually, free of tax Principal in thirty years. Denominations, $1,000, $500 and $100, Coupons or Registered.

Price 97½ and accrued interest in currency, from August 15, 1872.

Maps, circulars, documents and information furnished.

Trustees, Farmers' Loan and Trust Company of New York.

The diminished quantity of these Bonds for sale, and the increased demand absorbing them, warrant the belief they will soon be sought for at an advance considerably above the present subscription price at which they can now be had through the principal Banks and Bankers throughout the country, and from the undersigned, who unhesitatingly recommend them.

TANNER & CO.

BANKERS,

NO. 11 WALL STREET.

☞ The Philadelphia *Ledger* of 26th inst., reports the net anthracite coal tonnage for the week ending on the 17th inst., from all sources, at 404,939 tons, and for the year 12,011,340 tons, against 7,814,160 tons to the same date last year, being an increase in the tonnage of anthracite coal of 4,197,186 tons. The production of bituminous coal for the week was 56,136 tons, and for the year 1,554,512 tons, against 1,369,030 tons to the corresponding time last year—an increase of 185,482 tons. The total production of all kinds of coal for the week was 461,075 tons, and for the year 13,615,855 tons, against 9,183,190 tons to corresponding time last year, showing an increase of 4,432,668 tons.

☞ C. J. Schultz has been elected President, P. Haberman Treasurer, and H. Stamm Secretary of the Mt. Oliver Incline Railway Co.

Journal of Railroad Law.

COMMON CARRIERS—LIABILITY FOR BAGGAGE, IF STOLEN, TO OWNER.

The facts in the late case of The Toledo, Wabash and Western Railway Company *vs.* Hammond, (33 Ind., 379) are fully and clearly stated in the following opinion by—

GREGORY, J.—Hammond sued the railway company as a common carrier, for a trunk and the contents thereof, shipped at Toledo, Ohio, for Peru, Indiana. There was filed with the complaint a bill of particulars of the contents of the trunk. The defendant moved to strike out certain specified items therein for the alleged reason that they were not proper articles of baggage. The court overruled the motion, and this is complained of as erroneous. It is enough to say, that there is no allegation in the complaint that the trunk and its conte s were delivered to the appellant as baggage.

The next point made is, that the court improperly overruled the appellant's motion for a *venire de novo.*

The court was asked to instruct the jury to find a special verdict. The court on its own motion, sent to the jury interrogatories, covering the entire issues in the case. The jury answered these interrogatories. It is claimed that this is not a compliance with the provisions of the code.

Section 335 and 336 of the code are as follows: "The verdict of a jury is either general or special. A general verdict is that by which they pronounce generally upon all or any of the issues, either in favor of the plaintiff or defendant. A special verdict is that by which the jury find the facts only, leaving judgment thereon to the court."

"In all actions the jury, unless otherwise directed by the court, may, in their discretion, render a general or special verdict, but the court shall at the request of either party direct them to give a special verdict in writing upon all or any of the issues; and in all cases, when required by either party, shall instruct them, if they render a general verdict, to find specially upon particular questions of fact to be stated in writing. This special finding is to be recorded with the verdict."

The only substantial difference between a "special verdict" and a "special finding" under the provisions of the code, is this, the "special verdict" must cover the issues, or some or more of them; the "special finding" may embrace only a particular question pertinent to, but not covering, any of the issues, although it may be controlling. Any finding of a jury that covers an issue is a verdict. This is in harmony with the previous rulings of this court.

In Paine *vs.* The Lake Erie and Louisville R. R. Co., 31 Ind., 283, the court below, of its own motion, required the jury, unconditionally, to answer certain interrogatories, which they answered without returning a general verdict. It was held by this court, that the answers could stand as a special verdict.

It is not necessary to a special verdict that it be in any particular form; all that is required is, that the facts found covering the issue, should be stated, leaving the conclusion of law thereon to the court.

In the case at bar, the court below committed no error in overruling the appellant's motion for a *venire de novo.*

There was a conflict in the evidence as to whether the trunk was to be carried by the appellant to Peru or to Lafayette. The appellant asked the court below to instruct the jury, that "if the company is not liable in this case as a common carrier; that is, if the goods were not lost in transit between Lafayette and Toledo, the plaintiff cannot recover, and your verdict should be for the defendant." The court refused to give this instruction. The court had charged the jury, that "in this case the suit is against the railway company as a common carrier, and if you find that the company carried the goods safely to their destination, and in the absence of the plaintiff, securely stored them in her depot baggage-room, then the liability of the company as a common carrier ceased, and Hammond cannot recover for the negligence of the company in keeping the baggage as warehouseman."

The jury found, as they well might, under the evidence, that the trunk was, under the contract of shipment to be delivered to the appellee at Peru. If in violation of this contract the appellant took it to Lafayette, and there stored it in her depot baggage-room, her liability of common carrier was not thereby terminated. The court was right in refusing to give the instruction asked.

At the instance of the appellee, the court instructed the jury, that, "If the plaintiff employed the defendant as a common carrier for hire to transport his baggage from the City of Toledo, Ohio, to Peru, Indiana, the defendant was bound to deliver the baggage at Peru, Indiana, and if the defendant did not do so, but carried the baggage past Peru to Lafayette, Indiana, and the baggage was stolen from the defendant at Lafay ette, whereby it was lost to the plaintiff, the defendant is liable to the plaintiff for whatever damage he may have sustained by reason of the defendant's failure to deliver the baggage at Peru, Indiana.

It is claimed that this is the counterpart of the instructions refused; that if one was refused, the other ought to have been. This latter instruction goes upon the hypothesis that it turns out in evidence that the defendant was employed as a common carrier for hire to transport the baggage to Peru. This instruction was right. It does not ignore the evidence tending to prove that the trunk was shipped to Lafayette and not to Peru.

It is urged that the court erred in permitting the appellee to testify as to the value of the opera glass mentioned in the bill of particulars.

It is argued that the opera glass was not properly baggage, and therefore the common carrier, without knowledge of the fact that it was in the trunk, would not be liable for the loss thereof.

It is true, that it is well settled, that merchandise which one carries in a trunk without the knowledge of the carrier is not protected as baggage, and if lost without the express fault of the carrier, he is not liable.

But baggage is defined to be "such articles of apparel, ornament, &c., as are in daily use by travelers, for convenience, comfort, or recreation." 1 Bouvier's Law Dic., 180.

In Doyle *vs.* Kiser 6 Ind., 242, the learned judge speaking for the court says, "The articles of property treated as baggage, according to the decisions of different courts, may be clothing, traveling expense money, a few books for the amusement of reading, a watch, a lady's jewelry for dressing, &c."

It is said in Bouvier, *supra* "From analogy to the foregoing articles, it will be obvious that the term baggage must comprehend an almost infinite number and variety of articles not enumerated here."

An opera glass is as useful to the traveler as a "few books of amusement," or more so.

That the trip from Toledo to Peru was made in the night can make no difference. Articles for use as baggage at the end of the journey or during a temporary stay at a particular place are as properly baggage as those actually used in the transit. We think the court below committed no error in allowing the evidence to go to the jury.

It is insisted that the evidence does not support the verdict. It is admitted that there is a conflict in it, but it is claimed that the preponderance is so strongly in favor of the appellant that the court erred in overruling the motion for a new trial. We do not think so. Hammond, the appellee, swears positively that he shipped the trunk at Toledo for Peru. He was going there himself. Unlike the baggage-master, his attention was not divided between that and a large number of other trunks. Moreover it would be perfectly natural that Hammond should have his mind fixed on Peru, the place of his destination; but the baggage-master would only have his mind called to the place by a single statement from the shipper. The chances are two to one that Hammond was right, and the other witnesses were wrong. But be this as it may, we cannot, under the rule of law on the subject, interfere with the finding of the jury, sanctioned as it is by the action of the court in which the case was tried.

Judgment affirmed, with costs.

☞ The South Side Railroad, from Saw Mill Run, Allegheny county to Georgetown, in Beaver county, says the Beaver *Argus*, is receiving subscriptions to its stock from residents along the route through which it is located, very liberally. The road will be upwards of forty miles in length, and will afford facilities of transport to market to the products of a rich agricultural and mineral section hitherto, to a great extent, deprived of them. Saw Mill Run is just across the Ohio river from Allegheny City, below Pittsburgh.

☞ The Bedford and Bridgeport Railroad, extending from Mount Dallas, the terminus of the Huntingdon and Broad Top Mt. Railroad, to Bridgeport, on the Pittsburg and Connellsville Railroad, has been leased by the Pennsylvania Railroad Company, and will be known as the Bedford Division. Mr. W. H. Brown has been appointed Superintendent of the road.

☞ Allen Haines has been re-elected President, John Neal Treasurer, and Moses Gould Clerk of the Portland, Rutland, Oswego and Chicago Railroad Company.

☞ The Connecticut Valley Railroad is to be extended up to the line of Connecticut and Massachusetts on the Springfield side of the river.

☞ Kansas City has subscribed $150,000 to the Kansas City, Wyandotte and Northwestern Railroad.

Green Bay and Lake Pepin Railroad.

The work on this road is progressing in the most satisfactory manner. About two-thirds of the grading between New London and Plover is already completed and the remainder of the work will be vigorously prosecuted. It is expected that Mr. Harley's contract through Little Wolf will be completed this week, and also Mumbrue, Baldwin & Co.'s job in St. Lawrence. George Hiles' contract from Grand Rapids to Dexterville, 15 miles, will be done within two or three weeks. A contract for grading from Plover to Grand Rapids, 14 miles, has been let to Messrs. Mumbrue & Dayton, who will soon commence work and are to have it finished by October 1st. The piers for the bridge across the Wisconsin are now nearly finished.—*Green Bay Advocate.*

☞ At a meeting of the stockholders of the Jacksonville, Northwestern and Southwestern Railroad Company, held in Jacksonville on the 13th inst., the following gentlemen were elected Directors for the ensuing year: M. P. Ayers, W. S. Hook, and A. E. Ayers, Jacksonville; J. E. Salter, Waverly; Wm. A. Gibson, New York; and Wm. Elliott and J. H. Dunn, Philadelphia. Subsequently the Board of Directors met and elected M. P. Ayers, of Jacksonville, President; Wm. A. Gibson, of New York, Vice President; W. S. Hook, of Jacksonville, Secretary and Treasurer; and Gibson, Casanova & Co., of New York, Financial Agents of the company.

☞ The Cadiz (Ohio) *Republican* says: "It is reported that Streator, President of the Lake Shore and Tuscarawas Valley Railroad, has purchased the Eastern Ohio Railroad—the "Calico" road, as it has been called. If this be true it indicates clearly enough the direction the Lake Shore and Tuscarawas Valley road will take, after its completion to Uhrichsville."

☞ Work on the St. Vincent extension of the St. Paul and Pacific Railroad is progressing most satisfactorily. About one hundred miles of track are now laid, and the grading is kept well in advance of the iron.

FOR SALE.

Four new passenger Coaches for sale; two 60 passenger each, price $5,250; two 76 passenger, price $7,000 each, now ready for lettering. Also a 30 ton new Locomotive ready for use.

Iron Furnace Property
FOR SALE.

THE EASTON IRON MANUFACTURING Company will sell at Public Sale, at the Circle, in the borough of Easton, Northampton County, Pa.,

On Thursday, September 26th, 1872.

at 10 o'clock in the forenoon, their

Blast Furnace and Real Estate

located in the borough of Glendon, Northampton Co., Pa., containing about 15 acres of Land. The Furnace erected thereon is a sheet iron casing stack, 14½ feet bosh by 70 feet high, with bell and hopper, J. P. Merris & Co.'s low pressure condensing engine, 8 boilers, 2 Kents' hot blast ovens, casting house, engine house, steam hoist, 11 tenement houses, 2 stables and a blacksmith shop. The furnace buildings are built of brick and stone, and put up in the best of manner, with all the modern improvements. The works have been built about one year, and are now in blast. Its production of iron is as great as any other blast furnace in the Valley for its size. Canal and Railroad in close connection. Hematite Ores are very plenty, and there is sufficient for several more furnaces. No better location can be found; iron can be manufactured and conveyed to market as cheap, if not cheaper, than any other place in the Lehigh Valley. Leases and all other advantages belonging thereto sold together with the property, which will appear in the conditions of sale. The Furnace will be sold in blast, if nothing prevents. Terms and conditions made known on the day of sale. Sale positive and without reserve. Any parties wishing to view said property will please call on the premises.

EASTON IRON MANUFACTURING CO.

Easton, August 20, 1872.

Notice to Contractors.

OFFICE KENTUCKY AND TENNESSEE R. R. }
MOBILE, ALA., August 18, 1872. }

THE KENTUCKY AND TENNESSEE RAILroad Company desire to contract for the construction of their Road from Columbus, Ky., to Fillmore City on the Ohio River, opposite to the City of Cairo, Illinois, a distance of about twenty-one miles.

The road runs up the Valley of the Mississippi River, and, for the greater part of its length, will require heavy embankments, trestle work, and pile bridging.

Maps, profiles, specifications, and any other information, may be obtained at this office after the first of September next.

The work is required to be completed within six months after the ratification of the contract, and is worthy of the attention of large contractors.

L. J. FLEMING,
6t34 Chief Eng. Ken. and Tenn. R.R.

PROPOSALS
FOR THE CONSTRUCTION
OF THE
TEXAS AND PACIFIC RAILWAY.

Proposals will be received up to the 1st of October, 1872, at the office of the Texas and Pacific Railway company at Marshall, Texas, for the grading, bridging, tieing and tracklaying of about five hundred (500) miles of the Texas and Pacific railway, divided into the following divisions:

The southern division, extending from Longview through Dallas to Fort Worth—155 miles.

The Jefferson division, extending from Marshall through Jefferson to Texarkana—65 miles.

The east half of the trans-continental division, extending from Texarkana to the crossing of the Houston and Texas Central railroad, near Sherman—156 miles.

The west half of the trans-continental division, extending from the crossing of the Houston and Texas Central railroad to Fort Worth—68 miles.

The grading and bridging will be let in one mile sections; the tracklaying by the mile; the ties by one thousand and upwards.

Each class of work to be bid for separately.

The time for completing the grading, bridging and tieing extends from sixty days to nine months.

The company reserves the right to reject any or all bids, and in letting the work will be the judge of the responsibility of parties bidding, and will give preference to contractors having outfits on the ground ready to commence work within ten days after the date of contract.

Profiles, estimates and specifications can be seen at the office of the company, in Marshall and Jefferson, Texas, and at the Pacific National bank, Council Bluffs, Iowa.

Contractors, upon arriving on the ground, can obtain work up to the date of general letting, on the fifty miles west of Longview.

Address, until September 20th, Council Bluffs, Iowa—after that date, Marshall, Texas.

G. M. DODGE,
Chief Engineer.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**

Special attention given to filling orders for Small *T and Street Rails*, of every weight and description.

Old Rails Bought or Re-Rolled, as Desired.

P. O. Box 5222.

EDWARD J. ETTING,

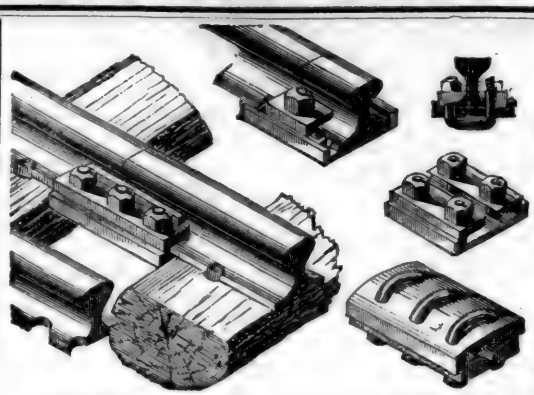
105 Walnut St., Philadelphia,

MANUFACTURERS' AGENT FOR THE SALE OF

AMERICAN AND FOREIGN

RAILROAD IRON

Of every Size, Weight and Pattern,



For Steam and Street Roads.

ROLLING STOCK & SUPPLIES.

Old Rails Re-Rolled & Exchanged for New.

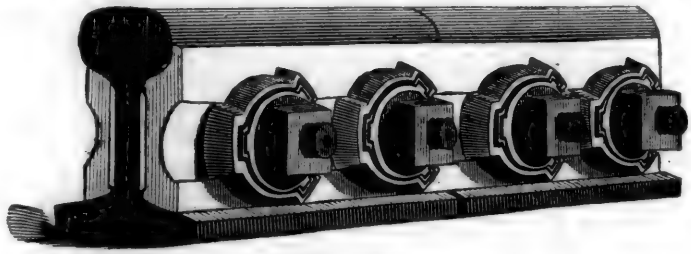
☞ Special attention paid to the Purchase and Sale of Old Railroad and Scrap Iron.

CONSIGNMENTS SOLICITED.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

New York, Saturday, September 7, 1872.

Nashville and Chattanooga R. R.

The Nashville *Journal of Commerce* says that at the annual meeting of this Company, on the 14th. ult., the purchase by the directors of two-thirds of the Nashville and Northwestern railroad was approved. The contract with the Louisville and Nashville Railroad for a union depot was confirmed, and the board of directors empowered to issue in lieu of the $3,000,000 second mortgage bonds previously authorized, $20,000 first mortgage bonds for every mile of the road and its branches constructed or to be constructed. The gross earnings of the Nashville and Chattanooga and Nashville and Northwestern Railroads for the fiscal year were $1,800,757 70; and the expenses $1,258,264 93—leaving a net income of $542,492,-77. The increase of freight receipts over those of last year was $434,821 45. The tonnage has increased 75 per cent, and the gross earnings from freight only 45 per cent, owing to decrease in rate. The directors have expended their income in reducing liabilities, making improvements and purchase of property, and have administered the affairs of the corporation so well that its stock has advanced to 74, and no sellers.

INVESTING MONEY.

The Northern Pacific Railroad Company, through its Financial Agents, offers for sale its First Mortgage 7-30 Gold Bonds. They fall due in 30 years, bear 7 3-10 per cent. gold interest, payable semi-annually, are exempt from United States tax to the holder, and are secured by first and only mortgage on

1. The Railroad, its Right of Way, Franchise, Rolling Stock, and other Property.

2. Its Traffic or Net Earnings.

3. A Government Grant of Land averaging on completion of the Road about 23,000 acres per mile of track.

The Road follows what is known as the Valley Route to the Pacific, flanked most of the way by an excellent country, and is assured in advance of a vast and profitable traffic which already awaits its completion. The work of construction is steadily and satisfactorily progressing; the settlement of the adjacent country and the building of towns keep pace with the advance of the road; a large body of the Company's lands is already in market, and the proceeds of sales will constitute a Sinking Fund for the redemption of the Company's Bonds, which are convertible at 110 into the Company's Lands at market prices.

Believing that these bonds, both in point of safety and profitableness, constitute such a security as judicious investors can approve, we recommend them to the public. Government bonds and all marketable securities are received in exchange at current quotations, without cost to the investor.

JAY COOKE & CO.,

New York, Philadelphia and Washington.

FINANCIAL AGENTS NORTHERN PACIFIC RAILROAD COMPANY.

English Colonies in the North-West.

Rev. Geo. Rodgers, of Dorsetshire, in the south of England, accompanied by a number of intelligent English tenant-farmers, has recently completed a tour of inspection through the Northwest, made for the purpose of selecting a location for a colony of some two thousand English people. After an extended trip, the delegation selected eight townships (about 180,000 acres) in Clay County, Minnesota, on the line of the Northern Pacific Railroad—half the area being Government lands, and hence subject to free homestead entry by the colonists, and the other half belonging to the Railroad Company. A railroad town, to be named Yeovil at the request of the colonists, has been set apart to the colony, near the centre of the tract. Some 200 families, embracing 1,000 people, intend to leave England for the colony lands in April next, and the remainder will follow during the season. The colonists are mainly well to-do tenant-farmers and farmers' sons, who will bring with them to the United States from $1,000 to $10,000 of capital each, and a degree of agricultural skill and thoroughness which, when expended upon the fertile lands they have chosen, can hardly fail to result in thrift and success. The full title to the lands bought from the Northern Pacific Railroad Company will cost these English farmers less than half as much per acre as they have hitherto paid for the annual rental of Dorsetshire lands.

Mr. Rodgers and his practical associates unite in saying that the facts regarding the quality of the Company's lands and the general advantages of the North-western country have been considerably understated by the Company's publications and representatives in Great Britain. They also concur in the belief that Minnesota and the country further west, in the same latitude, are perfectly adapted to English settlement, and that the present colony movement is only the forerunner of scores of thousands of Englishmen who will speedily follow and make their homes in the great grain belt and stock range of the North-West. Mr. Rodgers consulted many of his own countrymen settled in Minnesota, and without an exception they claimed to be prosperous and greatly pleased with the State as a home for English people who wish to emigrate to America.—*Philadelphia Inquirer.*

☞ The survey of the entire line of the Utah, Idaho and Montana Railroad from Corinne to Helena, about four hundred and fifty miles, has been completed. The contract for grading and for crossties for the first fifty miles will be awarded in a few days. The Company is making extraordinary exertions to push the work forward,

Pacific Railroad.

REPORT OF THE DIRECTORS TO THE STOCKHOLDERS.

In compliance with our custom, we herewith present you with a report of the business and financial condition of this company up to the 28th day of February, 1872, being the expiration of the fiscal year.

The capital stock of the company is divided into 86,305 shares. The bonded debt, to the amount of $7,000,000, was created, as you are aware, mainly to pay the State for its lien on the road. The $700,000 were loaned by the county of St. Louis to the road in its darkest days, to assist in its extension. The $500,000 borrowed five years ago, and now soon due, were issued to place the road in proper repair after the war—the track and machinery of every kind having been run down to the lowest ebb.

The $3,000,000 of bonds recently sold were mainly to clear off a floating debt, accrued in changing the gauge of the road, so far as the same was necessary; in the purchase of real estate in the city of St. Louis, and to square up the depot and other grounds, rendered actually necessary, so as to make the grounds previously owned by this company properly available; and this company has now the largest and most central depot grounds owned by any company in the West, or perhaps elsewhere.

There has been purchased and laid this year 3,430 tons of new rails, at a cost of from $74 to $75 per ton, and amounting in the aggregate to $256,280 12, less what has been received for old rails; and we now have under contract for immediate delivery 4,000 tons additional, all of which was purchased before the rise in iron, and is being manufactured under the personal supervision of our Agent, Mr. Mills, a competent expert in the manufacture of iron. This iron, it is believed, will last much longer than that generally to be found in the market for sale.

During the past year 156,407 ties have been put in the road, at an average cost of less than 45 cents each, aggregating $71,314 05.

Although a large amount of money had been paid for bridges during the previous year, the needs of this year were much greater, to pay off former contracts, and to extend the work of renewals and repairs.

The following bridges have been entirely rebuilt, and in many cases with a bottom chord of iron, viz:

Shawnee Creek, Catfish Creek, Evans Creek, Lime Kiln Creek, Rorster Creek, Greys Creek, Brushy Creek, Box Branch Creek, Raytown, Muddy, Clear Fork, Little Blue, Osage, Big Ruger, Grays Creek, 1, Little Ruger, Grays Creek, Big Creek, 1, Bear Creek, Deans Branch, East Pin Oak, Sallys Fork, West Pin Oak, Wilsons Branch, Big Creek No. 4, Little Cedar, Big Creek, Lamine, Cole Creek, Greys Creek, Gasconade, Herman, Greys Creek, 2, Bailey Creek, Crawfords, Big Creek, 2. The aggregate cost of the above being $218,078 50.

There has also been a considerable amount of money expended in the repairs of other bridges on the line of the road, not included in the foregoing statement, which simply includes those entirely rebuilt.

A branch road to Carondelet has been decided upon, so as to reach the river, and secure the use of a large river front. This last has been secured by the passage of an ordinance by the City Council. By this branch, the iron rolling mill and iron furnaces will be reached, and it is expected to complete this branch from its starting point, viz. Kirkwood, to its terminus at Carondelet, during the summer, a distance of fourteen miles, and at an expense of (say) $300,000.

That this will prove one of the most valuable investments the road has made, there can be no doubt.

The Carondelet Ferry and franchise have been purchased, and are held for the benefit of this company, at a cost of $33,000. As a passenger and vehicle ferry alone, the purchase would be a good one, but the real object was to place the company in a position where it could do its own transferring across the river, as soon as the Carondelet branch should be finished. Some additional expenditures in extending the dyke some five hundred feet into the river, will thus secure a permanent landing. A transfer boat may also be necessary, on which to cross the cars. This boat should be so constructed that it will be able to cross at all times, winter or summer, which, it is to be regretted, has not hitherto been the case, causing vexatious delays, and the diversion of freight and passengers to other points.

There have been purchased, to arrive, five locomotives, and there are now on hand and in effective use eighty-seven.

Six passenger cars have been purchased at a cost (with freight) of $6,229 55 each, aggregating $37,377 30, there now being on hand and in active use fifty-four. Five additional have been ordered, but not yet received or paid for at a cost of $5,150 each.

240 freight cars have been purchased at an aggregate cost of $179,266 45, having now on hand 1,332 cars of all kinds, including passenger and baggage.

On the 1st of September of this year, this company bought out the Sleeping Car Company, which had a running contract on the road (five years of the time remaining unexpired). There were six cars with outfit, and were purchased at an average cost of $7,000 each, aggregating $42,000; and soon thereafter an arrangement was entered into with the Pullman Car Company to take the cars and put on four additional, of the Pullman pattern, and run them all jointly, which arrangement, it is believed, will work and pay well, and thus supply this company with first-class sleeping cars. There have also been purchased sixty-one hand cars, at an aggregate cost of $6,100.

During the past year this company has increased its passenger and other accommodations, but still has labored under a disadvantage in not having an arrangement to run into the Union Passenger Depot at Kansas City, which will, in part, account for the falling off in passenger receipts from last year, together with the fact that the receipts of all other Western roads have fallen off in this respect, but your directory is pleased to be able to state that arrangements have recently been perfected by which, at an early day, this company will be equally represented in that depot, or perhaps in a new one, to be jointly built.

Your directory have also much pleasure in stating that arrangements have lately been entered into by which passengers can be receipted over your road to San Francisco, by which, it is hoped, travel will be greatly increased.

Goodale's steam brake has also been introduced and adopted, after various comparisons and experiments between that and the Westinghouse brake, and which, together with the Miller platform, are great safeguards against accidents, and will render, what is understood by telescoping, almost impossible.

While entire freedom from accidents could not be anticipated, it is yet a genuine source of congratulation that so few serious accidents have taken place. Scarcely a life has been lost, and the cost of repairs, and of injuries sustained, will be covered, it is hoped, by a few thousand dollars.

Almost all the accidents occured on account of broken rails, caused by the severe frost of the unusually long winter just passed.

The Pleasant Hill and Lawrence Railroad, in accordance with lease entered into June 14, 1870, for thirty years, was received by this company, and is now being operated at a yearly conditional rental of $75,000; and although the business of that branch is not yet independently remunerative, still, in view of its connections, and the fact that the country through which it runs is rapidly filling up with an energetic population, there can be no doubt that in the no distant future this will be one of the most remunerative branches in the interest of this company.

The Sedalia and Lexington Branch is now about completed, and has been in the possession of this company since May, 1871, when it was received from the directors of that road, under an arrangement by this company to complete it, which is now nearly accomplished, at an estimated cost of $1,000,000, and for which this company has received payment in first mortgage bonds of the Lexington and St. Louis Road, at 70 cents, and which, after being received and endorsed by this company, have been disposed of at a fraction below 80 cents; also $800,000 in second mortgage bonds of that company, at 40 cents, which this company now holds, and $24,406 50 in cash.

By the terms of the lease, this company agrees to pay the interest on the first mortgage bonds, being six per cent, (gold), amounting to $54,000 per annum, and, in addition, nine-twelfths of the net earnings, after first paying the above interest.

In addition to these, we have the Missouri River Railroad, from Kansas City to Leavenworth; the Leavenworth, Atchison and North Western from Leavenworth, to Atchison; and the Osage Valley and Southern Kansas (or Boonville Branch), all of which are being operated by your company. These branches, as such, are not yet a source of profit, separately considered, but in connection with the Main Trunk are highly remunerative, and the Lexington and St. Louis Railroad, just finished, will prove one, if not the best, feeder, of all the branches this company now have under lease.

LENGTH OF MAIN TRUNK AND BRANCHES.

	Miles.
Main Trunk of the Pacific Railroad	283¼
Missouri River Branch, (Kansas City to Leavenworth)	25¼
Leavenworth, Atchison and North Western, (Leavenworth to Atchison)	21¼
Osage Valley and Southern Kansas, (Boonville Branch)	25
Lexington & St. Louis, (Sedalia to Lexington)	55¼
St. Louis, Lawrence and Denver, (via Pleasant Hill to Lawrence)	61
Total	471¼

There were carried over the road the past year, through passengers 56,001; Local, do., 613,199—showing a decrease, mainly in through travel, and which seems to have been the case with many other western roads. It is believed, however, that arrangements are now perfected by which, during the coming year, the passenger receipts will be greatly increased.

The receipts of Grain (pounds and bushels) were as follows:

	Pounds.	Bushels.
Wheat	123,036,974	2,050,616
Corn	119,941,384	2,141,810
Oats	14,926,941	452,331
Rye	603,556	10,777
Barley	7,416,920	154,519

Live stock.	No.
Hogs	186,047
Sheep	12,822
Mules	997
Horses	245
Cattle	95,945

The earnings were:

From passengers	$1,267,883 55
" freight	2,262,443 43
" mails	59,312 52
" miscellaneous sources	7,659 35
	$3,597,298 85

Expenditures, viz:

Running expenses	$1,159,489 31	
Maintenance of road and bridges	959,906 35	
Maintenance of rolling stock	458,576 19	
General expenses	71,525 53	
		2,649,497 38
Net earnings		$947,801 47

Showing the total expenses to be 73.68 per cent.

Deducting that portion of the extraordinary expenses for new iron and bridges, not properly belonging to this year, the ordinary operating expenses are 62.94 per cent.

During the past year, in addition to the usual expenses incurred in maintaining your road, the following items, though appearing elsewhere under their appropriate headings, show that extraordinary purchases, improvements and repairs have been made, among which are the following:

Real estate	$169,799 53
Ferry franchise	33,000 00
New bridges	218,078 00
New iron (extra amount)	256,280 12
New ties	71,314 05
New sleeping cars	42,000 00
	$790,471 70

The Pacific Railroad was commenced May 24, 1850, completed to Jefferson City March 12, 1856; to Sedalia February, 1861; and to Dresden May 10, 1863 (under great difficulties, the war having commenced); thence to Kansas City October 2, 1865, and to State line April, 1866, where the main line now rests.

During the whole of this time the financial condition of the company was very embarrassing. The quality of the material used in the construction and maintenance of the road was often defective, and since the war the quality of railroad iron, made at many of the furnaces, was of the most inferior kind, and thus it is often necessary to remove iron that in point of time should not be half worn out. While a large amount of money has been spent in the past two years for bridges, there will yet have to be considerable sums spent in this way.

During the coming year, owing to the opening of several new branches, and the increase of business along the entire line of the road and its connections, there will be additional rolling stock required, as follows:

4 first-class engines	$44,000
5 Passenger coaches	25,000
500 box cars at $800 each	400,000
100 cattle cars at $800 each	80,000
200 coal and flat cars at $600 each	120,000
At an aggregate cost of	$669,000

Of iron there will be required not less than 6,000 tons, 4,000 tons of which are already contracted for, and before the rise in iron.

One hundred thousand ties will also be required for the coming year.

By the purchase of the foregoing rolling stock, it is believed that the gross earnings of the road can be greatly increased, as at present your road has not sufficient stock to answer all the demands made upon it.

In view of the maturing of the $500,000 of real estate indebtedness referred to elsewhere, your board has decided to issue $800,000 in bonds, with eight per cent. interest (currency), at twenty years from May 1st prox., with which to take up the $500,000 now nearly due, and which has been drawing ten per cent. per annum interest, and in addition to build a branch road to Carondelet, as herein referred to.

The present debt of the road is as follows:

Bonded debt	$10 000,000 00
Land bonds	500,000 00
St. Louis County	700,000 00
	$11,200,000 00
Gross receipts	$3,597,298 85
Less interest as above. $784,000 00	
Operating expenses & ordinary repairs ... 2,266,298 27	
	3,050,298 27
Balance	$547,000 58

For more minute and detailed statements of the business and operating expenses of the company, you are respectfully referred to the report of the auditor and other officers of the company herewith attached.

The Board of Directors:

By JOSEPH BROWN, *President.*

The General Financial Statement of the Company up to March 1, 1872, is as follows:

Balance February 28, 1871		$1,711,420 92
Net earnings of 1871		945,389 39
		$2,656,810 31

Due by Post-office department	8,465 95
Due by Atlantic and Pacific Railroad.	56.258 12
Due by Railroads and Express Co's.	28,687 83
Uncollected freight bills	112,612 62
Total, as above	$624,725 70

☞ The Prince Edward Island Railway is progressing favorably; track laying has commenced, and before winter sets in some forty miles of the road will be completed.

Traffic Guarantee

AND

REDEMPTION BONDS

7 per cent. Gold Interest.

Mortgage $15,000 per mile.

COMPLETED AND FULLY EQUIPPED RAILWAY.

228 MILES LONG,

ENTIRELY WITHIN THE

STATE OF ILLINOIS.

FIRST MORTGAGE SINKING FUND, GOLD BONDS OF THE

Springfield and Illinois South-Eastern Railway.

INTEREST PAYABLE FEBRUARY AND AUGUST, FREE OF GOVERNMENT TAX, AT THE

Office of the Farmers' Loan and Trust Company

IN NEW YORK.

PRICE 90 AND ACCRUED INTEREST.

These Bonds, representing an unusually light Mortgage upon a Finished Railway, fully Equipped, extending Centrally through one of the Richest, and most Populous States of the Union, remarkable for the great success of its different Railways, offer unusual inducements to the investor seeking a PROFITABLE AND SAFE SECURITY.

The Holder of this Bond has the right to vote at all Elections.

By the terms of a Traffic Guarantee Contract with the well-known CLEVELAND, COLUMBUS, CINCINNATI AND INDIANAPOLIS RAILWAY, (four of whose Directors, including the President and Vice-President, are also DIRECTORS IN THE SPRINGFIELD AND ILLINOIS SOUTH-EASTERN RAILWAY), A LARGE NUMBER OF THESE BONDS WILL BE PURCHASED BY LOT SEMI-ANNUALLY *AT PAR* and ACCRUED INTEREST, giving the fortunate holders Eleven per cent. Profit on their investment, besides nearly Nine per cent. Interest.

We respectfully invite the attention of all Capitalists to this Security as a particularly safe and desirable one.

Pamphlets and Maps with full particulars furnished by us on written or personal application.

Poughkeepsie and Eastern Railroad.

We are gratified to learn that but about two thousand feet of the Poughkeepsie and Eastern Railroad track remain to be covered with rails, now on the way for delivery, to complete the road to the State Line. Its completion, and connection with the Connecticut Western road, mark the commencement of a new era in the prosperity of our city and county. Pushed through amidst difficulties that seemed insuperable, the road stands as finished, an embodiment of the courage and enterprise of its projectors, and all those who have contributed in any manner to its success. To Mr. P. P. DICKINSON, its engineer-in-chief, too much praise cannot be awarded. From its beginning to its completion, declining offers for his services in other and more lucrative enterprises his faith in the success of this, his large ability and experience, his foresight, intelligence and industry, have all been given without reserve or stint. Not these alone. His temporary residence among us, has been marked by an ever present kindness and courtesy that mark the real gentleman, and which have made him a favorite with all who have met him in a business or social way, and should he leave, as he may after his work is finished, will carry with him the best wishes of a host of warm friends. Many others there are, who deserve special mention in connection with this work and to whom we shall take occasion to refer hereafter, we have not yet begun to estimate the importance of this local enterprise to our city and vicinity, but we predict that will come ere long in a rich return for the labor and means spent to complete the road.—*Poughkeepsie News, Sept. 2.*

Bridge over the Mississippi River.

AN ACT to authorize the construction of certain bridges across the Mississippi river, and to establish the same as post-roads.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall be lawful for the Western Illinois Bridge Company, a corporation existing under the laws of the State of Missouri, to build a bridge across the Mississippi river at the city of Quincy, Illinois, for the purpose of crossing persons and property, such as are usually crossed on wagon-bridges ; and also to lay on and over said bridge railway-tracks for the more perfect connection of any railroads that are or hall be constructed to the said river at or opposite said point, and that, when constructed, all persons and property as aforesaid, and also all trains of all roads terminating at said river, at or opposite said point, shall be allowed to cross said bridge for reasonable compensation, to be made to the owners of said bridge, under the limitations and conditions hereinafter provided ; and in case of any litigation or alleged obstruction to the free navigation of said river, the cause may be tried before the district court of the United States of any State in which any portion of said obstruction or bridge touches ; and that all railway companies desiring to use the said bridge shall have and be entitled to equal rights and privileges in the passage of the same, and in the use of the machinery and fixtures thereof, and of all the approaches thereto, under and upon such terms and conditions as shall be prescribed by the Secretary of War, upon hearing the allegations and proofs of the parties, in case they shall not agree.

Section 2. That said bridge may, at the option of the company building the same, be built either as a pivot drawbridge or with unbroken or continuous spans: *Provided,* That if the said bridge shall be made with unbroken or continuous spans it shall not be of less elevation, in any case, than fifty feet above high-water mark, as understood at the point of location, to the bottom chord of the bridge ; nor shall the spans of said bridge be less than two hundred and fifty feet in length, and the piers of said bridge shall be parallel with the current of the river, and the main span shall be over the main channel of the river, and not less than three hundred feet in length: *And provided also,* That if said bridge shall be constructed as a pivot drawbridge the same shall be constructed with a draw over the main channel of the river at an accessible and navigable point, and with spans of not less than one hundred and sixty feet in length in the clear, on each side of the central or pivot piers of the draw ; and the next adjoining spans to the draw shall not be less than two hundred and fifty feet, if the proper location of the draw over the channel will admit spans of this width between it and the shore, and said spans shall not be less than thirty feet above low water mark, and not less than ten feet above extreme high water mark, measuring to the bottom chord of the bridge, and the piers of said bridge shall be parallel with the current of the river : *And provided also,* That said draw be opened promptly, upon reasonable signal, for the passage of the boats whose construction shall not be such as to admit of their passage under the permanent spans of said bridge, except when trains are passing over the same ; but in no case shall unnecessary delay occur in opening the said draw during or after the passage of trains.

Section 3. That any bridge constructed under this act, and according to its limitations, shall be a lawful structure, and shall be recognized and known as a post-route, upon which, also, no higher charge shall be made for the transmission over the same of the mails, the troops, and munitions of war of the United States, than the rate per mile paid for their transportation over the railroads or public highways leading to said bridge, and the United States shall have the right of way for postal telegraph purposes across the said bridge.

Section 4. That said company may execute a mortgage upon the said bridge, and issue bonds, payable, principal and interest, in gold or in United States currency.

Section 5. That the right to alter or amend this act so as to prevent or remove all material obstructions to the navigation of said river by the construction of said bridge, is hereby expressly reserved ; and the said bridge shall be built under and subject to such regulations for the security of the navigation of said river as the Secretary of War shall prescribe ; and the said bridge shall be, at all times, so kept and managed as to offer reasonable and proper means for the passage of vessels.

Sections 6. That the plans and specifications, with the necessary drawings of said bridge, shall be submitted to the Secretary of War, for his approval, and until he approve the plan and location of said bridge it shall not be built or commenced ; and should any change be made in the plan of said bridge during the progress of the work thereon, such change shall be subject to the approval of the Secretary of War ; and all changes in the construction or any alteration of said bridge, that may be directed at any time by Congress, shall be made at the cost and expense of the owners thereof.

Section 7. That the Warsaw and Alexandria Bridge Company, their successors and assigns, a corporation existing under and by virtue of the laws of the State of Missouri, be, and is hereby, authorized to construct and maintain a bridge over the Mississippi river at and between the city of Warsaw, in Hancock county, and State of Illinois, and the city of Alexandria, in Clark county, and State of Missouri ; and the bridge authorized to be built by this section is hereby declared to be a post-route, and shall have all the privileges and be subject to all the terms, restrictions and requirements contained in the foregoing sections of this act : *Provided,* That the construction of the bridge mentioned in this section shall be commenced within eighteen months from the passage of this act.

Approved May 17, 1872.

Indian Railways.

Mr. Juland Danvers shows in his annual report to the Secretary of State for India that the Indian Railways in 1871, although a bad year "for trade, and consequently for traffic," earned a net revenue of £2,844,000, or equal to about 3¼ per cent. upon the £85,000,000 expended upon lines carrying traffic, though, upon the whole capital outlay of £91,963,510, upon guaranteed and State lines at the 31st March, 1872, the rate of net earnings were not quite equal 3¼ per cent. In 1870 the net revenue was £2,846,000. Mr. Danvers observes, "there can be no doubt that railways have added to the security, have advanced the material prosperity of the people, and have been the means of increasing the revenue, and of saving much expenditure both on account of the army and post office." The accounts of the Indian railways for the years 1870 and 1871 compare thus—

	1871.	1870.
Capital received	£93,564,367	£89,841,211
Capital expended	90,009,622	87,684,329
Revenue—		
Gross receipts.....	£6,146,130	£6,213,865
Working expenses	3,302,050	3,367,261
Net revenue.....	£2,844,080	£2,846,604
Guaranteed interest ...	4,422,243	4,212,577
Provided by Governm't.	£1,578,163	£1,865,973

There were in December last 5,076¼ miles of line opened, including 250 miles completed dur-

ing the year. A further 128 miles have been opened since the close of the year, making the present total 5,204½ miles.

Cincinnati, Sandusky and Cleveland R. R.

The lease of this road for ninety-nine years to the Cleveland, Columbus, Cincinnati and Indianapolis Railroad Company covers the main line from Sandusky southwest to Dayton, Ohio, 155 miles, with a branch from Carey, 50 miles from Sandusky, northwest to Findlay, 16 miles; another branch (leased) from Springfield east to Columbus, 45 miles. The section from Springfield to Dayton, 25 miles, was some time ago leased to the Cincinnati and Springfield Short Line Company, whose road, recently completed, is also leased by the Cleveland, Columbus, Cincinnati and Indianapolis. The latter now operate 661 miles of road, consisting as follows: A line from Cleveland southwest to Cincinnati, 244 miles, through Crestline, Delaware, Springfield and Dayton; what may be considered as a loop of this line, from Delaware south to Columbus, and then west to Springfield, 69 miles; a line from Grafton, Ohio, 80 miles from Cleveland, west by south through Bellefontaine, Ohio, Union, Muncie and Anderson, Indiana, to Indianapolis, 202 miles, and the newly leased line from Sandusky to Springfield, 130 miles, with its branch to Findlay, 16 miles.

☞ The Sheboygan county (Wis.) *Herald* says work on the Lake Shore road is being pushed with vigor. The track is now within six miles of Port Washington, and is being extended at the rate of a mile a day. A force of five hundred men are at work upon the grade in Milwaukee county. Another gang of men are at work upon the grade north of Sheboygan; another is working south from Manitowoc, and still another is at work between Manitowoc and Two Rivers. The schooner Charlotte Raab arrived at Sheboygan, last week, with four hundred tons of iron for the new road.

☞ The Pittsburg *Mail*, of 31st ult., says that the management of the Pittsburgh and Connellsville Railroad have a large force of workmen employed on the road-bed, and it is expected that in two months a substantial, solid track will be provided. The Point of Rocks route to Washington, D. C., making the distance to the capital seventy-five miles shorter, will be completed by that time, and it is the design of the company, as we learn, to place on the road a through train. The road will then be safe, and passengers will be assured a speedy transit.

☞ The Milwaukee *Wisconsin* says that a party of Northern Pacific Engineers under Geo. F. Bailey, Esq., have recently been engaged in surveying a line from Rice's Point across the St. Louis entry to Conner's Point, thence along the bay front of Superior to the mouth of Nemadji river; and that there is a corps running a line from Komoko, (N. P. Junction) 24 miles west of Superior City, to the bay of Superior.

☞ Isaac H. Sturgeon, of St. Louis, G. W. Johnson, of Washington, and D. W. Willard, of Lansing, Mich., have been appointed Commissioners to examine and report to the President upon the road constructed by the Kansas Pacific Railway.

Connecticut River Railroad.

A meeting of the stockholders of this company was held in Boston on the 3d inst., for the purpose of voting upon the acceptance of certain acts of the last Legislature which authorize said road to lease that portion of the Vermont and Massachusetts Railroad lying in the State of Vermont, and to issue stock or guarantee bonds of any other road to the amount of $200,000 for the purpose of extending their line through Vermont and New Hampshire, also to secure a right of way over any of the connecting roads in the State of Vermont, and authorizes the company to increase their capital stock to $300,000. These acts were accepted by a unanimous vote, and the matter referred to the directors with full power.

Iron.

The recent increase in the prices of iron is stimulating greatly its production in this country. Most of the larger iron companies in Pennsylvania are extending their operations. One Pittsburg company is increasing its capital and proposes to erect another furnace, so as to add to its producing capacity 12,000 tons per year. It is said that eastern capitalists are making investments at and near St. Louis, which will increase the production of iron in that section from 15 to 20 per cent. In other iron-producing districts equal activity is manifest, and new fields are opening almost daily. The completion of the Chesapeake and Ohio railroad through the rich iron and coal fields of West Virginia will be the beginning of a new era in the history of the mining industry of that section.

☞ Mr. J. L. Wilson, for many years Master of Transportation of the Baltimore and Ohio Railroad, has resigned his position, and the vacancy has been filled by the appointment of Mr. Wm. Prescott Smith, who since his retirement from the Baltimore and Ohio Railroad a few years since has had charge of the trains running between Washington and New York. Mr. Andrew Anderson, chief clerk and assistant to the general manager, has been appointed, with the title of "general agent," to act for the line in the place of Mr. W. P. Smith, whose resignation took effect on the 31st ult.

☞ Five million dollars of the first mortgage bonds of the Wellington, Grey and Bruce Railway have just been sold in England; this disposes of the remaining portion of the issue for main line from Guelph to the Southampton terminus on Lake Huron. The Kincardine extension is being pushed forward rapidly, and it is expected that the 40 miles from Palmerston to Wingham will be opened for traffic this fall.

☞ The first regular passenger train on the Duanesburgh and Schenectady Railroad ran on the 19th ult. The road is reported to be in fine condition, and it is confidently expected that a large amount of business will be done on this road. There will be four trains each way per day, three passenger and one freight train.

☞ The Niles and Canfield (Ohio) Railroad Company has filed its certificate of incorporation. The termini of the road are Niles, in Trumbull county, and Canfield, in Mahoning county. Capital stock $100,000. Corporators, Jas. Ward, John Morris, David Harris, Josiah Robbins, Jr., and Thos. Carter.

$5,000,000.

A

PRIME INVESTMENT

AT A

LOW PRICE

THE

CHICAGO

AND

CANADA SOUTHERN

First Mortgage Sinking Fund 30 Years'

7 PER CENT. GOLD BONDS

AT

90 AND ACCRUED INTEREST.

Interest Payable April and October at Union Trust Company.

This road is the western link in the new AIR LINE from BUFFALO to CHICAGO, and runs from the Detroit River to Chicago in nearly a straight line.

The road is a part of the same line as the Canada Southern, and is being built by the same men, viz.: Milton Courtright, John F. Tracy, David Dows, Wm. L. Scott, Henry Farnham, R. A. Forsyth, John M. Burke, M. L. Sykes, Jr., all Directors either in the Chicago and Northwest, or the Chicago, Rock Island and Pacific; Geo. Opdyke, of the Midland Road; Sidney Dillon, Daniel Drew, John Ross, David Stewart, Samuel J. Tilden, Kenyon Cox, and other prominent railroad men.

The Road, like the Canada Southern, will have steel rails (60 pounds to the yard) throughout; is practically straight and level; much shorter, and can be run more quickly and with greater safety than any other road connecting Buffalo and Chicago.

Twenty-five miles are finished and running; seventy-five miles more are so far advanced as to be finished by January 1st, and the entire road will be completed during the ensuing year. Steel rails and ties for one-half the entire road have already been purchased.

The builders of the road control enough of its Chicago feeders to obtain for it a profitable business from the start, having projected the line to accommodate existing business, and having seen the necessity for another trunk line between Chicago and the Atlantic seaboard, located expressly with the view of obtaining the cheapest transportation practicable.

The branch lines will make the shortest connections between Chicago and Toledo, and Chicago and Detroit, as well as between all these points and Buffalo.

The Canada Southern Bonds in every particular like these, were eagerly taken, the last of them several weeks ago, by the best class of investors, and were on the market a shorter time than any other railroad loan of like amount for years past.

The proceeds of these bonds will complete the entire line, and we recommend them with the same confidence as we did the Canada Southern, and regard them as in every way a choice security.
